Round 2 of Remote Learning includes 5 days for work. 2 days of instruction this week: (April 2&3) and 3 days of instruction (April 13-15) the week after Spring Break.   The last two days of Round 2 are for making up any work during this Round (April 16&17)
Instructions to complete the student packet:
7th GRADE –

This Round will consist of a CHOICE BOARD you will pick activities to complete using the vocabulary we have learned this semester. Since i know most of you have left your notebooks in school, I have added 3 pages of VOCABULARIO to the FILES section in canvas. Sort by date and you will see them at the top.

For 5 total days of instructions you need to submit 5 assignments. You can only do 2 assignment submissions as IXL, therefore 3 assignments must come from the choice board and readings. Be creative and have fun with the vocabulary. When you are creating with vocabulary I would recommend using at least 20 words.   (there are many words on the vocabulary sheets to pick from.

Instructions to submit work:
If you are able to, scan or take a picture of your work and submit on The Canvas Weekly assignment as file uploads. If you do not have access to Canvas/Internet, complete all packets and keep in a safe place to await further instructions to turn in work.

Scanning work on iPhone:
Open the NOTES app and start a new note. Click on the camera icon on the bottom, click on SCAN DOCUMENTS Click on adjust if need to crop or KEEP if it is good. If more than one page to scan continue taking pictures and click on SAVE when done. When you are ready to email, in NOTES click on the top right piece of paper with the up arrow and select email or text to send the scan.

Scanning work on Android:
Open the Google Drive app and tap the blue "+" icon in the bottom-right corner and then selecting "Scan." Place your paper on a flat surface, line it up in the viewfinder, and tap the shutter button to capture the document. There's one more possible step: For some reason, Drive sometimes tries and fails to crop a document on its own—which can result in a cut-off scan. To fix: Tap the crop button (the overlapping "L" shapes) in the top right area of the screen Then drag the dots on the box until they outline the document. When done, click the check mark and your scan is complete. Hit the check mark again to save your pdf document and send via email, messaging, canvas, etc.
