

My Internship With Father And Son Collision

BY: AIDEN VALIS

Starting my internship

- ▶ Starting my internship was really exciting! I never knew I could work, get a school credit and earn money while in high school. I was, at the same time, getting actual work experience.

At Father & Son Collision

- ▶ I work at Father & Son doing anything they need me to do. I got to tear apart a 1972 Plymouth Barracuda and I got to do some sanding on a 1966 Chevelle. If I wasn't working on a vehicle I was cleaning and sweeping the shop. But at least I was in there getting to watch the other workers and learn new skills for the future.
