

# Castle Heights Art Internship

---

Skye Kennington 2019

# Getting to Know Each Other

---

- My first day in this class was a little rocky. The students seemed like they did not want me in their class.
- Once I was able to introduce myself, many of the students were asking questions.

# Daily Tasks

---

- Normally when I came into the class, the students were at lunch.
- I would clear off my desk, and the other tables of paper, art materials, etc.
- Next, I would write the objective on the board, along with a game.
- Most of the time, the game was to draw a figure on the board and see how many “friends” we could get.

# What I Received from my Internship

---

- The main thing I learned is what a teacher does on a daily basis, and what they have to do to become a teacher.
- Another thing I took out of this internship is that every student learns differently, and even at a younger age most of them have a variety of personalities.
