

EARLY LEARNING PARTNERSHIP OF YORK COUNTY INTERNSHIP

MARGARET CURRY
NORTHWESTERN SENIOR

WHAT I LEARNED

- Through my internship at the Early Learning Partnership of York County I was able to learn about and explore the impact that early literacy has on children and their educational future.
- ELP focuses on encouraging early literacy skills in children ages 0-5 and collaborates with local pediatric centers and the school districts to give children the early exposure that they need.

WHERE WILL I GO FROM HERE?

- My career goal is to be a pediatric nurse practitioner and this internship has given me helpful insight on the development of young children's minds.
- Both this internship and the health science courses I have taken at ATC have helped me find my passion for both healthcare and working with children

WHY I RECOMMEND ATC

- The Applied Technology Center is such an asset in our community and in our school systems.
- ATC gives students the opportunities to explore career paths with real world experience that most high school students would not have access to.
- ATC has given me opportunities to explore career paths and helped me plan out my future with workplace certifications and real world experience and exposure through programs such as work studies, internships, and HOSA

EXAMPLES OF MY WORK

- Organizing the ELP storage unit to distribute to local pediatric centers
- The ELP Annual Donor Banquet to thank donors for all their help with the organization (Jan 28)
