December 2019

Dear Class of 2023-2024,

Welcome to your high school experience in Rock Hill Schools. We are proud of the work you have done to get to this point and are excited to offer you a great many curricular choices as you plan out your final, important years in the district. These days, school has become much more flexible; you may choose to graduate early, take your courses online, pursue industry certifications for work, or engage in rigorous, advanced coursework to be college and career ready. You have many choices, and those choices are described in this catalog.

As a rising freshman, please keep this catalog and use it to guide your journey through high school. It lays out the requirements, expectations, and options that apply to your ninth grade cohort. While state and district policies may change over your time in high school, you can always go back to this catalog to see what expectations apply to you for graduation.

Your high school guidance counselor is critical. Make certain you know who he or she is. Your guidance counselor will help you stay on track for your South Carolina High School Diploma, but also help you stay in touch with options and offerings that will meet your learning needs and goals. Please be sure to stay in close communication and advocate for yourself with your guidance counselor. Each year you will have an Individual Growth Plan meeting to make certain you are progressing according to your plan and make plans for future steps. Use this time to think about your future, ask questions, and make sure you get what you need to be successful.

Rock Hill Schools is committed to preparing you to meet the rigorous standards of the Profile of the South Carolina Graduate. We are ready to help you develop the world-class knowledge, world-class skills, and life and career characteristics that will ensure you are successful no matter what you choose to do in the future. Our goal is your success and we are all one team in that mission.

One Team. One Mission. One Rock Hill.

Sincerely,

A handwritten signature in black ink that reads "Bill Cook".

Bill Cook, Ed.D.
Superintendent

Mission

Rock Hill Schools will provide all students with challenging work that authentically engages them in the learning process and prepares them for successful futures.

Vision

Rock Hill Schools – a community inspiring students to learn, grow, connect, and thrive.

Motto

Engaging students for successful futures.

Professional Code

Put Students First
Nurture Relationships
Work Together for a Shared Vision
Grow Professionally
Continuously Find Ways to Improve

PROFILE OF THE South Carolina Graduate

WORLD-CLASS KNOWLEDGE

Rigorous standards in language arts
and math for career and college
readiness

Multiple languages, science, technology,
engineering, mathematics (STEM), arts and
social sciences

WORLD-CLASS SKILLS

Creativity and innovation

Critical thinking and
problem solving

Collaboration and teamwork

Communication, information,
media and technology

Knowing how to learn

LIFE AND CAREER CHARACTERISTICS

Integrity • Self-direction • Global perspective • Perseverance • Work ethic • Interpersonal skills

GENERAL INFORMATION

Registration

1. It is strongly recommended that all students take eight units each year. Students in grades 9 and 10 are required to take 8 units.
2. All courses are open to students of both sexes.
3. All students must earn one unit of Physical Education 1, JROTC, or Marching Band with Physical Education 1.
4. English and math courses are usually quite full. Students may not take two required English or math courses in the same academic year unless there is a defined, programmatic reason for it. All students, even those taking English 1 or Algebra 1 in middle school, must still take an English and math course in the senior year.
5. Students may take up to two units of credit recovery in Rock Hill School's summer school program.
6. Students must have prior approval of the high school to take any virtual course, dual credit course, or dual enrollment course. Please check with your guidance counselor for any required form(s).
7. If a student enrolls after the beginning of a course, attendance counts from the first day of the course, not from the day of enrollment. Students transferring from another school or from another level of the same course receive credit for days attended in the previous course.
8. Students transferring from other schools receive credit for previously acquired coursework from accredited programs. Please work with your guidance counselor to ensure he/she receives needed paperwork in order to effectively transfer credits.
9. Students who become ineligible for courses due to failures must check their schedules when school starts to make certain that appropriate changes have been made. Students should see their guidance counselors if there are any problems.
10. Students are encouraged to register for the level(s) of instruction recommended by the teachers in the core instructional areas (English, Math, Science, Social Studies, and World Language). If a student chooses to make selections that are different from teachers' recommendations, a parent must request in writing the preferred level and course.
11. Students are reminded that once school begins, a change in level (*Example: honors math to a college prep. math*) may be impossible due to a lack of space in the course(s) to which they wish to move or limitations in rearranging other courses in the student's schedule. In such cases, the student is required to remain in the course originally chosen. Please check with your guidance counselor if you would like to make a change.
12. Counselors may assign classes for students who fail to complete the registration procedure.

Schedule Changes

Students are encouraged to choose courses carefully during the registration period. Students receive a verification form of their requests following the completion of the registration process. The verification form allows students to review their requests and make any appropriate changes prior to a deadline. Once the master schedule is defined, if there are conflicts with the courses students selected or if courses are dropped due to small numbers, students should submit a request for course change complete with parent signature to the school guidance office.

No preference changes are made after the school's schedule change deadline. Schools announce this deadline during registration. Changes are made if final grades, summer school, Phoenix Academy, and/or Virtual SC completion necessitates the change. Level change requests are considered only when initiated by the teacher. Even then, level changes can be honored only if there is space in the new class. Students who drop a course after the fifth day will receive WF, which calculates as an F in the overall GPA.

Note: There is no guarantee that all courses requested can be scheduled. When possible, each student with a conflict is notified to allow him/her to make alternate selections. All contact information in the school database must be accurate and up to date. Students and parents should notify the school of any changes.

Retaking a Course

According to the South Carolina Uniform Grading Policy, students are allowed to retake the same course under the following conditions:

Any student may retake a course at the same level of difficulty if the student has earned a D, P, NP, WP, FA, WF, or an F in that course. If the same level course is not accessible, the course may be retaken at a different level of rigor. A student who has taken a course for a unit of high school credit prior to the ninth grade year may retake the course at the same difficulty level regardless of the grade he or she has earned. Retaking the course means that the student completes the entire course again (not a subset of the course such as through credit or content recovery). If the course being retaken has an EOCEP, the EOCEP must be retaken. All course attempts from middle and high school will show on the transcript. Only one course attempt and the highest grade earned for the course will be calculated in the GPA.

A student who retakes a high school credit course from middle school must complete it before the beginning of the second year of high school or before the next sequential course (whichever comes first). A student in grades nine through twelve must retake a course by the end of the next school year or before the next sequential course (whichever comes first). In cases where this is impossible due to circumstances beyond the student's control, like course scheduling, the student may request a waiver from the district office to allow him/her to retake a course beyond the defined limit. Waivers will be granted only if circumstances beyond the student's control are present and if the course is being taken as soon as it is feasible.

For all grade levels, all courses will remain on the transcript. However, only the highest grade will be used in figuring the student's GPA. (Administrative Rule IKA-R, approved 2019)

Content Recovery

Students must be currently enrolled in a course to participate in content recovery.

Students are eligible for participation in content recovery through the recommendation of their classroom teacher based upon a variety of factors including, but not limited to, documented student performance on formative and summative classroom assessments, student attendance patterns, and course content and curriculum pacing.

Students are not limited in the amount of courses for which they may participate in content recovery. However, school administrators may limit participation based upon parent/legal guardian and/or teacher recommendation.

Content recovery assignments must be completed by the last day of the course for which the content recovery is being attempted. Seniors must complete any content recovery assignment no later than the last day of the school year in the current semester. (Policy IKADD, approved 2018)

Credit Recovery

Students who fail a course may not have to retake the entire course again to earn credit. Students must have previously failed a course to be eligible for credit recovery. Participation in credit recovery will not affect a student's GPA. Should a student wish to modify his/her GPA, he/she should repeat the full course for credit and not seek participation in the credit recovery program.

Students are eligible for a credit recovery course if they have previously taken and failed an initial credit course. Students must have obtained a grade of 45 or higher in the initial course or higher in the initial credit course or the student is not eligible for credit recovery and must retake the full course to receive credit. Students who have already received credit for a course are ineligible to participate in credit recovery to improve their final grade.

Students seeking credit recovery may not have to re-take the entire course again to earn recovery credit.

- If the initial course final grade was between 57 and 59, the student may retake only the units in the online curriculum designed by the classroom teacher as the student's areas of weakness. (Mastery set at 60 percent to earn credit)
- If the initial course final grade was between 50 and 56, the student may retake units specified by the teacher in the course. (Mastery set at 60 percent to earn credit)
- If the final grade was below 50, the student must retake the full course for credit recovery.

Please note that the South Carolina High School League only allows for 2 courses to be recovered per year for eligibility purposes.

Credit recovery courses must be taken in the next available grading period or summer after the initial course was failed. The school administrator reserves the right to waive this time limit when warranted. Credit recovery course offerings may be limited by the availability of space, facilitators, and appropriate computer-based content and/or due to district budgetary constraints. Students will be required to complete an application to request placement in a credit recovery course. Consent of the student's parent/legal guardian must be sought prior to enrollment. Schools reserve the right to charge a nominal fee for credit recovery. (Policy IKADD, approved 2018)

Promotion and Retention

In order to comply with state law and ensure continuous and appropriate progress from grade 9 through grade 12, the high schools have established regulatory guidelines to follow the district's Promotion and Retention Policy, IKE. In Grades 9 through 12, in order to be eligible for promotion to the next grade classification, students must have earned a minimum number of units, as specified below. **Note: Students must be enrolled in at least one English and one Math course each of the four years of high school.** (Policy IKE-R, revised 2015)

To be promoted to grade 10, a student must pass a minimum of 4 units of credit to include:

- One English credit (English 1)
- One math credit
- Two additional credits

To be promoted to grade 11, a student must pass a minimum of 10 units of credit to include:

Two English credits (English 1 and 2)
Two math credits
One science credit
One social studies credit
Four additional credits

To be promoted to grade 12, a student must pass a minimum of 16 units of credit to include:

Three English credits (English 1, 2 and 3)
Three math credits
Two science credits
Two social studies credits
Six additional credits

High School Assessments

Beginning in 2015, the South Carolina Department of Education requires that all eleventh graders take a career readiness assessment.

Beginning 2017, the South Carolina Department of Education encourages students to take either the SAT or ACT at no cost to the student, during the school day. Each of these assessments will be administered on designated school days in the spring.

Four high school courses have a state-mandated End-of-Course (EOC) exams which count for 20 percent of the student's final grade in the course. Courses with EOC exams are:

- English 1,
- Algebra 1 or Intermediate Algebra,
- Biology 1, and
- U.S. History and Constitution.

Graduation Requirements

To be eligible to receive a South Carolina High School Diploma, students must earn 24 units and demonstrate proficiency in computer literacy. The computer requirement may be met by successfully completing one of many computer courses that includes instruction in and testing of these skills. Based on state law, requirements to receive a South Carolina High School Diploma are prescribed as follows:

English	4 units
U. S. History and Constitution	1 unit
Economics	½ unit
U.S. Government	½ unit
Other social studies	1 unit
Mathematics	4 units
Science	3 units
Computer literacy	1 unit
P.E.*	1 unit
World Language** or CATE elective***	1 unit
Electives (including health)**	<u>7 units</u>
Total Required	24 units

*Students are required to earn one P.E. credit for graduation. This may be achieved through the traditional Physical Education 1 course, JROTC, or Marching Band with Physical Education 1.

****One unit of a world language or an occupational elective is required for graduation. Students planning to attend a four-year college or university must take two or three years of the same world language and one course in fine arts for college entrance.**

*****Students planning to attend a two-year institution (e.g., York Technical College), or who are planning to enter the workforce immediately, must earn at least one CATE unit in a career and technical area.**

All students must earn the required number of prescribed units.

All students in Rock Hill Schools must take Health for high school graduation.

As part of his/her coursework, the student must pass a classroom examination on the provisions and principles of the United States Constitution, the Declaration of Independence, the Federalist Papers, and American institutions and ideals. The student must take the U.S. Citizenship and Immigration test as part of the U.S. Government course, provided there is no cost to the school or district for administering the test. Students are not required to meet a minimum score.

Courses that Meet the SC Computer Literacy Requirement

Please work with your guidance counselor to ensure you have or will meet South Carolina's computer literacy credit requirement for graduation. Courses approved for this credit are being changed by the state to align with new computer science standards, so it is important to plan accordingly. Rock Hill Schools courses which meet new state requirements include the following:

Course	Course Number
AP Computer Science Principles	4775
Fundamentals of Computing	5023
Fundamentals of Web Page Design and Development	5031
Advanced Web Page Design and Development	5033
Computer Programming 1	5050
Computer Programming 2	5051
Discovering Computer Science	5061 (high school)
Discovering Computer Science Part I Discovering Computer Science Part II	506200CH (grade 7) 506300CH (grade 8)
PLTW Principles of Engineering	6050
PLTW Computer Science Essentials	6372
PLTW Cybersecurity	6378

Commencement Exercises

Only those students who pass all the units required for a South Carolina High School Diploma or South Carolina High School Credential may participate in the commencement exercise held at the end of the school year.

The uniform state-recognized South Carolina High School Credential is aligned with the State's Profile of the South Carolina Graduate and to a newly created course of study for these students with disabilities whose

Individualized Education Program (IEP) team determines this course of study is appropriate. All special education students should meet with their IEP teams to discuss the requirements for the South Carolina High School Credential.

Students who have been excluded or expelled from their home high school may not be eligible to participate in commencement ceremonies.

Honor Graduates

Students with outstanding academic performance will be recognized as honor graduates with one of the following accolades:

- ***Valedictorian*** - The student(s) with the highest adjusted grade point average calculated by dividing the number of quality points earned in grades 9-12 by the total number of credits earned in grades 9-12. Calculation may be affected by grades of high school courses taken in middle school.
- ***Salutatorian*** - The student(s) of the graduating class with the second highest adjusted grade point average using the method stated above.

Grade point averages will be carried to four decimal places and rounded to three by the computer. Correspondence, independent study, and/or off campus courses not approved by the district prior to the student taking the courses will not be figured into the student's final GPA for valedictorian or salutatorian. In case of more than one student having the highest or second highest adjusted grade point average, multiple valedictorians or salutatorians will be declared and no attempt will be made to break ties. If there are multiple valedictorians, then all commencement speeches will be given by the valedictorians.

- ***With highest honors*** - Those students with a regular GPA of 4.5 or above will receive both written and verbal recognition during the commencement exercise. They will also wear the honor cord as part of their graduation attire.
- ***With honors*** - Those students with a regular GPA of at least 4.2 but less than 4.5 will receive written and oral recognition in the commencement program. In addition, any student who has all A's (grades of 90 or above) since entering high school (ninth grade) will be eligible for honor graduate status.

Note: To be an Honor Graduate, a student must receive a Gold Seal Diploma.

Gold Seal Diploma

To receive a Gold Seal Diploma a student must:

- Complete at least 28 credits in grades 9-12 including 16 in the core academic areas (English, math, science, social studies, and world language) with no grade lower than a C or a cumulative GPA of 4.2.
- Earn 4 credits within one's Major. See Secondary Curriculum Framework for majors.

Elective courses will be selected in conjunction with the core academic courses. A student must earn the Gold Seal Diploma to be designated an "honor student" (GPA 4.2 or higher or earn all A's) at graduation.

South Carolina Diploma Pathways

Students enrolled in South Carolina high schools shall have the opportunity to earn graduation Seals of Distinction within each high school diploma pathway that identifies a particular area of focus, beginning with the freshman class of 2018-19. The following requirements of state Seals of Distinction were released by the South Carolina Department of Education on September 10, 2019.

Honors Seal of Distinction	College-Ready Seal of Distinction	Career Seal of Distinction	Specialization Seal of Distinction
<u>GPA</u> 3.5 or higher <u>English</u> 4 credits; two at honors or higher level <u>Math</u> 4 credits; three at honors or higher level (Algebra 2 should be prerequisite for the fourth higher level credit) <u>Lab Science</u> 3 credits; two at honors or higher level <u>Social Studies</u> 3 credits; two at the honors or higher level <u>World Languages</u> 2 credits of the same language for 2018-19 entering ninth graders; 3 credits of the same language for entering ninth graders 2019-2020 and beyond <u>Advanced Coursework</u> 4 credits of honors or higher in the last two years prior to graduation	<u>GPA</u> 3.0 or higher OR ACT = composite score of 20 or above OR SAT = 1020 or above (combined math and evidenced-based reading/writing scores) <u>English</u> 4 credits <u>Math</u> 4 credits; no honors math credits required; credits must include Algebra 1 (or equivalent), Geometry, Algebra 2, and fourth math with Algebra 2 or Integrated Math 3 as a prerequisite <u>Lab Science</u> 3 credits <u>Social Studies</u> 3 credits <u>World Language</u> 2 credits of the same language <u>Fine Arts</u> 1 credit	<u>GPA</u> 2.5 or higher <u>English</u> 4 credits <u>Math</u> 4 credits <u>Science</u> 3 credits <u>Social Studies</u> 3 credits <u>Other</u> Completion of an EEDA major and one of the following: 1) at least one industry-recognized credential, 2) silver or higher on WIN, or 3) a semester-long work-based learning placement credit.	<u>GPA</u> 3.0 or higher (all areas) Student must complete one of the following areas to qualify: <u>STEM</u> 4 credits beyond required courses in math, science, and technology; at least two must be at honors level or higher; may be in one area of STEM or across four areas <u>World Language</u> 4 credits in the same language; completion of one of the following: 1) minimum ACTFL exam score of "Intermediate Low" (or an equated score on STAMP or ASL assessment), 2) AP exam score of 3 or higher, or 3) IB exam score of 4 or higher before the senior year; English Learners must complete all criteria above and Level 5 composite ACCESS test score <u>Military</u> 4 credits in JROTC and an ASVAB score of 31 or higher <u>Arts</u> 4 credits in single or multiple areas of the Arts; two or more at honors or higher level; mastery on external exam or performance task

Grade Point Average

South Carolina uses a Uniform Grading Scale to calculate Grade Point Average (GPA) and class rank for high school students. The South Carolina Uniform Grading Scale assigns grade points for each numerical grade. By state mandate, all courses carry the same grade points with the exception of Honors, Dual Credit, IB and AP courses. Honors courses receive an additional 0.5 weighting and AP, IB and Dual Credit courses receive an additional 1.0 weighting.

The South Carolina Uniform Grading Scale for grades 9 through 12 can be found in this catalog. High school courses taken in middle school are also subject to the Uniform Grading Scale.

Class Rank

All courses taken for high school graduation credit are included in the calculation of class rank. The instructional level of each course, the student's grade in each course, and the total number of courses attempted are included in the computation of class rank. Under the Uniform Grading policy passed by the South Carolina State Board of Education, all course grades are based on a state-defined grading scale with corresponding grade point values for each numerical grade. In addition, the policy specifies that only courses taught at the Honors, Advanced Placement, International Baccalaureate, and/or Dual Credit in college courses may be awarded additional weighting values (.5 quality point for Honors credits and 1.0 quality point for Advanced Placement, Dual Credit, and International Baccalaureate credits) to be used in computing grade point averages and class rank. Grade Point Average (GPA) is calculated using the following formula:

$$\text{GPA} = \frac{\text{sum of quality points x units}}{\text{Sum of units attempted}}$$

Once a GPA has been computed for all students, all grade point averages are rank ordered numerically from highest to lowest and each student's class rank is determined by the position of his/her GPA relative to all other students in a given grade. In instances of equal GPAs for more than one student, the same class rank is given and the following value in sequence will be omitted. Class ranks are calculated at the end of the academic school year.

Class rank is one consideration in the college admissions process. It is also used as a criterion for some scholarships. Any questions or concerns students have about class rank should be discussed with a counselor. Students are reminded that one's position in the class rank systems is relative to the weighted rank of all other students in a particular grade. Therefore, as the numbers and performance of other students in a particular grade group changes, a student's class rank may vary as well even though his/her own academic performance may remain constant.

Athletic Academic Eligibility

To participate in interscholastic activities, students must meet the following criteria:

1. A student who becomes 19 years of age prior to July 1 of the upcoming school year will not be eligible to compete in any athletic activities during that school year.
2. A student has 8 semesters of athletic eligibility once he or she starts the ninth grade.
3. To be eligible in the first semester a student must pass a minimum of five credits applicable toward a high school diploma during the previous year. At least two units must have been passed during the second semester or summer school. The student must also have an overall passing average.
4. For second semester eligibility: If eligible first semester, students must pass at least 2 or more units in the fall semester and have an overall passing average of 60. If ineligible first semester, students must pass at least 2 ½ units in the fall semester.
5. Students may only apply two credit recoveries toward eligibility and/or two summer school courses.
6. Fall and winter sports eligibility is based off the previous year's grades. Spring sports eligibility is based off fall grades.

South Carolina Uniform Grading Scale Conversion Chart

Numerical Average	Letter Grade	College Prep	Honors	AP/IB/Dual Credit

CAREER PLANNING AND INDIVIDUAL GRADUATION PLANS (IGPs)

Overview

South Carolina high school students face many challenges including higher graduation standards, increasing college entrance requirements and growing workforce demands. For students to be successful, high schools must provide a curriculum that is challenging and relevant. They must also offer a sequence of courses to assist students in becoming passionate, lifelong learners. A framework of curriculum planning aids students and their parents in this process. An effective curriculum framework must have high standards and expectations for all students, a rigorous curriculum that prepares them for post-secondary education and engaging instructional strategies designed to help students learn important concepts and ideas in depth. The curriculum framework used by Rock Hill Schools includes a rigorous curriculum design and a requirement that each student develop a challenging IGP. Working with their parents, counselors and teachers, students develop plans that include academic as well as professional-related courses. Their plans also identify extended learning opportunities that are designed to prepare students for transition to post-secondary education and the workplace.

Rock Hill Schools strives to provide a comprehensive curriculum to address the individual needs of all of our students. The framework design allows for an integrated, multi-dimensional approach to planning that helps students become successful learners for high school and beyond. The framework provides a structure for planning and communicating high expectations.

Framework

A comprehensive curriculum framework includes the following elements:

- Schools of study
- Clusters of study
- Majors for each cluster of study
- An Individual Graduation Plan (IGP)
- Recommended curriculum for an IGP
- Template for the IGP for each major

A **school of study** is a way to organize the curriculum into broad program areas that are inter-related in nature and that relate to various professions and academic areas of study. These are the district's schools of study:

- School of Arts and Humanities
- School of Business Management and Information Systems
- School of Math, Science, Engineering, and Industrial Technologies
- School of Health Science and Human Services

A **cluster of study** is a means of organizing instruction and student experiences around broad categories that encompass virtually all occupations from entry level through professional levels. Clusters of study are designed to provide a seamless transition from high school study to post-secondary study and\ or the workforce. These are the clusters of study from which to choose:

- Arts and humanities
- Education and training
- Business management and administration
- Finance
- Hospitality and tourism
- Information technology
- Marketing sales and service
- Agriculture, food and natural resources
- Architecture and construction
- Transportation, distribution and logistics
- Science, technology, engineering, mathematics
- Health science
- Human services
- Law, public safety and security
- Government and public administration

A cluster of study has several majors. A **major** consists of the completion of at least four required units of study in that area. It is recommended that students take at least one course at the highest level offered.

An IGP consists of the state high school graduation requirements and\ or college entrance requirements. In addition, course recommendations for successful completion of a major that aligns to post-secondary education and the workplace are included.

The United States Department of Education (USDE) has developed 16 national clusters of study as a means of organizing the curriculum. The Secondary Curriculum Framework for Rock Hill Schools is designed around these 16 national clusters with a slight revision to one cluster. In addition, Rock Hill Schools organized these 16 clusters into groups referred to as “schools of study.” The district’s curriculum currently provides the opportunity for students to complete a major in more than 30 career areas.

Choosing a school of study, a cluster of study and a major requires students to assess interests and skills, then select coursework to achieve his or her academic goals while exploring a professional goal. In the spring of eighth grade, students choose one of the schools of study to explore. This takes place during an individual planning conference with a school counselor, the student and his or her parent(s). In ninth grade, students select at least one of the 16 clusters to explore, the goal being to select a major by the end of the tenth grade.

Frequently Asked Questions

What is a major?

A major is a concentration of coursework in a specialized area. A major consists of the completion of at least four required units of study as well as complementary electives that relate to that area. Majors help students focus their course selection around a concentration in a specific area. There are 34 majors in our framework. These are shown under each cluster of study on the framework chart.

When do you declare a major?

In the eighth grade, students, along with their parents, meet individually with counselors and choose a school of study that interests them. Beginning in the ninth grade, students select a cluster of study to begin exploring. These selections can change. By the end of the tenth grade, students declare a major, focusing their academic and elective choices in a specific direction.

Can you change a cluster (or major)?

Students can change a major if they find that the one they selected is no longer their area of interest. Students are never locked into a specific cluster or major. Successful completion of four required courses as outlined on district IGP templates constitutes a major.

Do all students have to declare a major?

Students need to declare a major by the end of the tenth grade; however, completion of a major is not a requirement for a South Carolina High School Diploma.

Can I have more than one major?

Yes, with careful planning beginning in the ninth grade, it is possible to complete more than one major.

Is it possible to complete a major while continuing to participate in other electives such as fine arts, physical education, ROTC, etc.?

Yes, the district highly recommends students explore a broad range of experiences and interests during their high school years. There is ample opportunity with their 32 possible course selections to complete a major and participate in other areas of interests.

Where can I find out more?

See the framework in this catalog for a chart illustrating the district curriculum framework as well as the IGP templates that identify the courses required for each of the majors.

Individual Graduation Plan (IGP)

The purpose of the Individual Graduation Plan (IGP) is to assist the students and their families in exploring educational and professional possibilities, and in making appropriate secondary and post-secondary decisions. The IGP is part of the career planner. It builds on the coursework, assessments and counseling in middle and high school. The IGP is not intended to reflect all aspects of the high school experience.

Developing the IGP

School counselors begin working with students regarding interests, clusters of study, majors, post-secondary choices and high school options through individual and group counseling in the sixth grade. This includes information on academic and professional goals, career activities and access to career resources. Teacher and parental involvement throughout this process is vital. A sample is included in Appendix D.

Sixth Grade

- Students complete a career interest inventory.
- Students participate in career exploration activities.

Seventh Grade

- Students continue career exploration activities.
- Students have the opportunity to participate in career shadowing.

Eighth Grade

- Students choose a school of study that they would like to explore.
- Working with their parents, counselors, and teachers, students begin developing an IGP to include academic as well as professional-related courses.

Ninth Grade

- Students choose a cluster of study to explore.
- Students may declare a major, focusing their elective choices in a particular area.*
- Students have the opportunity to participate in career shadowing.
- Students review and update their IGP developed in the eighth grade.

Tenth Grade

- Students declare a major if they have not done so in the ninth grade.*
- Students have the opportunity to participate in extended learning opportunities.
- Students review and update their IGP.
- Students begin to develop post-secondary goal

Eleventh Grade

- Students review and update their IGP with particular attention being given to post-secondary goals.
- Students have the opportunity to participate in extended learning opportunities.

Twelfth Grade

- Students complete requirements for a major.
- Students have the opportunity to participate in extended learning opportunities.
- Students receive recognition for completion of a major at graduation.

Students are never locked into a specific cluster or major. Students can change majors if their professional interests change. They can use the curriculum framework, with its schools of study, clusters of study and majors, and career assessment information in making these decisions.

In order to graduate with a major, students must complete four units of study from the offerings identified on district templates. Complementary courses are drawn from both academic and profession-related courses that support the major. Complementary courses are chosen based on their reinforcement of the skills students must master relative to the major. Students are encouraged but not required to enroll in complementary courses.

The IGP identifies learning experiences outside the classroom designed to make learning relevant and to give students and awareness of work associated with the major. Examples of extended learning opportunities include shadowing, career mentoring, service learning, internships, cooperative education, apprenticeships, senior projects, career information delivery system exposure and career-related student organizations.

The IGP lists sample careers for that profession. The professional opportunities shown are a short list of the many occupations available in each specific area. The occupations are grouped by educational categories: high school diploma, two-year associate degree, and four-year degree or higher.

Support Resources for Planning

The school district provides a variety of assessments to assist students in their educational and career decisions. This information is helpful to students as they develop and revise their IGPs.

Career Information Delivery Systems

Each high school provides at least one computerized Career Information Delivery System (CIDS) for student access. The system is available for student use through any computer in the school. Students have the

opportunity to access a tremendous amount of career and post-secondary information to assist them in their planning for high school and beyond.

The World Wide Web

The Internet is an excellent resource for students as they prepare for their future. Information about helpful Web sites is available through the school guidance office.

SCOIS

The South Carolina Occupational Information System (SCOIS) is a computer-based system of up-to-date career, educational and occupational information. Students may complete interest inventories and explore more than 1700 occupations. The college search feature includes all two-and four-year colleges and universities in the United States. Other features include a course planner and a scholarship search.

PSAT

The Preliminary Scholastic Aptitude Test/National Merit Scholarship Qualifying Test (PSAT, NMSQT) introduces students in the tenth and eleventh grades to the organization and question types found on the Scholastic Aptitude Test (SAT). Students gain test-taking skills and can use their PSAT results to predict their scores on the SAT. The junior year scores are also used in selecting semifinalists for the National Merit Scholarship awards. PSAT also provides individualized study guides, college planning, career information and interactive assessments for students who take the test.

ASVAB

The Armed Services Vocational Assessment Battery (ASVAB) is a multi- aptitude test battery known as the Career Exploration Program administered by the Department of Defense to eleventh and twelfth graders. The ASVAB comprises ten individual tests and gives composite scores in verbal, math and academic ability. The test is given by the military and is free to high school students. The ASVAB Career Exploration Program is a tool to help students make better school and career decisions. There is a workbook that contains a career interest inventory and an exercise to help students learn more about occupations and how to match their interests and abilities to certain occupations. The ASVAB is available through the high schools and local military recruiter. Although students who plan to enter the military are required to take the ASVAB, information gained from this career assessment is beneficial to any student.

COLLEGE PLANNING

College Admissions Factors

Students planning to attend a four-year college should begin considering these factors as early as eighth grade and plan their high school program accordingly.

1. Select coursework that meets college entrance requirements.
2. Choose courses at the instructional level that helps you reach your potential and prepare for college/career goals. Colleges pay close attention to the strength of the student's high school schedule. Therefore, take the most difficult courses in which you can be successful.
3. Determine the required courses for your intended college major.
4. Remember that grade point average, class rank, and SAT or ACT scores are all used to determine college acceptance. Entrance requirements vary among colleges. Therefore, read college catalogs and talk with college admissions counselors concerning specific requirements and scores for the college(s) in which you are interested.
5. Be aware that extracurricular and leadership activities and/or work experience may also influence your admission.

Choosing the Right College

1. Evaluate your strengths and abilities. Examine your choice of lifestyle. Utilize information about colleges/careers in the guidance office and library.
2. Take the PSAT your sophomore year and take the PSAT again in your junior year. The test will place you on a mailing list for college information. The PSAT in the junior year also serves as the National Merit Scholarship qualifying test.
3. Take the SAT or ACT in the spring of your junior year.
4. Draw up a list of schools to investigate, based on your personal goals. SCOIS is good resource for exploration. This computer-based career information delivery systems is available on any district-networked computer in your high school.
5. Determine requirements for admission and costs for each school on your list.
6. Arrange for college visits. When visiting, talk with admissions counselors and financial aid officers.
7. Fine-tune your list.
8. Ask for teacher/counselor recommendations.
9. Submit applications through the guidance office or online.
10. Apply for financial aid or scholarships. Do not rule out smaller private colleges due to costs.

College Preparatory Course Prerequisite Requirements

For freshmen entering college beginning in Academic Year 2019-2020, the South Carolina Commission on Higher Education (CHE) established the minimum course requirements for students who plan to attend a 4-year public college in South Carolina. Some colleges require courses in addition to those listed below (see college catalogues for admission requirements). **Note: The Commission on Higher Education requirements may be adjusted at a later date to reflect changes in diploma requirements.**

FOUR UNITS OF ENGLISH: All four units must have strong reading (including works of fiction and non-fiction), writing, communicating, and researching components. It is strongly recommended that students take two units that are literature based, including American, British, and World Literature.

FOUR UNITS OF MATHEMATICS: These units must include Algebra I, Algebra II, and Geometry. A fourth higher-level mathematics unit should be taken before or during the senior year.

THREE UNITS OF LABORATORY SCIENCE: Two units must be taken in two different fields of the physical, earth, or life sciences and selected from among biology, chemistry, physics, or earth science. The third unit may be from the same field as one of the first two units (biology, chemistry, physics, or earth science) or from any laboratory science for which biology, chemistry, physics and/or earth science is a prerequisite. Courses in general or introductory science for which one of these four units is not a prerequisite will not meet this requirement. It's strongly recommended that students desiring to pursue careers in science, mathematics, engineering or technology take one course in all four fields: biology, chemistry, physics, and earth science.

TWO UNITS OF THE SAME WORLD LANGUAGE: Two units with a heavy emphasis on language acquisition.

THREE UNITS OF SOCIAL SCIENCE: One unit of U.S. History, a half unit of Economics, and a half unit of U.S. Government are required. World History or Geography is strongly recommended.

ONE UNIT OF FINE ARTS: One unit in appreciation of, history of, or performance in one of the fine arts. This unit should be selected from among media/digital arts, dance, music, theater, or visual and spatial arts.

ONE UNIT OF PHYSICAL EDUCATION OR ROTC. One unit of physical education to include one semester of personal fitness and another semester in lifetime fitness. Exemption applies to students enrolled in Junior ROTC and for students exempted because of physical disability or for religious reasons. (Credit for Physical Education 1 may be available through Marching Band beginning in the 2019-2020 school year; please check with your guidance counselor to confirm.

TWO UNITS OF ELECTIVES: Two units must be taken as electives. A college preparatory course in Computer Science (i.e., one involving significant programming content, not simply keyboarding or using applications) is strongly recommended for this elective. Other acceptable electives include college preparatory courses in English; fine arts; World Languages; social science; humanities; mathematics; physical education; and laboratory science (courses for which biology, chemistry, physics, or earth science is a prerequisite).

Note:

1. Foundations in Algebra and Intermediate Algebra may count together as a substitute for Algebra 1. Students who complete both courses will be awarded two math credits. There are no other substitutions for required math courses.

2. Each institution may make exceptions in admitting students who do not meet all of the prerequisites, limited to those individual cases in which the failure to meet one or more prerequisites is due to circumstances beyond the reasonable control of the student.
3. The College Preparatory Course Prerequisite Requirements are minimal requirements for four-year public college admission. Therefore, students should check early with colleges of their choice to plan to meet additional high school prerequisites that might be required for admission and to prepare for college entrance examinations.
4. Students should prepare themselves for college-level work by enrolling in challenging high school courses, such as honors, Advanced Placement (AP), International Baccalaureate (IB), and Dual Credit (DC) courses. Please remember that students and their families will need to work with the colleges of their choice to determine how AP, IB, or DC courses will transfer in or be counted for graduation credits at the colleges of their choice.
5. It is the responsibility of each school district to disseminate this set of requirements to entering freshmen students interested in pursuing a four-year college degree in South Carolina upon graduation from high school and to provide the web address for their viewing: <http://www.che.sc.gov/Students,FamiliesMilitary/LearningAboutCollege/CollegeAwareness,PreparationAccess.aspx>
6. This revision of the College Preparatory Course Prerequisite Requirements shall be fully implemented for students entering high schools beginning Fall 2015 and colleges and universities as freshmen beginning in Fall 2019. In the interim period, the 2011-12 version of the Prerequisites (approved by the Commission on Higher Education on October 5, 2006) remains acceptable.
7. The next revision cycle should begin in Fall 2020.

Policy originally approved by the SC Commission on Higher Education on April 7, 1983, and revised May 7, 2015.

ACT

The American College Testing Assessment (ACT) and the Scholastic Aptitude Test (SAT) are tests used by college admission offices and scholarship selection committees as one of several indicators of students' potential to complete college level work successfully.

The ACT provides a measure of how well students can perform the skills necessary for college coursework. The ACT Assessment measures these skills in English, mathematics, reading and science reasoning. An optional writing test is also available. These areas are tested because they include the major areas of instruction in most high school and college programs.

Each of the ACT subtests is scored on a scale of 1 to 36. The optional writing test is also scored on a scale of 1 to 36. The composite score is derived from the four required subtests of English, mathematics, reading and science reasoning.

A composite of 24 on the ACT is comparable to a total score of 1100 on the Verbal and Math portions of the SAT.

SAT

The SAT (Scholastic Aptitude Test) is some college readiness test students who plan to go to college should take in the spring of their junior year and/or the fall of their senior year. The new SAT, offered first in the Spring of 2016, includes a Reading Test, Writing and Language Test, and a Math Test, with an optional essay component. The first three required sections take 3 hours, and the optional essay is an additional 50 minutes. Students should attempt to answer all questions since the scoring is based only on correct answers.

The reading and writing sections of the test focus on determining the meaning of words in context of reading passages; interpreting reading passages, tables, charts, and graphs; using evidence to analyze sentences and paragraphs. Math sections focus on problem solving, algebra, and advanced equations.

Students applying to York Technical College or other 2 year programs will be required to take placement tests. For additional requirements, please contact the individual institutions.

For more information on the new SAT, go to <https://collegereadiness.collegeboard.org/sat/inside-the-test/key-changes>.

Please see your guidance counselor to ensure that you meet the requirements to take the ACT or SAT.

COMPASS

Two-year technical colleges require different placement tests, not the ACT or SAT. The main purpose of the placement test is to help students identify strengths and needs, and to build a solid plan for success. **The primary test used by York Technical College is COMPASS.** The COMPASS (Computer-adapted Placement Assessment and Support Services) test measures skills in reading, English and mathematics. COMPASS is available on the York Technical College campus for a fee.

Educational Lottery Scholarships

General Eligibility Criteria Scholarships and Grants

To be eligible for South Carolina Scholarships and Grants, students:

- Must be a South Carolina resident,
- Must be a U.S. citizen or legal permanent resident,
- Must be enrolled as a degree-seeking student at an eligible South Carolina public or independent institution,
- Must not owe a refund or repayment on any State or Federal financial aid and not be in default on a Federal student loan, and
- Must not have been convicted of any felonies and not have been convicted of any second or subsequent alcohol/drug-related misdemeanor offenses within the past academic year.

Note: All eligibility requirements are based on information available at the time of printing. If South Carolina requirements are revised, changes will be made on the online version of this document until new catalogs are printed.

Palmetto Fellows Scholarship

The South Carolina General Assembly established a Palmetto Fellows Scholarship Program in 1988 to retain academically talented high school graduates in the state through awards based on merit. Eligible full-time students may receive up to \$6,700 each academic year toward the cost of attendance at an eligible four-year institution in South Carolina for a maximum of eight terms. Amounts may vary based on legislative funding. For current information see <http://www.che.sc.gov>.

Initial Eligibility Requirements (Early Awards): Applications for early awards must be submitted to the Commission on Higher Education for the Palmetto Fellows Scholarship by the date established in December each academic year. High school seniors may apply if they meet one of the two following academic requirements:

- Score at least 1200 on the SAT or 27 on the ACT by the November test administration, earn a minimum 3.50 cumulative GPA using the SC Uniform Grading Policy (UGP) at the end of the junior year, and rank in the top six percent of the class at the end of either sophomore or the junior year.
- Score at least 1400 on the SAT or 32 on the ACT by the November test administration and earn a minimum 4.00 cumulative GPA using the SC Uniform Grading Policy (UGP) at the end of the junior year.

Students cannot use these criteria to meet final award criteria.

Final Awards: Applications for final awards must be submitted to the Commission on Higher Education for the Palmetto Fellows Scholarship by the date established in June each academic year. High school seniors may apply if they meet one of the two following academic requirements:

- Score at least 1200 on the SAT or 27 on the ACT by the June national test administration of the senior year, earn a minimum 3.50 cumulative GPA using the SC UGP at the end of the senior year, and rank in the top six percent of the class at the end of the senior year.
- Score at least 1400 on the SAT or 32 on the ACT by the June national test administration and earn a minimum 4.00 cumulative GPA using the SC UGP at the end of the senior year.

Palmetto Fellows Scholarship awardees must not be a recipient of the LIFE, HOPE or Lottery Tuition Assistance.

Life Scholarship

The South Carolina General Assembly established the Legislative Incentives for Future Excellence (LIFE) Program in 1998 to increase access to higher education, improve employability of South Carolina's students, provide incentives for students to be better prepared for college, and encourage students to graduate from college on time. Eligible full-time students may receive the following awards.

Four Year Colleges: Up to \$5,000 (including a \$300 book allowance) each academic year towards the cost of attendance at an eligible four-year institution in South Carolina; **Initial Eligibility:** Students must meet two of the following three criteria:

1. Earn at least a 3.0 cumulative GPA based using the UGP upon high school graduation.
2. Rank in the top 30 percent of the graduating class.
3. Score at least 1100 on the SAT or 24 on the ACT through June of the senior year. Only the math and critical reading scores of the SAT may be included.

Two Year Colleges: Up to the cost of tuition plus a \$300 book allowance each academic year at an eligible two-year public or technical institution in South Carolina. **Initial Eligibility:** Students must graduate from high school with at least a cumulative 3.0 GPA using the UGP.

Students must be South Carolina residents at the time of graduation and college enrollment. LIFE scholarship awardees may not be recipients of Palmetto Fellows, HOPE or Lottery Assistance. Colleges and universities may charge additional fees not covered by the Life Scholarship. There are no applications for LIFE or HOPE Scholarships. Eligible institutions notify students if they qualify for the Scholarship.

The Enhanced Life and Palmetto Fellows Scholarships

The South Carolina General Assembly has passed legislation that enhances the value of the Palmetto Fellows and LIFE Scholarship awards for students majoring in science and mathematics related disciplines. Eligible students for the Enhanced Palmetto Fellows may receive up to \$10,000. Enhanced LIFE scholarship students may receive \$7500. These awards begin after the completion of 30 college credit hours, declaration of an eligible major and fourteen credit hours in math and science courses. The student must also meet the basic requirements for the LIFE and Palmetto Fellows Scholarships. **Note: As a result of the complexity of these new regulations, it is recommended that parents and students check the eligible majors at <http://www.che.sc.gov>.**

Hope Scholarship

The South Carolina HOPE Scholarship Program was established under the South Carolina Education Lottery Act in 2001. It is a one-year, merit-based scholarship created for eligible first-time entering freshmen attending an eligible four -year institution in South Carolina. Eligible full-time students may receive up to \$2,800 (including a \$300 book allowance) toward the cost of attendance for a maximum of two terms.

Initial Eligibility Requirements:

- Earn a cumulative 3.0 GPA using the South Carolina Uniform Grading Policy upon high school graduation.
- Reside in South Carolina at the time of high school graduation and college enrollment.
- Not be a recipient of the Palmetto Fellows Scholarship, LIFE Scholarship or Lottery Tuition Assistance, and meet all general eligibility criteria.

There are no applications for LIFE or HOPE Scholarships. Eligible institutions notify students if they qualify for the Scholarship.

ADVANCED STUDY OPPORTUNITIES

Students in Rock Hill Schools have three challenging advanced curricular opportunities in the junior and senior years. Each program has its own unique characteristics and advantages for college level coursework. Students should consider the merits of all programs to determine which one is right for them.

International Baccalaureate

The International Baccalaureate Diploma Program is a two-year, academically challenging and balanced program that equips students for success at university and life beyond, preparing them to become creative problem-solvers and lifelong independent thinkers, equipped to succeed in a rapidly changing and increasingly global society. The program offers a holistic approach to educating students, which it achieves through both challenging coursework and additional core learning opportunities.

Details on the IB courses offered can be found in the course description portion of the course catalog. In the IB Diploma Program curriculum, students take one course from each of the six groups:

- Language and Literature
- Language acquisition (second language)
- Individuals and Societies (social studies)
- Sciences
- Mathematics
- The Arts (can be substituted for an additional course from the groups above)

In addition to the six IB courses, IB Diploma students complete the following three core components:

- Theory of Knowledge (TOK): An interdisciplinary course that encourages students to think about the nature of knowledge, to reflect on the process of learning in all of their IB subjects, and to make connections across them with an appreciation of other perspectives,
- Extended Essay (EE): An independently directed research paper, with support from a supervisor, which enables students to investigate a personally-chosen topic of interest, and develop the skills of research and writing that will be expected at universities, and
- Creativity, Activity, Service (CAS): Involvement in experiential learning through a range of artistic pursuits, sports, and community service activities to foster students' awareness and appreciation for life beyond the academic arena.

There are fees associated with taking IB classes/exams.

What Makes IB Unique?

- Develops thinking, communication, social (collaboration, etc.), self-management and research skills
- Values various ways in which students can demonstrate what they know
- Taught through international perspectives
- Student-centered approach
- Develops the “whole” student, not just the academic
- Highly regarded academic program

Who Should Participate in the IB Diploma Program?

- Motivated, determined and committed students
- Students willing to challenge themselves academically
- Students who want to prepare themselves with the skills necessary for success at university, with the possibility of earning advanced standing and/or college credits

What International Baccalaureate courses are available?

Please note that course offerings are enrollment-dependent; therefore, every course may not be available at every high school. Some of the available IB courses include the following. Please speak to your school’s IB Coordinator or your guidance counselor to discuss the full range of courses and opportunities.

- Language A—English 4 and English 5 Higher Level IB Course
- IB US History and History of the Americas Higher Level IB Course
- Math Studies or Math SL Standard Level IB Courses
- IB Biology or IB Chemistry Higher Level IB Courses
- Spanish or French Standard Level IB Courses
- Sixth Subject Options include: Music, Information Technology for a Global Society
- Theater
- Psychology

Advanced Placement

The Advanced Placement (AP) Program affords students the opportunity to engage in challenging and thought-provoking courses around a designated area of interest or strength for the student. While there are a wide variety of AP courses offered in the district, the AP coursework is not designed to be a connected or integrated program of study.

AP courses allow students to delve deeply into the content and knowledge of a particular course. Student mastery of

the content is measured by both multiple choice and essay questions. All AP courses, in general, emphasize strong writing and communication skills as well as critical and analytical thinking skills within the discipline. Universities across the United States recognize Advanced Placement courses as one of the best high school preparatory programs for college coursework and may award advanced standing in those courses based on the students’ performance on the national AP exams. AP courses are weighted 1.0 quality points above college preparatory courses. Fees may be associated with taking AP courses if the course is paired with a dual credit course.

What Makes AP Unique?

- Students can choose specific AP courses around an area of strength or interest.
- Students explore a depth and breadth of knowledge within a specific content.
- Student performance is measured by nationally standardized assessment rubrics.
- Students get to explore the content area with other similarly interested students.

- Students are exposed to college level reading, writing, and critical thinking.
- AP is well-known and strongly regarded by highly selective public and private colleges.

Who Should Participate in AP Courses?

- Students who have challenged themselves in Advanced/Honors courses in grades 6-10
- Motivated students who can learn new information quickly and apply it analytically
- Students who have maintained at least a “B” average in the content area of the designated AP course
- Students who are self-starters, organized, and curious about a subject
- Students seeking advanced standing in public and private universities both in and out of state (college credit based on AP exam results)

What Advanced Placement courses are available?

Please note that course offerings are enrollment-dependent; therefore, every course may not be available at every high school. Some of the available IB courses include the following. Please speak to your school’s AP Coordinator or your guidance counselor to discuss the full range of courses and opportunities. AP Language and Composition

- AP Literature
- AP American History
- AP European History
- AP Statistics
- AP Biology
- AP Chemistry
- AP Computer Science
- AP Art
- AP Spanish
- AP Macroeconomics
- AP Government and Politics
- AP Psychology
- AP Environmental Science
- AP Calculus AB
- AP Calculus BC
- AP Human Geography

Dual Credit

The Rock Hill Schools dual credit program is designed to offer college course experiences for students planning to attend a 4-year university or 2-year technical college. All courses within the Dual Credit Program have dual credit articulation agreements with public universities and technical colleges in South Carolina. Dual credit means that students can earn high school and college credit at the same time during their high school program. Some dual credit courses are “college transfer” courses to a 4-year university, while others are transferable within technical college programs only. Private universities (both in and out-of-state) and public out-of-state universities may not accept these courses for any credit. These courses carry a 1.0 quality point weighting over college preparatory courses.

All dual credit courses offered on Rock Hill Schools campuses are dependent upon the district having teachers who meet the subject specific qualifications of the credit-awarding institution and sufficient enrollment in the course. When these criteria are not met, courses may lose the dual credit articulation.

What makes dual credit unique?

- Students in both college preparatory and technical preparatory classes may be eligible for dual credit courses.
- College credit, which many SC public universities honor, is granted for passing the course with a C. Students should check with specific colleges for more information.
- Some courses are offered at the high school and others are offered on the college campus.
- There are numerous dual credit courses outside the mainstream course offerings.
- Grades earned in dual credit courses become part of the student’s college transcript.

Who should participate in dual credit courses?

- Motivated college preparatory students seeking college transfer courses to a 4-year in-state public university
- Motivated students seeking an Associate Degree at a technical college
- Students who have finished the advanced program during grades 9 and 10 but who need an additional challenge in the junior and senior year
- Students interested in a post-secondary major within a field of study offered in the dual credit courses
- Students who are 16 years old and have a 3.0 GPA on the Uniform Grading Scale

Are there fees and material costs?

Dual credit courses have an associated college fee that is less than the amount students would have to pay for a college course after high school. Students who want to enroll in the dual credit options must agree to pay the fee, complete the necessary application or registration paperwork, and purchase any required textbook or designated materials outlined by the credit-awarding institution. Fees are due at the beginning of the semester the student is enrolled in the course. Please see your guidance counselor for information about potential costs.

What is the process for enrolling in a dual credit course?

Courses may be completed at an institution of higher learning and count as dual credit at the high school upon completing the following process:

1. Student and parent meet with the high school counselor.
2. Student and parent complete district contract and get college approval.
3. Student and parent turn in signed form to counselor at the high school who signs and forwards to Director of Secondary Education at the district office for approval.
4. Once approved, all dual credit courses taken during the school day will be listed on the student's schedule for the semester taken.
5. Student must have college send transcript sent to the high school counselor upon completion of college course work.

Note: Students must take at least two courses at the home high school campus in addition to dual credit courses taken elsewhere. Taking the course on the college campus is always dependent upon the schedule at the high school matching the time the college class is offered.

Students must have prior approval of the high school to take any dual credit course or dual enrollment course not offered on a Rock Hill Schools campus. Please check with your guidance counselor for any required form(s). Dual credit courses accepted for credit in Rock Hill Schools must be approved by the Rock Hill Schools Board of Trustees. Current course descriptions for dual credit courses can be found in the appropriate school's course catalog.

Students must meet entrance requirements of the institution of higher education from which college credit is given. Requirements may include a completed application, GPA (generally a 3.0), possible work samples, and possible teacher recommendations.

Students may also be responsible for entrance or course fees as determined by the institution of higher education. Please see your high school guidance counselor for specifics regarding entrance requirements and/or fees prior to enrolling in dual credit.

Dual credit courses approved in Rock Hill Schools for the 2020-2021 school year are as follows:

Course (DC = Dual Credit)	USC-Lancaster Name/Code	York Technical College Name/Code	Winthrop Name/Code
DC Anatomy and Physiology 1	BIOL 243 Human Anatomy and Physiology I (3266CLEW)	BIO 210 Anatomy & Physiology I (3266YTEW)	NA

DC Digital Art and Design 4	NA	ARV 212 Digital Photography (6123YTEW) Note: YTC may also give credit for ARV 110 Computer Graphics.	NA

Dual Credit through Accelerate

Accelerate is an intensive engineering program that offers virtual synchronous and non-synchronous courses to tenth, eleventh, and twelfth-graders through the South Carolina Governor's School for Science and Mathematics (GSSM). Most courses provided through the program are conducted via live interactive video conferencing, and all classes are supplemented by in-person camps, day trips, and research opportunities. Unlike GSSM's residential students, Accelerate students remain at their home schools and complete program requirements in addition to their regular coursework. Depending on students' choice of college and major, Accelerate offers them the opportunity to receive as many as 49 semester hours of college credit prior to finishing high school.

In Rock Hill Schools, students have the opportunity to participate in the GSSM Accelerate program at South Pointe High School. Students must apply and be accepted to the program in order to participate. Students who do not meet all requirements initially may be invited into the associated TEAM UP program in order to join their Accelerate cohort in the eleventh grade year.

Please see <https://www.scgssm.org/accelerate> for more information about the program or contact your school guidance counselor.

See below for sample York Technical College dual credit program of study leading to an Associate degree within one year of high school graduation. Multiple YTC pathways are available; please speak with your guidance counselor about options.

Rock Hill School District & York Technical College Dual Credit Patient Care Technician Program

Earn Credits Toward Your College Degree While Still in High School

Rock Hill School District and York Technical College have partnered to offer a highly advanced Patient Care Technician dual credit program. The program is available to Rock Hill School District High School students through the Applied Technology Center (ATC) and allows them to take college level technology classes during their junior and senior years. Students will be able to complete an Associate in Applied Science Degree within one year after high school graduation and transition seamlessly to the workforce.

Patient care technicians are multi-skilled healthcare providers, with training in basic patient care, blood collection, and electrocardiography. Under the supervision of nursing and medical staff, patient care technicians are employable in a variety of settings such as hospitals, clinics, long-term care facilities, laboratories, and physicians' offices. Nursing assistant training (AHS 117) will introduce basic patient care skills, and prepare the student for state certification through the Department of Health and Human Services, earning the title of Certified Nursing Assistant (CNA). Certification is required to progress through the Patient Care Technician program. The 2016 median salary for a Patient Care Technician graduate is \$31,540 per year (US Dept. of Labor & Statistics). For more information, contact your high school counselor or dualenrollment@yorktech.edu.

Program: Patient Care Tech/Clinical Studies – Sample Schedule (32 students each year – 16 each semester)

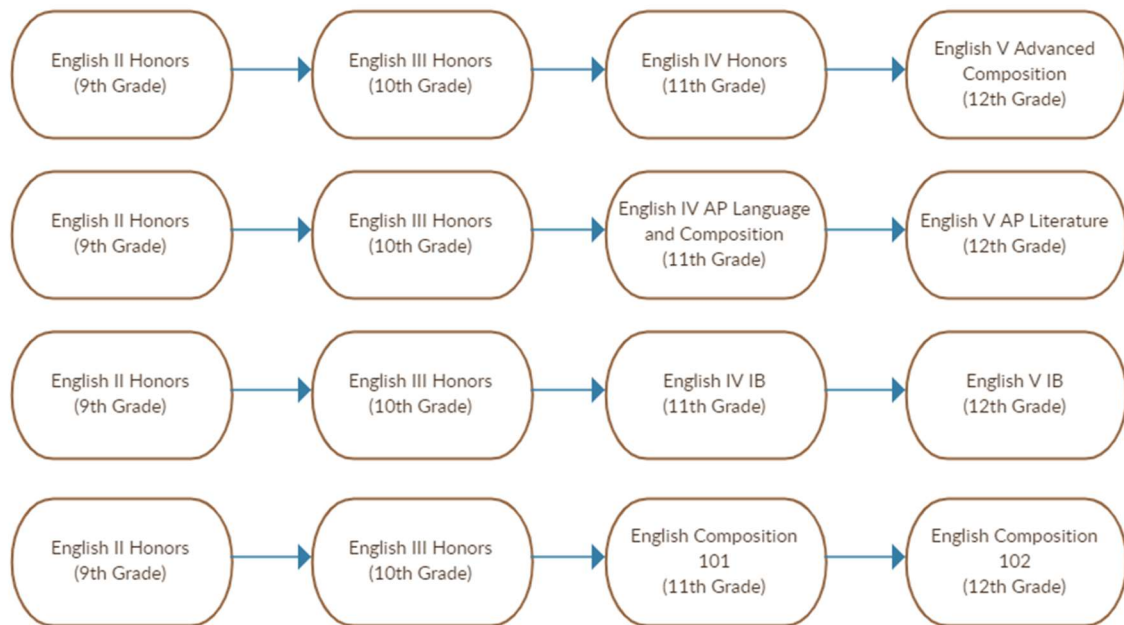

Courses	Semester: FALL Grade/Yr 11, Location	Semester: SPRING Grade/Yr 11 Location	Semester: FALL Grade/Yr 12 Location	Semester: SPRING Grade/Yr 12 Location		Semester: FALL Freshman Location YTC	Semester: SPRING Freshman Location YTC	
Math & Science	BIO 210 High School or YTC Anatomy and Physiology I (4)				High School Graduation	MAT 155 Contemporary Mathematics (3)	AOT 134 Office Communications (3)	York Technical College Graduation

Core Class		AHS 116 YTC Patient Care Relations (3)	AHS 117 ATC The Care of Patients (4)	AHS 145 YTC Electrocardiography (2)		AOT 110 Document Formatting (3)	AOT 267 Integrated Information Processing (3)	
Core Class	AOT 105 YTC Keyboarding (3)	AHS 102 ATC Medical Terminology (3)	AHS 120 ATC Responding to Emergencies (2)	AHS 176 YTC Patient Care Clinical Principles (4)			HIM 130 Billing & Reimbursement (3) Elective (2)	
Total Credit Hours	8.0	6.0	6.0	9.0		15.0	17.0	

Credentials Completed & When: Patient Care Technician Certificate – End of 12th grade year, General Technology Degree – One year after graduation from high school. Accuplacer scores: Arithmetic 90 and Elem. Algebra 57 or greater, Sentence Skills 75 or greater, Reading Comp. 84 or greater.

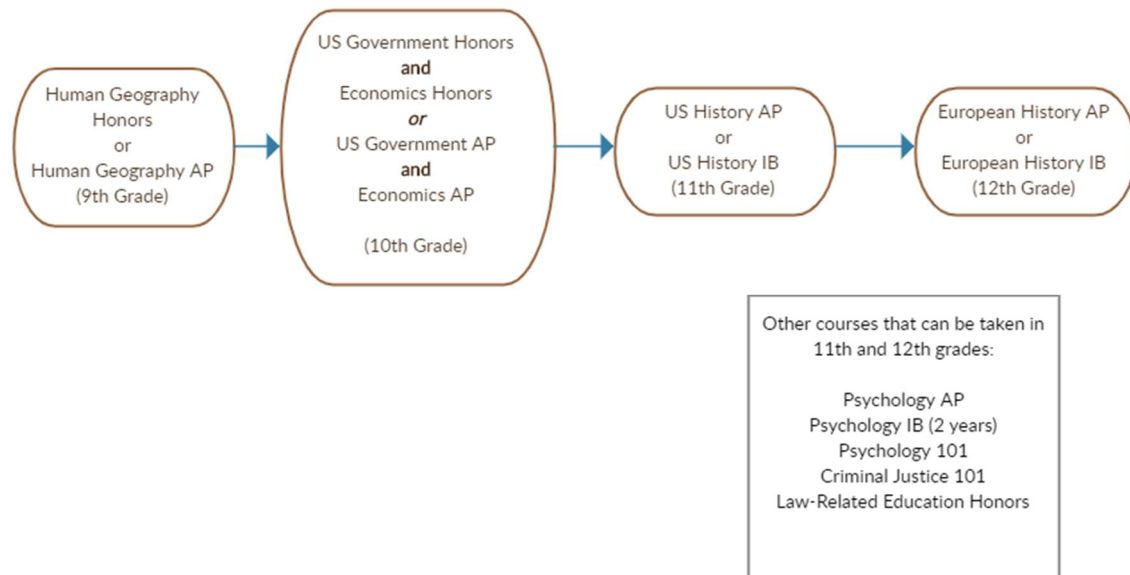

Advanced Studies Summary

	International Baccalaureate	Advanced Placement	Dual Credit
Unique Features	Diploma or course program that offers core and elective courses that are integrated. Also includes Creativity, Activity, and Service components. Exam scores and policies of the college the student applies to will determine if college credit may be awarded.	Individual courses that allow students to pursue their particular field(s) of interest. Exam scores and policies of the college the student applies to will determine if college credit may be awarded.	Individual courses that allow students to pursue their particular field(s) of interest. Passing grade of C in the course and policies of the college the student applies to will determine if college credit may be awarded.
Enrollment Requirement	Must have taken pre-requisite honors courses in ninth-tenth grades.	Must have taken pre-requisite courses.	Must be 16 years old and have a 3.0 GPA on the Uniform Grading Scale.
Grade Level	Eleventh-twelfth grades	Ninth-twelfth grades	Age 16 and tenth grade minimum
Exams	International exams and internal assessments are used to help determine college credit and eligibility for IB diploma.	National exams are used to determine college credit.	Final exams in the course are school-based, and do not by themselves determine college credit. Course grade determines eligibility for credit.
Credit Options	Varies by college if student scores 4 or higher on course exams	Varies by college if student scores 3 or higher on course exams	May receive college credit if student earns a C in the course. Transfer of the credit to another college is determined by the school the student attends after high school.
Cost	No charge for the course. Part of the exam fees are paid by the district. Students are required to pay a portion of these funds. See school IB Coordinator for details.	No charges for course or exams. Exams are paid for by the district.	Fees are determined by each college, but may be free within certain parameters. See school guidance counselor for details.

NON-TRADITIONAL PROGRAMS

Purpose

Sometimes students in high school need a different path to graduation. Alternative programs help students to get ahead, catch up in courses, or re-take failed courses. Students should evaluate the options among the alternative programs to select the right individual path.

Rock Hill Schools offers three alternative programs in the high school designed to meet the specific needs of distinct populations. Parents and students may obtain descriptive information about each program below. Additional information is provided by the high school guidance counselor upon request.

VirtualSC

Virtual SC offers motivated students on-line courses that meet their learning styles.

Through the Virtual SC Program, students can...

- take a class for initial credit,
- retake a class previously failed,
- take classes for personal enrichment or to get ahead, and/or
- access coursework anywhere Internet is available.

Please see www.virtual.sc.org for more information.

Phoenix Academy

The Phoenix Academy consists of two flexible learning environments designed to provide support and motivation for academic success: Phoenix and Phoenix Fast Track. All offer the following opportunities for students:

- Individual planning
- Flexible scheduling
- Self-paced/mastery-based learning
- Rigorous instruction

Students who desire a more flexible and/or tailored academic plan for obtaining high school credits should consider attending Phoenix Academy either part-time or full-time. It is an ideal environment for students who are credit deficient, who have scheduling conflicts with courses at the high school, who are in AP or IB programs and desire to take additional courses, or who desire the opportunity to graduate early.

Both elective and core classes are offered through Phoenix Academy. The elective courses offered include Creative Writing, Expository Writing, Financial Literacy, Psychology, Sociology, Health and Physical Education. Please contact your assigned high school or middle school guidance counselor for additional information about the Phoenix Academy day and evening programs.

Note: Phoenix Academy core classes that are self-paced are not approved for credit through the National Collegiate Athletic Association.

Renaissance Academy

The Renaissance Academy offers district students with minor to moderate disciplinary infractions an alternative environment in which to learn and to earn high school credits. Renaissance Academy utilizes a restorative approach to build positive relationships that are integral to creating a healthy school climate. Students may be referred to Renaissance Academy by their principals, the district hearing officer, and/or the Office of Student Services. Students are invited to apply before their educational opportunities have been removed due to discipline in the schools or charges in the community. Students who have been expelled cannot attend Renaissance Academy. Students may transition back to the traditional high school setting if academic and behavioral issues are successfully met in the alternative setting.

The Renaissance Academy offers students:

- A temporary yet highly structured learning environment that fosters social, emotional, and academic development for students in grades 9 through 12;
- A small nurturing school setting where individualized instruction is focused on three/four courses with a student-teacher ratio of 15:1;
- A self-paced curriculum in both core academic and elective courses that are needed to attain a high school diploma; and
- Frequent career and social counseling that focuses on goal-oriented behaviors rather than destructive behaviors.

Note: Renaissance Academy courses are not approved for credit through the National Collegiate Athletic Association.

ENGLISH LANGUAGE ARTS

All high school students are required to take one English course each year. Four Carnegie units earned in English courses are required for high school graduation. Students must pass English courses in sequence. AP and IB courses are listed in this section, but please see the dual credit listing under Advanced Studies Opportunities for information related to approved dual credit courses.

- **English Learning Lab** (*Elective credit in English*)

English Learning Lab is designed to provide academic support for students who have not met the standards in language arts. Students are placed in this class based on their performance on the MAP assessment. Students work on assignments in class and in the computer lab which are designed to strengthen the basic skills they need to be successful in their other English classes.

- **English 1**

302400CW

Stresses reading comprehension strategies, vocabulary development, and literary elements of short stories, poetry, drama, novel, and the epic. Compositions include narrative, expository, technical, creative, and reflective models in which students learn to inform, explain, analyze, and entertain. Research around a topic related to the readings will culminate in a mini-research paper. The emphasis on grammar as it relates to student writing will include an intense study of sentence patterns, sentence structure, usage, and mechanics. Argumentative writing is also a focus.

- **English 1 with English 1 Essentials**

302405CW

- **English Essentials course**

309941CW

Targets ninth grade students who need a combination of English 1 and English 1 Essentials in order to bolster reading and writing skills and provide extra time to complete English 1 standards. All grade level English 1 standards will be taught along with the English Essentials curriculum, including reading process and comprehension, analysis of text, word study, writing processes, and communicating through speaking, listening, and viewing. Special emphasis will be placed on reading and writing competencies. Pre-writing, writing, and editing strategies will play a prominent role in this course. Students who earn a 192-214 on the district Spring MAP test in eighth grade will be recommended for this course. Class sizes are small and instruction is targeted to students' individual needs. This combination class will be scheduled year-long. Students will earn one English credit and one English elective credit.

- **English 2 with English 2 Essentials**

302505CW

- **English 2 Essentials**

309942CW

PREREQUISITE: English 1.

Students will be placed in these two courses by teacher recommendation.

Targets tenth grade students who need a combination of English 2 and English 2 Essentials in order to bolster reading and writing skills and provide extra time to master English 2 standards. All grade level English 2 standards will be taught including, analysis of literary texts and informational texts, word study, writing process and genre study, and research. The English Essentials curriculum will target instruction in word analysis, reading comprehension and text analysis, and application of the writing process. This combination class will be scheduled all year on an A/B schedule. Students will earn one English credit and one English elective credit. **A state End of Course test counts as 20 percent of the course grade.**

• **English 2**

302500CW

PREREQUISITE: English 1.

Examines reading comprehension strategies, vocabulary development, and literacy and structured analysis of poetry, drama, fiction, and non-fiction. Although the writing component emphasizes expository and argumentative writing, students will compose in a variety of formats including, but not limited to, personal writing, poems, skits, business letters, memos, persuasive essays, speeches, and resumes. Students will complete short- and long-term research assignments related to the readings including, but not limited to, presentations, research papers, and projects. Grammar will be integrated in student writing with a focus on mechanics, usage, and sentence formation. Students will continue to use the writing process to develop compositions. **A state End of Course test counts as 20 percent of the course grade.**

• **English 2 Honors**

302590HW

PREREQUISITE: English 1 in eighth grade with minimum average of 80.

Includes a study of the literary and structural elements of poetry, short stories, mythology, drama, nonfiction, and the novel. Composition includes essays and a research project. This course also provides an in-depth study of sentence patterns, sentence structure, usage, and mechanics. This course may be taught on an A/B day with the Honors Human Geography course at Northwestern and South Pointe High School. **A state End of Course test counts as 20 percent of the course grade.**

• **English 3**

302600CW

PREREQUISITE: English 2.

Analyzes the relationships among American literature, history and culture and includes the chronological or thematic study of American literature from the Colonial Period to the Twentieth Century. Students write in a variety of formats with an emphasis on argumentative writing. Students develop composition, research, vocabulary, and oral communications skills needed for college. A cited research product will be developed and must follow MLA format.

• **English 3 Honors**

302690HW

PREREQUISITE: English 2 Honors with minimum average of 80.

Includes a thematic study of American literature. Writing involves narrative, descriptive, and expository composition. Students develop speaking, listening, and research skills. A cited research product is required and must follow MLA format. Grammar skills are reviewed as needed.

• **English 4**

302700CW

PREREQUISITE: English 3.

Analyzes the relationships among British literature, history, and culture and includes the chronological or thematic study of British literature from A.D. 450 to the present. The course also involves a study of relevant historical background material and history of the English Language. Students write in a variety of formats with an emphasis on argumentative and persuasive writing. Students develop composition, research, vocabulary, and oral communication skills needed for college.

• **English 4 Honors**

302790HW

PREREQUISITE: English 3 Honors with minimum average of 80.

This course includes a thematic study of British literature in which historical knowledge will be applied. Reading, writing, and research assignments at this level include higher order thinking processes such as synthesis, reflection, and analysis. Students will make comparisons to modern-day works, analyze arguments, consider multiple perspectives and self-reflect on their own learning.

• **English 4 AP Language and Composition**

307100AW

PREREQUISITE: English 3 Honors with minimum average of 80.

College-level course that emphasizes the composition of argumentative, analysis, and synthesis essays, as well as the close reading of both non-fiction and fiction selections from British literature. Students develop skills in critical analysis of diction, syntax, and persuasive strategies. Additionally, this course extensively prepares

students for the writing portion of the SAT. State regulations require students to take the AP Language and Composition Examination. **This course is taught on an A/B schedule during the junior year and is paired with the AP US History Course.**

• **English 4 IB**

301B00IW

PREREQUISITE: English 3 Honors.

Begins a two-year course that encourages a personal appreciation of literature and develops an understanding of the techniques involved in literary criticism; develops the students' powers of expression, both in oral and written communication, and provides the opportunity of practicing and developing the skills involved in writing and speaking in a variety of styles and situations; introduces students to a range of literary works of different periods, genres, styles, and contexts; broadens the students' perspective through the study of works from other cultures and languages; develops the ability to engage in close, detailed analysis of written text; and promotes in students an enjoyment of, and lifelong interest, in literature. **It is taught on an A/B day and is paired with IB US History in the junior year.** The IB exam must be taken in the Senior year in order to receive IB credit.

• **English 5 AP Literature**

307000AW

PREREQUISITE: English 4 IB or English 4 AP Language and Composition.

Offers advanced work in literature and composition. Students study British and American fiction, poetry, drama, and nonfiction and write literary analyses of the literary works studied. State regulations require students take the AP Literature and Composition Examination. **This course is taught on an A/B schedule during the senior year and is paired with the AP European History Course.**

• **English 5 IB**

301C00IW

PREREQUISITE: English 4 IB.

Extends the skills developed in English 4-IB. This course emphasizes independent literary criticism and independent literary commentary of known and unknown works. Students will read works from a variety of other cultures. The course promotes clear expressions of ideas in both oral and written discourse. **It is taught on an A/B day and is paired with IB History of the Americas.** The IB exam must be taken in order to receive IB credit.

• **English 5 Advanced Composition**

303000HW

PREREQUISITE: English IV H with recommended grade of B.

This course is designed for students who desire instruction in college-level writing. Students write in a variety of rhetorical modes including cause/effect, comparison/contrast, analysis, and argumentation. In addition, the course provides an intensive study of rhetoric in multiple genres of texts. The course emphasizes critical reading, grammar, and vocabulary. Students will complete a research project, and complete parallel reading assignments.

Note: Dual credit introductory composition courses – English Composition 101 and 102 – are available. In addition to requirements of the colleges offering the courses, Rock Hill Schools requires students to have completed an English 4 course prior to enrolling.

ENGLISH LANGUAGE ARTS ELECTIVES

• English as a Second Language

First Semester 379950CW

Second Semester 379951CW

An elective credit that examines language development in speaking, reading, and writing through the study of developmentally appropriate fiction and non-fiction selections. The course will focus on developing strategies for reading comprehension, vocabulary, and writing fluency for emerging English speakers with a strong emphasis on oral and written communication skills appropriate for real-world settings.

• Survey of Young Adult Literature

309920CW

This course is designed to survey modern young adult literature. It will include a variety of novels, focusing on books that are relevant to current societal issues.

• Creative Writing 1

303200CW

HIGHLY RECOMMENDED: English 1 credit

Focuses on the study of creative writing by developing non-fiction, fiction, and poetry writing skills. The course involves detailed writing activities using poems, personal essays, and short stories.

• Creative Writing 2

303202CW

PREREQUISITE: Creative Writing 1.

Progresses to a highly sophisticated and intense study of writing nonfiction, fiction, and poetry that includes, but is not limited to, advanced poetic forms, plays, narratives, and essays. The class may also assist with the production of the school literary magazine.

SPEECH

• Speech and Communication

304000CW

Includes a study of basic public speaking for special occasions. Students will first study skills required for effective communication and then apply those skills to a series of speeches they will give in class. Instruction may also be provided to other speech-related skills such as preparing for job applications and interviews, group problem-solving, oral interpretation, critical listening, radio and television communication, and parliamentary procedure and debate.

JOURNALISM

• Journalism 1

305000CW

PREREQUISITE: B average in English recommended.

Covers the functions of modern media, the techniques of news-gathering and interviewing, and practical experience in each area of news-gathering (news, features, sports stories, editorials and columns, headlines, photography, layout, and advertisements). Students will analyze school, regional, and national media productions.

• **Journalism 2 - Newspaper Production**

First Semester 305100CW
Second Semester 305101CW

PREREQUISITE: Journalism 1 or Applied Technology Center Graphic Arts and Visual.

Communication courses. Covers the advanced study of writing, editing, photography, advertising, graphics, and design. This course also introduces students to broadcasting and public relations. This course involves the application of newspaper skills to organizing a newspaper staff and publishing school newspapers. **Teacher recommendation required following interview with presentation of sample(s) of writing, photography and/or visual communication.**

• **Broadcast Journalism**

305102CW

PREREQUISITE: Journalism 1 and teacher recommendation.

This course provides students with training in the areas of news writing, video production, radio production, and recording arts. Students are selected through an application and interview process. Members of the class will produce the morning show and work on other special projects related to journalism and public relations at the school level. **Teacher recommendation, interview, and presentation of sample(s) of work are required.**

• **Journalism 3 Honors - Newspaper Production**

309903HW

PREREQUISITE: Journalism 2 and teacher recommendation.

Covers the production of the newspaper. Students will provide training to other student staff members, edit peer work, serve as section editors, design layout, and lead staff meetings. **Teacher recommendation, interview, and presentation of sample(s) of work are required.**

• **Journalism 4 Honors - Newspaper Production**

309904HW

PREREQUISITE: Journalism 3 Honors and teacher recommendation.

This course will be offered to students who have completed Journalism 1, 2, and 3 have been recommended for this honors level newspaper class. Emphasis will be on developing effective leadership and decision-making skills that are grounded in the journalists' code of ethics and First Amendment law. Students will submit a portfolio assessment aligned with state and national standards.

Teacher recommendation, interview, and presentation of sample(s) of work are required.

• **Yearbook Production**

First Semester 305400CW
Second Semester 305401CW

PREREQUISITE: Application, interview and yearbook advisor approval.

Open to tenth-twelfth graders, the yearbook program incorporates aspects of mass communications and journalism including, but not limited to, interviewing, copywriting, copy editing, reporting, layouts, photography, digital editing, marketing, and financials. This course requires a significant amount of time and dedication outside the classroom as well as a strong sense of leadership, initiative, and teamwork. **Students must be enrolled in this course to be on the yearbook staff.**

MATHEMATICS

Four units for math are required for graduation. AP and IB courses are listed in this section, but please see the dual credit listing under Advanced Studies Opportunities for information related to approved dual credit courses.

• Foundations in Algebra

411600CW

The first course in a two-course sequence designed to prepare students for success in advanced mathematics courses by providing a foundation in algebra, probability, and statistics. This course builds on the conceptual knowledge and skills students mastered in earlier grades in areas such as algebraic thinking, probability, data analysis, and proportional reasoning. The Key Concepts in this course are quantities and expressions; function theory; linear equation, functions, and inequalities; rational functions; exponential functions; and probability. Because Foundations in Algebra is the first course in a two-course sequence, students who successfully complete Foundations in Algebra must subsequently enroll in Intermediate Algebra. Upon completion of the Foundations in Algebra/ Intermediate Algebra two-course sequence, students must take the state-mandated Algebra 1 End-of-Course assessment (Algebra 1 EOCEP) administered at the completion of the second course, Intermediate Algebra.

• Intermediate Algebra

411700CW

PREREQUISITE: Foundations in Algebra or final grade of D in Algebra 1.

The second course in a two-course sequence designed to prepare students for success in advanced mathematics courses by providing a foundation in algebra, probability, and statistics. Students must successfully complete Foundations in Algebra before enrolling in the second course, Intermediate Algebra. This second course builds on the conceptual knowledge and skills students mastered in Foundations in Algebra and introduces some Algebra 2 concepts such as complex numbers and rational functions. The Key Concepts in this course are: number and quantity; function theory; polynomials; quadratic equations and functions; radical functions; and statistics. Upon completion of the Foundations in Algebra/ Intermediate Algebra two-course sequence, students must take the state-mandated Algebra 1 End-of-Course assessment (Algebra 1 EOCEP) administered at the completion of the second course, Intermediate Algebra. **The state-mandated Algebra 1 End-of-Course assessment (Algebra 1 EOCEP) will be administered that will count 20 percent of the final grade.**

• Algebra 1

411400CW

The Algebra 1 course provides students the opportunity to develop fluency creating, interpreting, and translating between various forms of linear, quadratic, and exponential equations and functions. It includes the following mathematical concepts: real numbers, solving equations, word problems involving equations, operations of polynomials, factoring, algebraic fractions, applying algebraic fractions to word problems, functions, systems of linear equations, inequalities, graphing in a coordinate plane, operations using rational and irrational numbers, and quadratic functions with applications. **The state-mandated Algebra 1 End-of-Course assessment (Algebra 1 EOCEP) will be administered that will count 20 percent of the final grade.**

• Algebra 2

411500CW

PREREQUISITE: Algebra 1 or Intermediate Algebra.

In Algebra 2, students extend their repertoire of functions to include polynomial, rational, and radical functions. Students expand their abilities to model real-world situations, including solving quadratic equations involving complex numbers and solving exponential equations. It includes an extensive application of Algebra 1 skills and the following mathematical concepts: linear relations and functions, systems, functions, radicals, quadratics, polynomial/rational functions, conics, logs and exponents, and sequences and series.

• **Algebra 2 Honors**

411590HW

PREREQUISITE: Algebra 1 eighth grade with a grade of B or better recommended.

Honors Algebra 2 students study all the topics included in Algebra 2. They also study additional topics, like the Binomial Theorem. The course includes an intense study of the following mathematical concepts: linear relations and functions, systems, functions, radicals, quadratics, polynomial/rational functions, conics, logs and exponents, and sequences and series. The honors curriculum places an emphasis on critical thinking and inductive reasoning. Additional topics will be added by the instructor to enrich and prepare students for higher level mathematics in the AP and IB programs.

• **Geometry**

412200CW

PREREQUISITE: Algebra 1 or Intermediate Algebra.

Geometry students study congruence and similarity through analyses of transformations and formal constructions. They also study the properties of triangles and quadrilaterals, the Pythagorean Theorem, special right triangles, and right triangle trigonometry. Additional topics include circles, coordinate geometry, and area and volume of 2- and 3-dimensional shapes. Students develop formal proofs using a variety of formats. The course includes the basic elements of geometry: terminology, reasoning, proofs, angles, perpendicular and parallel lines, congruent triangles, triangle inequalities, polygons, similarity, right triangles, trigonometry, circles and spheres, area and volume, the coordinate plane, transformations, and tessellations.

• **Geometry Honors**

412290HW

PREREQUISITE: Algebra 2 Honors.

Honors Geometry students study all the topics included in Geometry (such as congruence and similarity, properties of triangles and quadrilaterals, the Pythagorean Theorem, and the development of formal proofs). Honors students will study additional topics including triangle centers, the Unit Circle, Law of Sines, and Law of Cosines.

• **Algebra 3**

411300CW

PREREQUISITE: Algebra 2 and Geometry.

Algebra 3 emphasizes the development and application of functions and advanced mathematical problem solving skills in the areas of polynomial, rational, exponential, logarithmic, and trigonometric functions. It is a bridge between Algebra 2 and Pre-Calculus, including some of the culminating topics of Algebra 2 and some of the introductory topics of Pre-Calculus. Instruction is based on active modeling, technology labs, group activities, and mathematical communication. The course is designed for students who feel they need a stronger background before attempting Pre-Calculus.

• **Pre-Calculus**

413100CW

PREREQUISITE: Algebra 2 and Geometry.

Pre-Calculus includes a study of relations and functions, the Binomial Theorem and logarithmic functions. This course introduces sequences and series, circular functions, their applications, and the inverses of circular functions. This course also covers trigonometric identities, trigonometric equations, trigonometric tables, and right-triangle trigonometry.

• **Pre-Calculus Honors**

413100HW

PREREQUISITE: Algebra 2 Honors and Geometry Honors

Pre-Calculus Honors includes a study of relations and functions, circular functions and their applications; the inverses of circular functions; trigonometric identities; trigonometric equations; trigonometric tables, and right-triangle trigonometry; logarithmic and exponential functions; limits, sequences and series. The honors curriculum places an emphasis on critical and analytical thinking skills and inductive and deductive reasoning. Students are expected to use technology, including graphing calculators and computers, throughout the course.

IB Mathematics Analysis and Approaches Seminar

PREREQUISITE: Algebra 2 Honors and Geometry Honors.

A 180-day two-course series that prepares the student for post-high school science and mathematics courses. This course includes linear, quadratic, and polynomial functions; exponents and logarithms; analytic geometry; trigonometric functions, formulas, equations and applications; triangle trigonometry; complex numbers; vectors; sequences and series; combinations; probability and statistics; curve fitting and models; limits and derivatives; integrals; volumes of solids; data analysis; hypothesis testing; data distributions; function transformations; graph theory; set theory; matrices; and derivative and integral application. Mathematical explorations are required as a part of that final grade. Additional topics determined by the instructor may also be included for success in future math courses. **This course will replace the IB Mathematics SL Seminar with implementation beginning at South Pointe High School in 2019-2020.**

IB Mathematics Applications and Interpretation Seminar

PREREQUISITE: Algebra 2 Honors and Geometry Honors.

A 180-day two-course series that encompasses and extends topics and concepts of advanced mathematics. The goals of the course are to develop proficiency with mathematical skills, expand understanding of mathematical concepts, and to improve logical thinking. Concepts include linear relations and functions; theory of equations; nature of graphs; trigonometric functions; trigonometric identities and equations; graphs of trigonometric functions; application of trigonometry; sequences and series; exponential functions; graph theory; probability; statistics; data analysis; two-dimensional geometry; three-dimensional geometry; limits and derivatives; and logarithms. A major project is required as a part of the final grade. **This course will replace the IB Mathematical Studies SL Seminar with implementation beginning at South Pointe High School in 2019-2020.**

• Discrete Mathematics

414200CW

PREREQUISITE: Algebra 2.

Discrete Mathematics stresses the connections between contemporary mathematics and their applications to our daily lives. Topics addressed in this course are applicable to real world situations and include management sciences, statistics, voting and social choice, fairness and game theory, size and growth, and money and resources. Environmental and economic decisions dominate modern life, and behind these decisions are fundamental principles of science, technology and mathematics.

• Calculus Honors

First Semester 413500HW

PREREQUISITE: Pre-Calculus Honors, Pre-Calculus, Math SL or Math Studies SL.

Includes properties of functions (algebraic, trigonometric, exponential, logarithmic) limits, derivatives, and applications of derivatives. This course also includes techniques of integration, the definite integral, and applications of the integral. This course is the first part of the AP Calculus course.

• AP Calculus AB

Second Semester 417000AW

PREREQUISITE: Calculus Honors or Math SL.

Calculus Advanced Placement includes properties of functions (algebraic, trigonometric, exponential, logarithmic), limits, derivatives, and applications of derivatives. This course also includes anti-derivatives, application of anti-derivatives, techniques of integration, the definite integral, applications of the integral, and slope fields. Optional topics include vectors, polar coordinates, and other integration techniques. State regulations require all AP students to take the AP Exam. **Students will prepare to take the Calculus AB and/or BC exam upon completion of this course.**

• AP Calculus BC

417200AW

PREREQUISITE: Calculus Honors or Math SL.

AP Calculus BC is roughly equivalent to both first and second semester college calculus courses and extends the content learned in AB to different types of equations and introduces the topic of sequences and series. The AP course covers topics in differential and integral calculus, including concepts and skills of limits, derivatives, definite integrals, the Fundamental Theorem of Calculus, and series. The course teaches students to approach calculus concepts and problems when they are represented graphically, numerically, analytically, and verbally,

and to make connections amongst these representations. Students learn how to use technology to help solve problems, experiment, interpret results, and support conclusions.

• **Probability and Statistics**

414100CW

Probability and Statistics is designed to prepare students for success in post-secondary statistics courses. In Probability and Statistics, students build on the conceptual knowledge and skills they mastered in previous mathematics courses in areas such as probability, data presentation and analysis, correlation, and regression. The Key Concepts in this course are: probability; probability distributions; descriptive statistics; inferential statistics; correlation and regression; and statistical research.

• **Probability and Statistics Honors**

414090HW

PREREQUISITE: Algebra 2.

Key concepts include interpreting data, conditional probability and rules of probability, using probability to make decisions, making inferences and justifying conclusions, and statistical research. The honors curriculum places an emphasis on critical and analytical thinking skills and writing skills. Students are expected to use technology, including graphing calculators and computers, throughout the course.

• **AP Statistics**

417100AW

PREREQUISITE: Algebra 2.

A rigorous math course for advanced students that includes the following themes: exploratory analysis, planning and conducting a study, probability, and statistical inference. The purpose is to introduce students to the major concepts and tools of elementary statistics as they collect, analyze, and draw conclusions from data. Students could take this course before or after AP Calculus or IB Math.

SCIENCE

Three units of science are required for high school graduation. Four units are highly recommended. AP and IB courses are listed in this section, but please see the dual credit listing under Advanced Studies Opportunities for information related to approved dual credit courses.

• Biology 1

322100CW

This introductory laboratory-based course is designed to familiarize the student with the major concepts of biology including cell theory, heredity, ecology, and biological evolution. Students develop critical thinking skills and science process skills through inquiry-based learning experiences in preparation for advanced science courses. **This course has a state End of Course exam that will count for 20 percent of the final course grade.**

•Biology 1 Honors

322190HW

PREREQUISITE: Minimum grade of 85 in both Science 8 Advanced and Algebra 1 in Grade 8; must also take Honors Algebra 2.

An introductory laboratory-based course designed to provide students a detailed study of the major concepts of biology including cell theory, heredity, ecology, and biological evolution. These concepts will be addressed in greater depth than in Biology 1-CP. Students develop critical thinking skills and science process skills through inquiry-based learning experiences in preparation for advanced science courses such as Advanced Placement, International Baccalaureate, and Dual-Credit courses. **This course has a state End of Course exam that will count for 20 percent of the final course grade.**

• Physical Science

322100CW

This inquiry-based course includes investigations of the basic principles of chemistry and physics. The chemistry portion of the course places emphasis on the periodic table of the elements as it is used in the study of atomic structure and chemical changes. The physics portion of the course includes the study of energy as related to gravity, motion, electricity, magnetism, heat, light, and sound. Physical Science is not considered a laboratory science course.

• Physical Science Honors

322190HW

This inquiry-based course includes the basic principles of chemistry and physics. The chemistry portion of the course places emphasis on the periodic table of the elements as it is used in the study of atomic structure and chemical changes. The physics portion of the course includes the study of energy as related to gravity, motion, electricity, magnetism, heat, light, and sound. Honors students are expected to have a strong math background for more independent lab investigations. Physical Science is not considered a laboratory science course.

• Biology 2

322201CW

PREREQUISITE: Biology 1. Recommended: Physical Science and/or Chemistry 1.

This laboratory science course includes two major segments. Students will study human anatomy and physiology including the major body systems. The other segment of this course is the study of Linnaean Classification including details about organisms in each of the six kingdoms. This course is heavily project-based and designed to lead students through a greater depth of biological study.

• **Biology 2 Honors**

322200HW

PREREQUISITE: C average in Biology 1 and Chemistry 1 and teacher recommendation.

This laboratory science includes an introduction to the chemistry of life and a study of cell anatomy and physiology, cellular energetics, molecular genetics, and structure and function of the human body with emphasis on laboratory dissections. Other topics may be covered at instructor's discretion.

• **AP Biology (2 courses over 1 year)**

**First Semester 327290HW
Second Semester 327200AW**

PREREQUISITE: Biology I and Chemistry I with at least a B average.

This rigorous college-level course is designed for students with superior academic ability, active interest in the life sciences, and a desire for challenge. It is a laboratory science that includes the topics covered in the first two semesters of biology at most colleges and universities. Topics studied include ecology, evolution, biochemistry, cells, enzymes and metabolism, plants and animal structure and function, heredity and molecular genetics. The course has a significant laboratory component, and students will develop the ability to design and implement scientific investigations. The course provides students with the conceptual framework, factual knowledge, and analytical skills necessary to work within the rapidly growing field of science. Students receive 2 credits: Biology 2 Honors and AP Biology.

• **IB Biology (2 courses over 2 years)**

**Junior Year 322B00IW
Senior Year 322C00IW**

PREREQUISITE: Biology 1 and Chemistry with at least a B average.

This rigorous college-level course is designed for students with superior academic ability, active interest in the life sciences, and a desire for challenge. A laboratory science that is a 2-credit course taken in the junior and senior year, IB Biology includes the topics covered in the first two semesters of biology at most colleges and universities. The topics studied include cells, biochemistry, genetics, nucleic acids and proteins, biotechnology, plant physiology, photosynthesis and cellular respiration, ecology and conservation, biological evolution and classification, and human physiology. There is also a strong emphasis on mathematics, including statistics and statistical analysis. The course has a significant laboratory component focused on cross-curricular science investigations. Students will develop the ability to design and implement scientific investigations. Students will also be expected to perform an individual investigation in the senior year and participate in a Group 4 Project with IB Chemistry students, also in the senior year.

• **Chemistry 1**

323100CW

PREREQUISITE: Algebra. Recommended: Physical Science.

This laboratory science course provides an introduction to the basic concepts and laboratory experiences which includes scientific inquiry, atomic structure and nuclear processes, chemical compounds and reactions, phases of matter and chemical solutions.

• **Chemistry 1 Honors**

323190HW

PREREQUISITE: Algebra 2 Honors with at least a C average or teacher recommendation.

This laboratory science course that provides an introduction to the basic concepts and laboratory experiences which will prepare students for advanced study in the sciences. Topics include scientific inquiry, atomic structure and nuclear processes, chemical compounds and reactions, phases of matter and chemical solutions.

• **Chemistry 2 Honors**

323200HW

PREREQUISITE: Biology 1 and Chemistry 1 with at least a C average.

This laboratory science provides a more detailed study of the basic chemical concepts included in Chemistry 1. Topics include atomic structure, stoichiometric calculations, thermochemistry, electrochemistry, periodic relationships, and reaction types. Students will learn about both organic and nuclear chemistry with an extensive series of laboratory experiments, including qualitative analysis, to supplement classroom instruction.

• **IB Chemistry (2 courses over 2 years)**

Junior Year 323B00IW

Senior Year 323C00IW

PREREQUISITE: Chemistry 1, Algebra 2 and Geometry with at least a B average.

This laboratory science is a 2-credit course taken in the junior and senior years. IB Chemistry includes the topics covered in the first two semesters of chemistry at most colleges and universities. The topics studied include stoichiometry, atomic theory structure, periodicity, bonding, states of matter, energetics, kinetics, equilibrium, acids and bases, oxidation and reduction, and organic chemistry, and measurement and data processing. In addition, two topics one topic will be selected for further study from the following options: human biochemistry, drugs and medicines, environmental chemistry, chemical industries, fuels and energy, modern analytical chemistry, and further organic chemistry materials, biochemistry, energy, and medicinal chemistry. The course has a significant laboratory component and a cross-curricular science investigation. Students will develop the ability to design and implement scientific investigations.

• **AP Chemistry (2 courses over 1 year)**

First Semester 327390 HW

Second Semester 327300AW

PREREQUISITE: Chemistry 2 Honors, Algebra 2, and Geometry with at least a B average.

This laboratory science course includes the topics covered in the first two semesters of chemistry at most colleges and universities. Study topics include stoichiometry, chemical reactions, atomic theory, periodicity, bonding, states of matter, thermochemistry and thermodynamics, kinetics, equilibrium, acids and bases, electrochemistry, nuclear reactions, qualitative analysis, and organic chemistry. The course has a significant laboratory component, and students will develop the ability to design and implement scientific investigations. Students receive 2 credits: Chemistry 2 Honors and AP Chemistry.

• **Physics**

324100CW

PREREQUISITE: Algebra 1 and Geometry. Recommended: Algebra 2.

This laboratory science course includes the study of mechanics and thermodynamics, wave motion, optics, sound, electricity, magnetism, nuclear and atomic physics. Although emphasis will be on qualitative comprehension of concepts, the study will develop analytical and mathematical skills necessary to solve elementary physics problems and will include introductory laboratory exercises.

• **Physics Honors**

324100HW

PREREQUISITE: Geometry and Pre-Calculus (recommended).

This laboratory science course involves an in-depth study of vectors, graphical analysis, kinematics, dynamics, rotary motion, simple harmonic motion, laws of conservation of mass, energy, and momentum, heat measurement, laws of thermodynamics, conservation of heat exchange, kinetic theory, gas laws, heat and work relationships, properties and characteristics of waves, sound, light, static and current electricity and electromagnetism.

• **AP Physics I**

328200AW

PREREQUISITE: Algebra 2 and Geometry.

This laboratory science course is an algebra-based, introductory college-level physics course. Students learn the principles of physics by exploring the following concepts: Newtonian mechanics, work, energy and power, mechanical waves and sound, and simple circuits. Students cultivate their understanding of physics through classroom study, in-class activity, and hands-on inquiry-based laboratory work as they explore these concepts. Students will prepare to take the AP Physics I exam upon completion of this course.

• **Anatomy and Physiology**

326300CW

PREREQUISITE: Biology 1 and Chemistry 1.

This laboratory science course focuses on the structure and function of the human body with emphasis on the histology and gross anatomy of the body. Topics such as diseases, bodily dysfunctions, immunology, clinical advances, and health careers are discussed to give relevance and meaning to the students. The course is most beneficial to students who plan to enter health-related careers.

• **Earth Science**

326500CW

PREREQUISITE: Biology and Physical Science.

This laboratory science course includes the study of the composition of the Earth and the dynamic forces that shape the Earth including plate tectonics, earthquakes, and volcanoes and the composition of the Earth. The course also includes the mapping of the Earth's surface, the movement of the Earth through space, and the use of satellite technology to create the global positioning system. The stars and galaxies, sun, planets, and the effect of the moon on Earth are also explored along with how the Earth is eroded through wind, water, glaciers, and waves. The course concludes with a study of the origin of the universe, geologic time and the history of the continents. This course counts as a laboratory science credit.

• **Natural Science**

321000CW

This course will introduce students to the methodology of scientific study. The course will emphasize thinking skills—problem solving, analysis, explanation, and self-regulation—as they pertain to scientific study observation, and conclusions. The course will be rich with projects and laboratory experiences to enhance student acquisition of knowledge. This course does not count as a laboratory science credit.

• **Environmental Science**

326100CW

PREREQUISITE: Two science credits.

Designed to assist students in the development of a “beyond one’s self” view of the world, a review of basic ecological principles will give the scientific grounding for a more thorough investigation of the environmental issues faced today. Students will explore various aspects of environmental science through service projects, environmental awareness and the understanding of how each person can help protect the Earth. This course does not count as a lab science.

• **AP Environmental Science**

327700AW

PREREQUISITE: Biology 1 CP or Honors and Chemistry 1 CP or Honors, Algebra 2.

This course is designed to provide students with the scientific principles, concepts, and methodologies required to understand the interrelationships of the natural world. Students will also identify and analyze environmental problems, and examine alternative solutions to resolving or preventing environmental problems. This course will prepare students for the Advanced Placement Examination that is given by the College Board. In addition, this course exposes students to a wide range of disciplines as Environmental Science is built upon the foundations established in Biology, Chemistry, Geology, and Geography. **This course counts as a lab science. Guidance counselors may recommend some students take Environmental Science paired with Biology 1 in the same year.**

• **Marine Science**

322500CW

PREREQUISITE: Biology 1 CP or H, Chemistry 1 and Teacher Recommendation.

This course is designed to meet the needs of the student who wishes to obtain an in-depth awareness of coastal and marine systems. The course will include a study of the physical, chemical and geological aspects of oceanography, marine biology, the coastal environment and the interrelationships among the disciplines. The course will provide opportunities for student participation in experimentation, dissection, and decision-making. The National Ocean Literacy standards will be implemented in this course. **This course counts as a lab science course.**

• **Introduction to Forensic Science**

329951CW

PREREQUISITE: Biology 1 and Chemistry 1.

This course exposes students to the means in which science is used to solve crimes. Forensic pathology and anthropology will also be introduced. Students will participate in inquiry investigations in which they are presented with mock crime scenes. They will learn to process crime scenes and determine which forensic science techniques are most appropriate. There may be student costs associated with the purchase of additional instructional materials. This course is a local elective only and does not meet science graduation requirements. **This course does not count as a lab science.**

TECHNOLOGY AND ENGINEERING

Rock Hill Schools is pleased to offer a number of high school engineering courses through Project Lead the Way (PLTW). Students may earn dual credit for PLTW courses through the University of South Carolina if they have an overall "B" or SAT Critical Reading + Math

score of 1100, or equivalent ACT Composite score of 24, or PSAT score of 110. A student with a minimum stanine score of 8 on the PLTW end of course exam with other evidence of student performance being a final grade at minimum a "B" in the PLTW course, or a minimum stanine score of 7 with other evidence of student performance being a final grade at minimum an "A" in the PLTW course. Students may earn dual credit for this course through the Rochester Institute of Technology if they have an overall "B" average and score a minimum stanine score of 6 or higher.

As with all courses, school offerings are dependent upon the availability of certified teachers and student enrollment in a course. Therefore, not all courses will be offered at every high school. **Fees will be charged by partner universities for college credit.**

• **Engineering Essentials**

688600CW

Introductory Project Lead the Way course

This course provides an exploratory engineering course designed to introduce freshman to multiple fields of engineering. This is a new course offered by PLTW. It will be the first course intended to be offered prior to Introduction to Engineering Design. The course aims to broaden participation in engineering by highlighting the industry's impact and challenging student perceptions of the field, with a focus on exploring global engineering challenges and sustainability goals, as well as personal, societal environmental and economic impacts of engineering solutions.

• **Introduction to Engineering Design (IED)**

605100CW

Project Lead the Way course – dual credit may be earned.

PREREQUISITE: Algebra I CP should be completed before or while students are taking the IED course
This course meets the computer literacy unit requirement for graduation.

This is the introductory course for the Project Lead the Way pre-engineering program. This course teaches problem-solving skills using a design development process and exposes students to the career field of engineering, as well as the engineering design software, Inventor. Models of product solutions are created, analyzed and communicated using Inventor, which is a solid modeling computer design software. This course meets computer literacy graduation requirements.

• **Principles of Engineering (POE)**

605000CW

Project Lead the Way course – dual credit may be earned.

Part of the South Pointe High School STEAM Engineering Pathway.

This course meets the computer literacy requirement for graduation.

PREREQUISITE: Completed ninth grade and has requisite math courses.

This is the second course in a series of pre-engineering courses that helps students understand the field of engineering/engineering technology. Students are encouraged to take Introduction to Engineering Design (IED) prior to this course. Exploring various technology systems and manufacturing processes help students learn how engineers and technicians use Math, Science and technology in an engineering problem solving process to benefit people. The course also includes concerns about social and political consequences of technological change.

• **Engineering Design and Development**

605400CW

Project Lead the Way course – dual credit may be earned.

Part of the South Pointe High School STEAM Biomedical Pathway.

PREREQUISITE: Principles of Engineering.

The knowledge and skills students acquire throughout PLTW Engineering come together in Engineering Design and Development as they identify an issue and then research, design, and test a solution, ultimately presenting their solution to a panel of engineers. Students apply the professional skills they have developed to document a design process to standards, completing Engineering Design and Development ready to take on any post-secondary program or career.

• **Civil Engineering and Architecture (CEA)**

605800HW

Project Lead the Way course – dual credit may be earned.

PREREQUISITE: Completed tenth grade and requisite math courses.

Provides an overview of the fields of Civil Engineering and Architecture, while emphasizing the interrelationship and dependence of both fields on each other. Student use state of the art software to solve real world problems and communicate solutions to hands-on projects and activities. The course covers topics such as the roles of civil engineers and architects, project planning, site planning, building design, and project documentation and presentation.

• **Aerospace Engineering (AE)**

605600CW

Project Lead the Way course – dual credit may be earned.

PREREQUISITE: Two approved engineering courses.

This course propels students' learning in the fundamentals of atmospheric and space flight. As they explore the physics of flight, students bring the concepts to life by designing an airfoil, propulsion system, and rockets. They learn basic orbital mechanics using industry-standard software. They also explore robot systems through projects such as remotely operated vehicles.

• **Computer Science Essentials**

637200CW

Project Lead the Way course – dual credit may be earned.

This course meets the computer literacy requirement for graduation.

Students will experience the major topics, big ideas, and computational thinking practices used by computing professionals to solve problems and create value for others. In Computer Science Essentials, students will use visual, block-based programming and seamlessly transition to text-based programming with languages such as Python to create apps and develop websites, and learn how to make computers work together to put their design into practice. They will apply computational thinking practices, build their vocabulary, and collaborate just as computing professionals do to create products that address topics and problems important to them.

• AP Computer Science Principles**477500AW***Project Lead the Way course – dual credit may be earned.**This course meets computer literacy requirement for graduation.***PREREQUISITE: Computer Science Essentials or equivalent.**

This course enables students to complete the PLTW certification as well as sit for the College Board AP exam for credit. Computer Science Principles implements the College Board's new AP CS Principles framework. Students work in teams to develop computational thinking and solve problems. The course does not aim to teach mastery of a single programming language but aims instead to develop computational thinking, to generate excitement about the field of computing, and to introduce computational tools that foster creativity. The course aims to engage students to consider issues raised by the present and future societal impact of computing. This course is endorsed by the College Board, giving students the opportunity to take the AP CSP exam for college credit.

• Cybersecurity**637800CW***Project Lead the Way course – dual credit may be earned.**This course meets computer literacy requirement for graduation.***PREREQUISITE: Computer Science Essentials or equivalent.**

This course introduces the tools and concepts of cybersecurity and encourages students to create solutions that allow people to share computing resources while protecting privacy. Nationally, computational resources are vulnerable and frequently attacked; in Cybersecurity, students solve problems by understanding and closing these vulnerabilities. This course raises students' knowledge of and commitment to ethical computing behavior. It also aims to develop students' skills as consumers, friends, citizens, and employees who can effectively contribute to communities with a dependable cyber-infrastructure that moves and processes information safely.

• Digital Electronics**605200HW***Project Lead the Way course – dual credit may be earned.***PREREQUISITE: Completed tenth grade and requisite math courses.**

A course in applied logic that encompasses the application of electronic circuits and devices. Students will study the application of electronic logic circuits (which are found in watches, calculators, video games, and thousands of other devices), and apply Boolean logic to the solution of problems. The use of smart circuits is abundant in industry today and its use is increasing rapidly, making digital electronics an important course of study for a student exploring a career in engineering/engineering technology or computer circuit design. Students will construct, test and analyze simple and complex digital circuitry and design using chips and other components. Successful completers can earn college credit for this course.

• Principles of Biomedical Science**558000CW***Project Lead the Way course – dual credit may be earned.**Part of the South Pointe High School STEAM Biomedical Pathway.***PREREQUISITE: Biology 1.**

This course sets the foundation for students looking to pursue biomedical careers and complements existing programs in nursing and health sciences. In this introductory course, students explore concepts of biology and medicine to determine factors that led to the death of a fictional person. While investigating the case, students examine autopsy reports, investigate medical history, and explore medical treatments that might have prolonged the person's life. The activities and projects introduce students to human physiology, basic biology, medicine, and research processes while allowing them to design their own experiments to solve problems.

• Human Body Systems**558100CW***Project Lead the Way course – dual credit may be earned.**Part of the South Pointe High School STEAM Biomedical Pathway.***PREREQUISITE: Principles of Biomedical Science.**

This course provides further understanding of the skills required in the biomedical profession by delving deeper into the human body systems, medical analysis, and homeostasis within the systems. This course is more focused on the interactions of human body systems with hands-on investigation and real world case studies from the

biomedical perspective than traditional Anatomy and Physiology course work. In the Human Body Systems course, students examine the interactions of body systems as they explore identity, communication, power, movement, protection, and homeostasis. Students design experiments, investigate the structures and functions of the human body, and use data acquisition software to monitor body functions such as muscle movement, reflex and voluntary action, and respiration. Exploring science in action, students build organs and tissues on a skeletal mannequin, work through interesting real-world cases, and often play the role of biomedical professionals to solve medical mysteries.

• **Medical Interventions**

558200CW

Project Lead the Way course – dual credit may be earned.

Part of the South Pointe High School STEAM Biomedical Pathway.

PREREQUISITE: Principles of Biomedical Science and Human Body Systems.

Medical Interventions allows students to investigate the variety of interventions involved in the prevention, diagnosis, and treatment of disease. The course will explore how to prevent and fight infection, how to screen and evaluate the code in our DNA, how to prevent, diagnose, and treat cancer, and how to prevail when the organs of the body begin to fail. Through these scenarios students will be exposed to the wide range of interventions related to immunology, surgery, genetics, pharmacology, medical devices, and diagnostics. Lifestyle choices and preventive measures are emphasized throughout the course as well as the important role that scientific thinking and engineering design play in the development of interventions of the future.

• **Clean Energy Systems**

638000CW

Southeastern Regional Education Board (SREB) course.

Part of the South Pointe High School STEAM Clean Energy Pathway.

PREREQUISITE: Principles of Engineering.

Introductory course that exposes students to some of the major sources of renewable energy: wind, solar, and biofuels. Students learn and apply physics, geography, chemistry, biology, geometry, algebra, and engineering fundamentals to understand the relevant relationships between work, power, and energy. The content in the course covers solar, thermal, chemical, and mechanical sources of clean energy production. Students learn the most efficient and appropriate use of energy resources and energy conversion, as well as the effect of weather and geography on energy production. Students engage in a wide variety of hands-on projects and lab activities that both test their knowledge and illustrate the interrelationships between the various forms of clean energy. It is recommended that students have a physical science credit and a strong science and math background prior to enrolling in this course.

• **Clean Energy Applications**

638100CW

Southeastern Regional Education Board (SREB) course.

Part of the South Pointe High School STEAM Clean Energy Pathway.

PREREQUISITE: Clean Energy Systems.

This course builds on the foundation of CES Course 1 and introduces nuclear power, geothermal energy, steam generation, fuel cells, water power, alternating and direct current (AC/DC), power generation, heat transfer, and the laws of thermodynamics. In addition, students now use chemical and thermal energy principles to create, store and use energy efficiently to power a variety of mechanical and electrical devices. Students engage in a variety of hands-on design projects to demonstrate principles using advanced technology hardware and software.

• **Clean Energy Strategies**

638200CW

Southeastern Regional Education Board (SREB) course.

Part of the South Pointe High School STEAM Clean Energy Pathway.

PREREQUISITE: Clean Energy Applications.

Students in this course utilize applicable skills from the foundational courses to tackle challenges associated with the implementation of clean energy technology. The hands-on projects encountered during this course will require students to address specific issues related to providing portable power in any situation, developing new energy storage systems, increasing the efficiency of the modern home, and designing more energy efficient buildings and homes.

SOCIAL STUDIES

One unit of American history, one-half unit of government, one-half unit of economics, and one additional unit of social studies are required in the diploma program. Four units are highly recommended. AP and IB courses are listed in this section, but please see the dual credit listing under Advanced Studies Opportunities for information related to approved dual credit courses.

• World Geography

331000CW

Students study Earth's human geography beginning with the use of maps and other geographic representations, geospatial technologies, and spatial thinking to understand and communicate geographic information. Students will examine patterns and processes of how human characteristics and activities vary across Earth's surface and how humans understand, use, and alter the surface of Earth.

• Human Geography Honors

331090HW

PREREQUISITE: Eng. 1 in eighth grade with a minimum of 80.

Explores the nature, perspectives, and connections between humans and their environment. Major topics include physical geography, population analysis, cultural patterns and processes, political organization of space, agriculture and rural land use, industrialization and economic development, and cities and urban land use.

• AP Human Geography

337900AW

PREREQUISITE: English 1 in eighth grade with a minimum of 80.

This course introduces students to the systematic study of patterns and processes that have shaped human understanding, use and alteration of Earth's surface. Students employ spatial concepts and landscape analysis to examine human social organization and its environmental consequences. They also learn about the methods and tools geographers use in their science and practice. The College Board determines the course description; therefore, the content of this course must adhere to those requirements.

• World History

336000CW

Students will study the history of the Modern World in grade ten, beginning with the time period of 1300 to present. Students will begin by learning about the emergence of the Modern World from 1300-1500, global affairs and interactions (1450- 1815), the rise of the new governments and competition in the global community (1815-1918), the emergence of new world powers (1885-1950), and the world from World War II to present day (1933-present). Students will learn modern world history through the lens of inquiry in order to study the world that trade created, which led to the influence of interactions of various changes to culture, governments, ideas, innovation, people, religion, and revolution with an intent to create a citizen who has a global perspective.

• U.S. Government

333000CH

Students study United States Government beginning with the historical and philosophical principles that led to the development of the American constitutional democracy and how those fundamental ideas have continued to sustain America's democratic society. Students will learn how various powers are granted and distributed among the different branches and levels of government, and how checks and balances prevent one branch from overpowering the others. **Students take a state-mandated Civics test at the end of this course.**

• **U.S. Government Honors**

333090HW

PREREQUISITE: Human Geography with a minimum of 80.

This course will provide the same content and topics as U.S. Government but will include an in-depth study of the three branches of the government. Civil liberties and the role/responsibilities of American citizens within a democratic society will be addressed and discussed in-depth. Pacing for this course is accelerated. **Students take a state-mandated Civics test at the end of this course.**

• **Economics**

335000CH

Students study economics and personal finance beginning with how humans address the fundamental problem of scarcity by making choices based on the existence of limited resources. Using the skills of the economist, students will learn how rational decisions are made using marginal analysis, and that all choices are met with consequences. Students will investigate how personal financial decisions related to careers, spending, and short- and long-term goal setting impact one's standard of living and long-term financial well-being.

• **Economics Honors**

335090HH

PREREQUISITE: Human Geography with a minimum of 80.

This course will provide the same content and topics as Economics. In addition, the course focuses on the United States role in a global economy, supply and demand, the Federal Reserve, investing, and taxation. Pacing for this course is accelerated.

• **AP U.S. Government and Politics**

337300AW

PREREQUISITE: PREREQUISITE: Honors or AP Human Geography with a minimum of 80.

This course introduces students to key political ideas, institutions, policies, interactions, roles, and behaviors that characterize the political culture of the United States. Students will examine politically significant concepts and themes, through which they learn to apply disciplinary reasoning, assess causes and consequences of political events, and interpret data to develop evidence-based arguments. Students will take the AP exam in the Spring. **Students take a state-mandated Civics test at the end of this course.**

• **AP Macroeconomics**

337400AW

PREREQUISITE: Honors or AP Human Geography with a minimum of 80.

This course focuses on a college level study of macroeconomics concepts, including international trade, currency exchange, production possibilities and trade-offs, supply and demand, measures of economic performance, the circular flow of goods and services, fiscal and monetary policy, money and banking, productivity and unemployment, budget deficits and inflation, and supply/demand side economic policies. Students who choose to accept the challenge of this course should have a commitment to improving their skills through extensive reading, writing and independent study.

• **Survey of Early American History**

First Semester 339915CW

This course counts as an elective.

Examines the development of the U.S. Constitution and the history of America beginning with the discovery/exploration period and continuing through the Gilded Age. The course will focus on the creation of the original 13 colonies, the American Revolution, the development of the new American nation, the Civil War, Reconstruction, and the Gilded Age. This course should be taken in eleventh grade along with American History and Constitution.

• **American History and the Constitution**

Second Semester 332000CW

Examines the Progressive Era, the Rise of Imperialism, the Great Depression, World Wars I and II, the Korean and Vietnam conflicts, Cold War and Post-Cold War developments in American History. This course should be taken in the eleventh grade along with Survey of Early American History. **This course has a state-required End of Course test that will count for 20 percent of the final course average.**

• **IB US History HL**

336D00IW

PREREQUISITE: English 3 **ALSO RECOMMENDED:** C average or English 3 Honors.

Students must also take IB History of the Americas and the IB exam to receive IB credit.

Emphasizes the political, social, economic, and cultural history of the Western Hemisphere. The course will emphasize common themes in the development of North and South America, such as colonization, revolution, slavery, imperialism, political systems, and war. The student will learn historical content; interpret and evaluate primary sources; research topics by using primary, secondary, and technological resources; and express himself clearly, effectively and analytically in written essays and class presentations. **This course is taught on an A/B day and is paired with IB English 4 IB in the junior year.** **This course has a state-required End of Course exam that will count for 20 percent of the final course average.**

• **AP U.S. History**

337200AW

PREREQUISITE: English 3 Honors with a minimum score of 80.

Examines the development of the U.S. Constitution and the history of America, including the discovery/exploration period through the post-Cold War era. It focus on the critical analysis early colonization, the American Revolution, the development of the new American nation, the Civil War, the Progressive Movement, the Spanish-American War, the Great Depression, World Wars I and II, the Korean and Vietnam conflicts, Cold War and Post-Cold War developments. State regulations require all AP students to take the AP Exam. **This course is taught on an A/B day and is paired with English 4 AP Language and Composition in the junior year.** **A state-required End of Course exam will count for 20 percent of the final course average.**

• **AP European History**

337600AW

PREREQUISITE: English 4 AP or IB.

Provides students with the analytical skills and factual knowledge necessary to deal critically with the principle themes and documented materials in European history since 1450 State regulations require all AP students to take the AP Exam. **This course is taught on an A/B day and is paired with English 5 AP Literature in the senior year.**

• **IB History of the Americas HL**

336C00IW

PREREQUISITE: IB US History. IB History of the Americas is taught in conjunction with IB US History. The students will focus on selected topics from 20th Century History, with an emphasis on a global perspective. **This course is taught on an A/B day and is paired with English 5 IB in the senior year.**

• **Psychology**

334000CW

Deals with developmental psychology from conception to death, personality and learning theory, states of consciousness, and abnormal psychology.

• **IB Psychology Seminar SL (2 courses in 1 year)**

First Semester 334D00HW

Second Semester 334A00IW

A two-unit yearlong course, which focuses on three perspectives of psychology: the biological perspective, the cognitive perspective, and the learning perspective. These perspectives are explored by studying the development and cultural contexts, the framework, and the methodologies, and the application for each perspective. The student will also conduct a simple experimental study. This course is offered at SPHS only. **This course is taught on an A/B day and is paired with IB Spanish/IB Spanish ab initio/IB French in the junior year.**

• **AP Psychology**

437100AW

PREREQUISITE: English or social studies teacher recommendation.

This survey in introductory psychology provides an examination of normal human behavior through such phenomena as classical and operant conditioning, positive and negative reinforcement, the measurement of intellectual ability, and the general developmental areas-motor, language, emotional, social, and personality. The course also examines family relationships, mental retardation, behavior disorders, and social problems. AP Psychology is designed to introduce students to the systematic and scientific study of the behavior and

mental processes of human beings and other animals. Students are exposed to the psychological facts, principles and phenomena associated with each of the major subfields within psychology. They will also learn about the ethics and methods psychologists use in their science and practice. Advanced Placement Psychology is a rigorous course designed to prepare students for the required Advanced Placement examination, administered through the College Board in May. Success on this exam may qualify the student for college credit. Students who choose to accept the challenge of this course should have a commitment to improving their skills through extensive reading, writing and independent study. This course will count as a Social Studies graduation requirement.

• **Sociology**

334500CW

Introduces the basic elements of sociology. This course explores the principles of sociology and man in relation to his cultural and social environments. This course places emphasis on the study of contemporary man in groups to specify the relationship between man and society and man in society. The second half of the course emphasizes the elements of change in society and investigates present-day problems of American society.

• **Historical Perspectives of World Religions**

339904CW

Traces the historical development of world religions from 4000 B.C. through the 20th Century. This elective course explores the religious literature; major beliefs and practices; important leaders; and the effects of these religions on history. The study of Hinduism, Buddhism, Christianity, Judaism, and Islam are included in this course.

• **Law-Related Education**

333600CW

This course is designed for any student who has an interest in a legal or law related field of work. It provides an overview of the structure and operation of the federal and state court systems. There are six major topics to be covered: individual civil rights, individual duties to others, criminal law, tort law, consumer law, and property rights or property law. The course also includes case studies, mock trials, and role play. It explores the issues and occurrences which affect students' lives and the lives of those around them.

• **Law-Related Education Honors**

333600HW

PREREQUISITE: Government and Economics Honors with a minimum of 80.

Provides junior and senior students with interactive learning in current political, economic, legal, social and geographic issues accessed with technology. Students will investigate, debate, and develop solutions to world problems, using personal or school-owned technology devices.

PHYSICAL EDUCATION

The physical education courses in the high schools are organized so that students participate in a variety of activities. These courses may be taken as the physical education requirement for high school graduation or as electives. P. E. 1 or ROTC are the only P. E. courses that meet graduation requirements. Other P. E. courses can be taken as electives.

• Physical Education 1 (Physical Education 1 is a prerequisite for all other P. E. courses) 344100CW

Involves students in a variety of new or familiar activities, which may include any of the following: physical fitness, volleyball, basketball, jogging, softball, badminton, weight training, disc sports, wrestling, ribbons, rhythms (aerobics and dance), table tennis, bowling, tennis, floor hockey, track and field and soccer. (Some schools offer most or all of these activities in their cluster.)

• Aerobics 344202CW

Aerobics includes an assortment of aerobic and dance activities and introduces students to the concept of aerobics and dance as a part of a total wellness program. Introductory and advanced skills will be incorporated into the routines.

• Individual and Team Sports 344210CW

PREREQUISITE: Physical Education 1 or ROTC.

Includes a variety of individual and team sports selected from the following activities: tennis, badminton, table tennis, softball, physical fitness, flag football, speedball, track, volleyball, basketball, soccer and wrestling.

• Fundamentals of Coaching 349905CW

Provides students with training in the field of coaching a variety of sports. Includes instruction in developing a coaching philosophy, developing team expectations, scheduling practices and games, making game preparations, conducting tryouts, managing facilities and equipment, working with parents and the public, and motivating athletes. Students who believe they may want to enter the field of coaching at any level may be interested in this practitioner's course.

• Personal Fitness 344211CW

PREREQUISITE: P.E. 1 or ROTC.

Emphasizes the development of healthy lifestyles and personal fitness. An individualized fitness plan will be implemented for each student that will include walking and other aerobic activities, resistance training, flexibility exercise, and nutritional guidelines. The teacher will serve as a personal trainer to help students reach healthy fitness zones.

• Total Body Conditioning 1 344310CW

PREREQUISITE: PE I and Teacher Approval.

An introduction to the fundamentals of strength conditioning, training, and goal setting within incremental blocks of instruction, flexibility, agility and proper running techniques. There is also an introduction to basic anatomy and muscle movement. Instruction focuses on the individual's physical development.

• Total Body Conditioning 2 344311CW

PREREQUISITE: Total Body 1 and Teacher Approval.

Continues the fundamentals of strength conditioning, training, and goal setting within incremental blocks of instruction, flexibility, agility and proper running techniques. Instruction in anatomy and muscle movement continues. Responsibilities are increased in the areas of safety and teamwork. There are also higher expectations for strength, speed, cardio, and agility gains.

• Total Body Conditioning 3 344312CW

PREREQUISITE: Total Body 2 and Teacher Approval.

This course continues the foundations established in the previous prerequisite courses. It has increased expectations of strength gain, speed development, cardio, and increased agility. Students will set personal goals around weight training and document their progress towards these goals. Students in the course who play sports will investigate the physical qualities necessary to be in optimal condition. The goal of the total body sequence is to create a lifestyle of fitness for students.

• **Total Body Conditioning 4**

344313CW

PREREQUISITE: Total Body 3 and Teacher Approval.

This course continues the foundations established in the previous prerequisite courses. Instruction is sport specific and has increased expectations of strength gain, speed development, cardio, and increased agility. Students will set personal goals around weight training and document their progress towards these goals. Students in the course who play sports will investigate the physical qualities necessary to be in optimal condition. The goal of the total body sequence is to create a lifestyle of fitness for students

• **Sports Medicine 1**

555500CW

It is recommended that Medical Terminology be taken in conjunction with this course.

Introduces the methods associated with the care and prevention of athletic injuries along with a basic understanding of anatomy and physiology. This course is taught at the home high schools.

• **Adaptive Physical Education**

Self-contained students 39160004

ESE students going for a high school diploma 344500CW

The Adaptive Physical Education program consists of 18 weeks in which students with disabilities participate in various fitness programs, lifetime sports activities and a weight room program. The purpose of this class is placed on cultivating lifetime/recreational activities as well as health and wellness that will nurture students in such a way as to build self-esteem and self-confidence in a school as well as community setting.

HEALTH EDUCATION

• **Personal Health and Wellness**

340200CW

Emphasizing personal responsibility, this course offers students current information and skills development opportunities in planning and practicing a healthy lifestyle. Focusing on student understanding of the importance of physical, emotional, and social health to the quality of life during all stages of human development, this course provides a basis for lifelong learning in primary health topic areas. This course **is required for graduation for all students.**

WORLD LANGUAGES

Four years of French and Spanish are offered for high school credit. Students planning to attend a public college or university in South Carolina must have completed a minimum of two units of a World Language.

It is strongly recommended that all college bound students complete three units of a World Language.

FRENCH

• French 1

361100CW

French 1 Introduces students to basic vocabulary, grammar, and culture through interpretive (listening and reading) activities for comprehension, presentational (speaking and writing) activities for expression, and interpersonal activities for interaction with others. Students will develop skills for describing.

• French 2

361200CW

PREREQUISITE: French 1.

Continues development of communication skills related to culture and cross-cultural understanding through interpretive (listening and reading) activities for comprehension, presentational (speaking and writing) activities for expression, and interpersonal activities for interaction with others. Students will develop skills for describing and narrating.

• French 3 Honors

361300HW

PREREQUISITE: French 2.

Expands on previously-studied themes and elements of cross-cultural understanding to include exploration of issues and perspectives in French-speaking cultures. Instruction includes interpretive (listening and reading) activities for comprehension, presentational (speaking and writing) activities for expression, and interpersonal activities for interaction with others. Students will develop skills for narrating and explaining, and are expected to use the studied language for at least 90 percent of the class period.

• French 4 Honors

361490HW

PREREQUISITE: French 3 Honors.

This course covers the first three Advanced Placement themes and is intended as preparation for the AP exam. It includes aural and oral skills, reading comprehension, grammar, and composition. This course is designed to provide students with varied opportunities to further develop their proficiency across the three communicative modes: interpersonal, interpretive, and presentational. Students will use a thematic approach in their study of language and culture concepts and will be expected to use the target language exclusively in class. Students should take Advanced Placement French in the second semester.

• IB French B SL Seminar

361J00HW

PREREQUISITE: French 3.

This is the first of two courses that constitute the International Baccalaureate (IB) requirements. It is open to juniors who plan to take the French IB SL course as seniors and who will take the IB exam in twelfth grade. This course is taught on a yearlong A/B schedule, paired with one other IB course. In this course students will begin to explore topics related to social relationships, communication and the media, global issues and two of five optional topics specified by IB curriculum. They will develop upper-intermediate communication skills, with emphasis on using more advanced language structures in interpretive (listening and reading) activities for comprehension, presentational (speaking and writing) activities for expression, and interpersonal activities for interaction with others. Students will develop skills for explaining and analyzing, and are expected to use the studied language for more than 80 percent of the class period.

• **IB French B SL**

361G00IW

PREREQUISITE: IB French B SL Seminar.

This is the second of two courses in the IB diploma program. It is open to seniors who plan to take IB exams at the end of twelfth grade and is taught on a yearlong A/B schedule, paired with another IB course. Students will continue their exploration of topics related to social relationships, communication and the media, global issues and two of five optional topics specified by IB curriculum. They will develop upper-intermediate communication skills, with emphasis on using more advanced language structures in interpretive (listening and reading) activities for comprehension, presentational (speaking and writing) activities for expression, and interpersonal activities for interaction with others. Students will expand skills for explaining and analyzing, and are expected to use the studied language for more than 80 percent of the class period.

• **AP French**

367100AW

PREREQUISITE: French 3.

AP French is a semester course that covers the equivalent of the fourth level of a high school French course. It includes aural/oral skills, reading comprehension, grammar, and composition. The AP French Language and Culture course is designed to provide students with varied opportunities to further develop their proficiency across the three communicative modes: interpersonal, interpretive, and presentational. Students will use a thematic approach in their study of language and culture concepts and will be expected to use the target language exclusively in class.

SPANISH

• **Spanish 1**

365100CW

Spanish I introduces students to basic vocabulary, grammar, and culture through interpretive (listening and reading) activities for comprehension, presentational (speaking and writing) activities for expression, and interpersonal activities for interaction with others. Students will develop skills for describing.

• **Spanish 2**

365200CW

PREREQUISITE: Spanish 1.

Continues development of communication skills related to culture and cross-cultural understanding through interpretive (listening and reading) activities for comprehension, presentational (speaking and writing) activities for expression, and interpersonal activities for interaction with others. Students will develop skills for describing and narrating.

• **Spanish 3 Honors**

365300HW

PREREQUISITE: Spanish 2.

Expands on previously-studied themes and elements of cross-cultural understanding to include exploration of issues and perspectives in Spanish-speaking cultures. Instruction includes interpretive (listening and reading) activities for comprehension, presentational (speaking and writing) activities for expression, and interpersonal activities for interaction with others. Students will develop skills for narrating and explaining, and are expected to use the studied language for at least 90 percent of the class period.

• **Spanish 4 Honors**

365490HW

PREREQUISITE: Spanish 3 Honors.

This course covers the first three Advanced Placement themes and is intended as preparation for the AP exam. It includes aural and oral skills, reading comprehension, grammar, and composition. This course is designed to provide students with varied opportunities to further develop their proficiency across the three communicative modes: interpersonal, interpretive, and presentational. Students will use a thematic approach in their study of language and culture concepts and will be expected to use the target language exclusively in class. Students should take Advanced Placement Spanish in the second semester.

IB Spanish B SL Seminar**365J00HW****PREREQUISITE: Spanish 3.**

This is the first of two courses that constitute the International Baccalaureate (IB) requirements. It is open to juniors who plan to take the Spanish IBSL course as seniors and who will take the IB exam in twelfth grade. This course is taught on a yearlong A/B schedule, paired with one other IB course. In this course students will begin to explore topics related to social relationships, communication and the media, global issues and two of five optional topics specified by IB curriculum. They will develop upper-intermediate communication skills with emphasis on using more advanced language structures in interpretive (listening and reading) activities for comprehension, presentational (speaking and writing) activities for expression, and interpersonal activities for interaction with others. Students will develop skills for explaining and analyzing, and are expected to use the studied language for more than 90 percent of the class period.

• IB Spanish B SL**365G05IW****PREREQUISITE: IB Spanish B SL Seminar.**

This is the second of two courses in the IB diploma program. It is open to seniors who plan to take IB exams at the end of twelfth grade and is taught on a yearlong A/B schedule, paired with another IB course. Students will continue their exploration of topics related to social relationships, communication and the media, global issues and two of five optional topics specified by IB curriculum. They will develop upper-intermediate communication skills, with emphasis on using more advanced language structures in interpretive (listening and reading) activities for comprehension, presentational (speaking and writing) activities for expression, and interpersonal activities for interaction with others. Students will expand skills for explaining and analyzing, and are expected to use the studied language for more than 90 percent of the class period.

• AP Spanish**367500AW****PREREQUISITE: Spanish 3.**

This course is a rigorous level Spanish course for students with three or four years of Spanish study and for native speakers who would like to take the Advanced Placement exam. Students will use a thematic approach in their study of language and culture concepts and will be expected to use the target language almost exclusively in class.

• IB Spanish Ab Initio SL Seminar**First Year 365F90HW****Second Year 365F00IW**

Geared towards juniors and seniors who are interested in pursuing the IB diploma but have never formally studied Spanish. The curriculum is advanced and moves quickly to immerse the student in the four skills of listening, reading, writing, and speaking. Students will exit the course with the equivalent knowledge of regular levels 1-3 of Spanish. See school IB coordinator for details.

CHINESE

• Chinese 1**461100CW**

Chinese 1 introduces students to basic vocabulary, grammar, and culture through interpretive (listening and reading) activities for comprehension, presentational (speaking and writing) activities for expression, and interpersonal activities for interaction with others. Students will develop skills for describing. Students will also learn to write Chinese characters.

• Chinese 2**461200CW****PREREQUISITE: Chinese 1.**

Continues development of communication skills related to culture and cross-cultural understanding through interpretive (listening and reading) activities for comprehension, presentational (speaking and writing) activities for expression, and interpersonal activities for interaction with others. Students will develop skills for describing and narrating and will continue to build their knowledge base of Chinese characters.

• **Chinese 3 Honors**

461300HW

PREREQUISITE: Chinese 2.

Expands on previously-studied themes and elements of cross-cultural understanding to include exploration of issues and perspectives in Chinese-speaking cultures. Instruction includes interpretive (listening and reading) activities for comprehension, presentational (speaking and writing) activities for expression, and interpersonal activities for interaction with others. Students will develop skills for narrating and explaining, and are expected to use the studied language for at least 90 percent of the class period. Students will continue to develop the use of Chinese characters. Course offering will depend on having enough students enroll, and class may be taught at one location for all district students.

• **Chinese 4 Honors**

461400HW

PREREQUISITE: Chinese 3 Honors.

This course covers the first three Advanced Placement themes and is intended as preparation for the AP exam. It includes aural and oral skills, reading comprehension, grammar, and composition. This course is designed to provide students with varied opportunities to further develop their proficiency across the three communicative modes: interpersonal, interpretive, and presentational. Students will use a thematic approach in their study of language and culture concepts and will be expected to use the target language exclusively in class. Students should take Advanced Placement Chinese in the second semester.

• **AP Chinese**

367900AW

PREREQUISITE: Chinese 3.

AP Chinese is a semester course that covers the equivalent of the fourth level of a high school Chinese course. It includes aural/oral skills, reading comprehension, grammar, and composition. The AP Chinese Language and Culture course is designed to provide students with varied opportunities to further develop their proficiency across the three communicative modes: interpersonal, interpretive, and presentational. Students will use a thematic approach in their study of language and culture concepts and will be expected to use the target language exclusively in class.

AMERICAN SIGN LANGUAGE

• **American Sign Language 1**

368100CW

This course is an introduction to the study of American Sign Language, the language used by Deaf Americans, and to the culture of the Deaf World. Students will develop basic communication skills in this visual and gestural language. Students will gain an understanding of the language through learning vocabulary, grammar, and culture. Topics covered in this course include, but are not limited to: greetings, directions, questions, time, calendar, fingerspelling, numbers, self, family, school, sports, weather, and descriptions.

• **American Sign Language 2**

368200CW

This course is an extension to the study of American Sign Language, the language used by Deaf Americans, and to the culture of the Deaf World. Students will develop basic communication skills in this visual and gestural language. Students will gain an understanding of the language through learning vocabulary, grammar, and culture. Topics covered in this course include, but are not limited to: greetings, directions, questions, time, calendar, fingerspelling, numbers, self, family, school, sports, weather, and descriptions.

BUSINESS, MARKETING, and FINANCE

Get a head start in the business world with Business and Computer Education in high school. This cluster is designed to prepare students for college courses in business and computer systems as well as entry-level employment in the areas related to planning, managing, and providing administrative support, information processing, accounting, and related management services. Students enrolled in Business courses are encouraged to join Business Professionals of America (BPA).

• Accounting 1

500100CW

Helps the student develop an understanding of assets, liabilities, owner's equity, payroll and taxes as students learn how to maintain business records and prepare financial statements. An accounting background provides the necessary skills to manage personal finances and prepare for further accounting and business study in college.

• Accounting 2

500500CW

PREREQUISITE: Accounting 1.

Students continue to record transactions in journals and maintain customer and vendor ledgers as they balance the business's books and perform end-of-year procedures. Concepts such as depreciation, allowance for bad debts, inventory, notes, interest and dividends are introduced.

• Business Entrepreneurship

540000CW

Focuses on the managerial process and examines the functions of planning, organizing, staffing, and directing as related to the activities and responsibilities of an entrepreneur. It also includes interpretation of financial documents. The course will include the use of the computer with simulations as well as instruction for spreadsheet software

• Business Law

504400CW

This course is designed to provide the student with knowledge of the legal environment in which a consumer operates, to provide the student with knowledge of the legal environment in which a business operates, and to provide the student with the knowledge of legal principles. Emphasis is placed on the effects that legislation has on business practices, legal forms, and legal terminology. Case problems and activities will help students learn about rights, privileges, and responsibilities of consumers, workers, and citizens.

• Integrated Business Applications 1

502000CW

Provides students with the proper procedures to create documents, worksheets, databases, and presentation suitable for coursework, professional purposes, and personal use. This course is designed to prepare students for Microsoft Office Specialist (MOS) Certification which is a globally recognized standard for demonstrating desktop skills with the Microsoft Office suite of business productivity applications.

• Integrated Business Applications 2

502100CW

PREREQUISITE: Integrated Business Application 1.

Exposes students to advanced computer concepts as related to processing data into useful information needed in business situations. The students will learn advanced database, spreadsheet, word processing, and presentation software capabilities. This course prepares students for Microsoft Office Specialist (MOS) certification, a globally recognized standard for demonstrating desktop skills with the Microsoft Office suite of business productivity applications.

• **Marketing (Grades 10-12)**

542100CW

This course introduces marketing concepts, economic marketing, and business fundamentals. Students are provided an overview of the marketing functions of selling, promotion, pricing, financing, and distribution. Communication and oral presentation skills are mandatory. The marketing course is designed to prepare students for entry-level employment in areas related to planning and performing wholesale and retail services. Potential employment sites include businesses of all types, such as financial institutions, real estate, retail establishments, public relations, and sports and entertainment venues.

• **Business Finance (Grades 10-12)**

527300CW

PREREQUISITE: Accounting 1 recommended.

This course is designed to provide students with an understanding of how corporations, organizations, and businesses handle money. Concepts include the management of money, accounting methodologies, investing strategies, and effective financial management.

• **Advertising (Grades 10-12)**

547000CW

This course introduces the concepts of advertising, planning strategies, communication skills and professional development. Course content includes budget development, media selection, design and the preparation of ads for various media. Students are expected to participate in oral presentations.

• **Advertising and Digital Media Marketing (Grades 10-12)**

542200CW

PREREQUISITE: Marketing with a recommended 75 or higher.

This course examines all aspects of advertising and digital media marketing. Students will creatively plan, design, and develop an advertising campaign for a product or service using real-world applications and considerations. Students will integrate technology commonly used in the advertising industry.

• **Marketing Management (Grades 10-12)**

543100HW

PREREQUISITE: Marketing with a recommended 75 or higher.

This course further prepares students for careers in financial institutions, real estate, retail establishments and sports and entertainment venues. It expands the student's knowledge to make more detailed and specific decisions concerning location, promotion, pricing, financing and distribution. Each student selects a type of business and develops a business plan to include financing, organization, management and marketing. Students develop fundamental business competencies including human resources, communications, selling, promotion, and financing.

• **Virtual Enterprise 1 and 2**

51500CW and 515100CW

PREREQUISITE: Two of the following: Integrated Business Applications 1, Webpage Design, Digital Multi-media, Business Entrepreneur, Accounting 1, OR Business teacher signature.

Provides students with hands-on experience running a virtual business. Students will participate in all phasing of establishing and operating a business on the Internet. It is recommended that students take Business Entrepreneurship, Accounting and/or Web Design and Development prior to taking this course to prepare them for leadership roles and responsibilities. A maximum of four credits may be earned.

• **Sports and Entertainment Marketing**

542500CW

PREREQUISITE: Marketing or Entrepreneurship.

This program is designed for students who wish to pursue careers in the various areas of the sports and entertainment industry. This includes careers in box office management and sales, group sales, public sales, marketing, operations, development and sports programming. This course will consist of classroom learning as well as out of the class involvement with the school's athletic and entertainment program.

COMPUTER EDUCATION

• Discovering Computer Science (Grades 9-12)

506100CW

This course meets the computer literacy requirement for graduation.

This survey course will expose students to introductory computer science topics with an emphasis on computational thinking and problem solving applied to a variety of contexts. Students will be empowered to create authentic artifacts and engage with computer science as a medium for creativity, communication, problem solving, and fun.

• Discovering Computer Science (Grades 7-8)

Part I Grade 7 506200CW

Part II Grade 8 506300CW

This course meets the computer literacy requirement for graduation.

This survey course will expose students to introductory computer science topics with an emphasis on computational thinking and problem solving applied to a variety of contexts. Students will be empowered to create authentic artifacts and engage with computer science as a medium for creativity, communication, problem solving, and fun.

• Fundamentals of Computing

502300CW

This course meets the computer literacy requirement for graduation.

This course is similar to Discovering Computer Science, but it takes a deeper dive into computer science careers and career-related topics. This course is recommended for students pursuing a computer science major or pathway.

• Fundamentals of Web Page Design and Development 1

503100CW

This course meets the computer literacy requirement for graduation.

PREREQUISITE: Digital Multi-media or Integrated Business Applications 1 or Computer Programming 1.

Provides students with the knowledge and skills needed to design Web pages using authoring tools and HTML. Students will develop skills in designing, implementing, and maintaining Web pages.

• Advanced Web Page Design and Development 2

503300CW

This course meets the computer literacy requirement for graduation.

PREREQUISITE: Web Page Design 1.

Provides advanced training in designing, maintaining, and upgrading webpages for personal and/or professional purposes. Major concepts include HTML, cascading style sheets, and JavaScript.

• Digital Desktop Publishing

517600CW

PREREQUISITE: Integrated Business Applications 1.

Students will learn the process and art of combining text and graphics to communicate effective messages by using desktop publishing software. Students design, format, illustrate, edit, revise, and print publications such as newsletters, flyers, brochures, reports, and other advertised materials. Students will gain the skills to effectively use color, type fonts, graphics, focus, balance, proportion, contrast, directional flow, white space, and consistency.

• Computer Programming 1

505000CW

This course meets the computer literacy requirement for graduation.

PREREQUISITE: Algebra 1 or Math Tech 2.

Emphasizes the fundamentals of computer programming through hands-on activities. Topics include algorithm, interface, and program design and development, along with practical hands-on experience in programming using a modern object-oriented language. Students work with variables, constants, data types, expressions, decision structures, and repetition structures, which lead to advanced programming with arrays, graphics, spreadsheet and database interfacing. Appropriate for students planning to major in Computer Science and Engineering, including game development and mobile apps.

• **Computer Programming 2**

505100CW

This course meets the computer literacy requirement for graduation.

PREREQUISITE: Computer Programming 1.

Emphasizes the fundamentals of computer programming through hands-on activities. Topics include algorithm, interface, and program code design and development, along with practical hands-on experience in programming using a modern object-oriented language, including game programming. Students work with variables, data types, expressions, decision structures, and repetition structures, which lead to advanced programming with arrays, spreadsheet and database interfacing.

• **AP Computer Science**

477100AW

PREREQUISITE: Computer Programming 2.

Provides a thorough study of computer science that is the equivalent of the material covered in the first year of computer science at most colleges and universities. The course includes programming methodology, features of programming languages, data structures, algorithms, and the structure and responsible use of computer systems. The AP exam must be taken to receive AP credit.

Other courses which meet the computer literacy requirement for graduation and are listed elsewhere in this catalog include Computer Science Essentials, AP Computer Science Principles (477500AW), and Cybersecurity.

• **IB Information Technology for a Global Society SL Seminar (Yearlong)**

First Semester 338Q00HW

Second Semester 338P00IW

Completion of a project is required to receive IB credit.

Prepares students to explore the advantages and disadvantages of the use of digitized information and digital technologies at the local and global level. The course provides a framework for the student to make informed judgments and decisions about the use of information technology within social contexts, promoting an understanding of the social significance of information technology to individuals, communities, and organizations. Students will also analyze and evaluate the ethical considerations arising from widespread use of information technology and recognize that people can hold diverse opinions about the impact of information technology on individuals and societies. For the project, students will be expected to create a comprehensive information technology solution to a complex problem, using skills learned from the class.

• **Digital Multimedia**

503020CW

Provides the student with the knowledge and skills needed for entry-level positions in multimedia and web publishing. Multimedia combines, graphics, audio, and video within an interactive environment.

FINE ARTS

Evidence of the Importance of Arts Education

(Excerpt from *Regarding the Status of Arts Teachers and Disciplines in Schools* by Dr. Sue Snyder)

Learning in the arts is brains-on, hands-on, and helps students develop the processes of creating, sharing, and responding. These artistic processes become a lab for learning in all disciplines. The artistic process is linked to higher order thinking and creativity.

The arts are often cited as motivating factors that keep students in school through the middle and high school years. They are equally important for low, average, and high achieving students; and particularly for high creative students who can always see (hear or feel) more than one right answer.

The arts build self-esteem and the ability to think independently. They also build both the ability to work alone and to collaborate in communal activities that build a sense of belonging. Students involved in the arts at the high school level score higher on SATs and other standardized high-stakes tests. The more years of involvement, the higher the average scores.

ART

• Art 1

350100CW

What qualifies as art? How do we create art? Where do we get ideas? Foundation level course that will build upon prior artistic experiences. The student will explore a variety of materials and processes. Processes will include drawing, painting, collage, 2D and 3D design, and more. Studio production of artwork will be accompanied by writings and discussions related to processes, criticism, aesthetics and art history.

• Drawing and Painting 1 (Art 2)

352100CW

PREREQUISITE: Art 1.

Drawing and Painting 1 will allow students to grow in their artistic abilities as they address various topics in the drawing and painting disciplines. Students will master a number of traditional and unique drawing methods, media, and styles as they address a variety of subject matter including portrait, still life, landscape, figure studies, and perspective. Students will also experience a variety of artistic approaches to painting and drawing.

• Ceramics and Sculpture 1 (Art 2)

350500CW

PREREQUISITE: Art 1.

Students in this course will learn ceramics and sculptural processes such as hand building with clay in the form of coil, slab, drape, and modeling, subtractive and additive sculpture methods in a variety of media including wax, wood, plaster, stone, etc., assemblage with found objects, enclosed space, and more.

• Drawing and Painting 2 (Art 3)

352200CW

PREREQUISITS: Drawing and Painting 1 and teacher approval

How will I utilize the elements and principles? The Drawing and Painting 2 course will further advance students in the drawing and painting processes, subject matter, styles, techniques, and media. Students in this course will be exposed to more technically advanced and diverse drawing and painting processes. Students will experience a range of media and processes that are more advanced including scratchboard, charcoal, conte, pastel, ink, acrylic, oil sticks, watercolor, and tempera.

• **Ceramics and Sculpture 2 (Art 3)**

350600CW

This course would allow students to continue more advanced ceramics and sculptural processes including but not limited to wheel throwing, metal and jewelry working, stone or wood carving. See attached syllabus. By establishing a strong beginning in ceramics and sculpture in the sophomore year, juniors in this class would be able to reach a higher level of skill and mastery better preparing them to participate in The Advanced Placement 3-D Design Studio course which would allow students to achieve college credit while in high school.

Printmaking 1

457100CW

PREREQUISITE: Art 1.

Students in this course will learn artistic photography and printmaking processes to include, artistic photography, photography editing, lino-printmaking, collagraphy, and screen printing. Also, with these processes students will learn the history of photography and printmaking and focus on design principles and composition strategies.

• **Art 4 Honors**

350401HW

What choices will I make?

PREREQUISITE: Art 3 Drawing and Painting 2 or Ceramics and Sculpture 2 and teacher approval.

An advanced art course with projects based on personal exploration and interests. This course is designed for the self-motivated student who is developing an artistic style. Students will use their own strengths and interests to complete teacher assigned projects by making choices in subject matter and media (with teacher direction and approval) in order to produce a high quality body of work.

• **AP Studio Art**

357200AW

How do I create a focus for my work?

PREREQUISITE: Art 4 (Fall semester)

This is a college course with rigorous requirements and a summer assignment. This course is reserved for independent and self-directed students with a strong dedication to art. Students are responsible for 24 pieces of quality work and are eligible for 3 hours of college credit upon completion of portfolio review.

• **IB Visual Arts SL Seminar (2 semesters)**

351E00HW and 351B00IW

PREREQUISITE: 2 Art courses. Open to IB and non-IB students.

Emphasizes critical thinking, intercultural understanding, and exposure to a variety of points of view. Students will develop their artistic skills and record their growth as an artist in a Research Workbook.

THEATRE

• **Introduction to Theatre**

459901CW

Serves as an introduction to the fundamentals of theatre. Students will broaden their appreciation and understanding of Theatre as a form of art, expression, discipline, history and literature. Students will explore many avenues of theatre including a variety of theatre experiences, an introduction to design and production, the basics in acting, and an overview of theatre history. This course is designed for first time theater students.

• **Theatre Crafts**

452100CW

PREREQUISITE: Introduction to Theatre.

Covers the basic technical aspects of the theater: scenery, lighting, sound, costumes, makeup, properties, posters, publicity, and stage management. This course also helps the student develop an appreciation of the technical theater through the study of theater history and the reading of plays and viewing of films for analysis of their technical applications. The course offers students practical experience in stagecraft and scenic design through their work on in-class and extra-curricular productions.

- **Playwriting and Performance**

452200CW

PREREQUISITE: Introduction to Theatre.

Serves as an intermediate class in theatre and its components-literature, production, and performance. Under teacher guidance, each student writes a one-act play suitable for presentation before an audience. As intermediate actors, students study techniques of stage performance for the modern actor including scene study monologue presentations, acting terminology, voice and body movement. This course is designed for students with prior middle school or high school theater experience.

- **Advanced Acting Methods**

452300CW

PREREQUISITE: Playwriting and Performance. Requires teacher approval.

Includes advanced work in production, performance and aesthetics through the study of acting styles of great performers past and present; the analysis of outstanding classic and modern plays; the study of directing techniques used by renowned theater practitioners; and scene study and production with emphasis on directing. This course provides each student the opportunity to develop his/her potential in theater and to gain a basic knowledge of what is required to prepare for a career in theater today.

- **Musical Theatre**

452400CW

PREREQUISITE: Introduction to Theater.

This course goes beyond the basic introductory concepts of theater. It is a specialized topics class designed to develop a students' skills in acting, singing, dancing and performance. It is performance based in nature and is available to all students.

- **IB Theater SL Seminar**

Junior Year 452D00HW

Senior Year 452A00IW

Enables students to develop performance skills, study selected texts from an international perspective, exercise practical analysis of a play from a director's point of view and participate in theatrical production. Students will maintain a reflective journal which will be included in their final portfolio. Participation in this course will enable students to develop communication skills, the ability to collaborate with others, analysis and reflection of written works from a global perspective, imaginative research, and self-analysis.

BAND

Students must meet the following requirements to participate in the high school band program. successfully complete a middle school band program; be recommended by the middle school band director; and demonstrate instrumental proficiency in an audition for the senior high band director.

- **Marching Band**

353000CW

Requires advanced technical skills in music. The band performs at football games, competitions, and parades. By enrolling, the student agrees to attend all rehearsals and activities as required by the band director including summer band camp.

- **Marching Band with Physical Education 1**

450863CW

Marching Band with Physical Education 1 integrates both curricula. In addition to all Marching Band requirements, students in this course will complete a pre- and post- Fitnessgram, a Personal Fitness Plan (PFP), and additional coursework to be eligible to receive the Physical Education credit for graduation while enrolled in marching band. Availability of course in 2019-2020 is dependent upon approval by the South Carolina Department of Education.

•Instrumental Ensemble**353100CW**

Requires advanced technical skills in music. This course emphasizes a variety of musical styles and technical facility consistent with grades 2 and 3 band literature and is designed to prepare students to participate in the Concert and Symphonic Bands. By enrolling, the student agrees to attend all rehearsals and activities as required by the band director.

• Concert Band**353200CW**

Requires advanced technical skills in music. This course emphasizes a variety of musical styles and technical facility consistent with grades 3 and 4 band literature and is designed to prepare students to participate in the Symphonic Band. By enrolling, the student agrees to attend all rehearsals and activities as required by the band director

• Symphonic Ensemble**353300CW****PREREQUISITE: Audition.**

Requires advanced technical skills in music. This ensemble is the top instrumental ensemble and performs at the state concert band festival and for any other community or school events as required by the band director. This course emphasizes a variety of musical styles and technical facility consistent with grades 5 and 6 band literature. By enrolling, the student agrees to attend all rehearsals and activities as required by the band director.

• Symphonic Honors Band**353400HW****PREREQUISITE: Band in grades 9 and 10 and Audition.**

Offers honors credit in eleventh and twelfth grades for students who complete all requirements of the symphonic honors band curriculum. The course provides opportunities for advancement and refinement of musical skills, higher level musical pieces, and the application of aesthetic judgment. Emphasis will be placed on refining ensemble performance skills, recognition of musical styles and historical periods, and the study of grade 5 and 6 literature for band, chamber ensemble performance and creative development.

**CHORUS****• Choral Ensemble (RHHS)****354100CW****• Singers (NHS/SPHS)****PREREQUISITE: Audition.**

This class is primarily for ninth graders. In this class, students will develop vocal techniques and sight-singing skills in addition to a strong base of music theory. Attendance at rehearsals and concerts outside of the school day (*including weekends*) is required.

• Chamber Singers (NHS/RHHS)**354204CW****• Stallion Vocal Ensemble****354200CW****PREREQUISITE: Audition or Teacher Approval. Completion of Choral Ensemble is recommended.**

This class is primarily for 10-twelfth graders. In this class, students will develop vocal techniques and sight-singing skills in addition to a strong base of music theory. This intermediate choir will prepare students for Concert Choir/Troubadours, emphasizing a variety of musical styles and technical skills consistent with an intermediate level of choral literature. This choir features a minimum of one performance per semester. There is an emphasis on a variety of musical styles and technical skills consistent with intermediate high school choral repertoire. By enrolling and being accepted through audition, the student agrees to attend rehearsals, activities, and performances outside of the regular school day (*including weekends*) as required by the choral director.

• **Concert Choir (RHHS /SPHS)**

354304CW

• **Troubadours (NHS)**

354300CW

PREREQUISITE: Audition.

RECOMMENDED: **Completion of Choral Ensemble.** This class stresses advanced choral performance techniques. The choir performs yearly at the State Choral Competition, a national competition, and for other community and school events. This course emphasizes a variety of musical styles and technical skills consistent with the highest grade of choral literature. By enrolling and being accepted through audition, the student agrees to attend rehearsals, activities, and performances outside of the regular school day (*including weekends*) as required by the choral director.

• **Concert Choir Honors (RHHS/SPHS)**

354404HW

• **Troubadours Honors (NHS)**

354400HW

PREREQUISITE: Teacher Approval. Taking Choral Ensemble/Singers in preparation for the Concert Choir/Troubadours is highly recommended.

Honors Chorus members may receive honors credit in the eleventh and twelfth grade for completing all requirements of the Honors chorus curriculum. This course will provide opportunities for advancement and refinement of musical potential, higher level thinking skills and aesthetic judgment. Emphasis will be placed on refining ensemble performance skills, recognition of musical styles and historical periods, and the study of more advanced literature for chorus, creative development and self-evaluation. Honors Chorus provides a rigorous and challenging curriculum for those select chorus students with the commitment and ability to undertake a more demanding workload in the areas of music performance and scholarship.

• **IB Music SL Seminar**

356D00HW

Offered only at NHS and RHHS.

Students enrolled in IB music must also be enrolled in band, chorus, or orchestra for the entire school year.

This rigorous semester course includes the study of music in western society, international music, basic music literacy, and music theory. Through this exploration of music, students will be able to listen to a piece of music and identify its genre and style. Students will write a paper comparing and contrasting two musical styles from historical perspective. **A basic knowledge of music theory and strong writing skills are strongly recommended.**

ORCHESTRA

Playing a stringed instrument presents a unique opportunity for high school students who are interested in doing something out of the ordinary. Playing a stringed instrument fosters musical expression and creativity, enhances the ability to work with others toward a common goal, and creates a challenging outlet for leisure time. Through self-motivation, daily rehearsals and participation in various school and community concerts, the “string experience” provides an excellent opportunity for students to achieve personal satisfaction through music.

• **Concert Orchestra**

First Semester 355010CW

Second Semester 355011CW

Director approval required

Requires advanced technical skills in music. This course emphasizes ensemble playing experience while continuing to develop bowing, rhythm, and position work. The course also emphasizes basic music theory, a variety of musical styles, and technical facility. The core musical study is grade 3 with some grade 4 string orchestra literature. Opportunities for solo work and small ensemble experience are available.

- **Strings Chamber Orchestra**

First Semester 355012CW
Second Semester 355013CW

Director approval required.

Requires advanced technical skills in music. The course emphasizes ensemble playing experience while developing increasingly challenging bowing, rhythm and position work. Study is continued in basic music theory, musical styles, string orchestra literature, and challenging technical facility. The core musical study is grade 4 and grade 5 orchestra literature. Opportunities for solo work and small ensemble experience are available. This ensemble is the top orchestra ensemble and performs at the state concert festival and for any other community or school event as required by the director.

- **Strings Orchestra Honors**

355300HW

Director approval required.

Honors Orchestra is scheduled for second semester to extend the Strings Chamber Orchestra experience. Members may receive honors credit in the eleventh and twelfth grade for completing all requirements of the honors string orchestra curriculum. This course will provide opportunities for advancement and refinement of musical potential, higher level reasoning skills and aesthetic judgment. Emphasis will be placed on refining ensemble performance skills, recognition of musical styles and historic periods, and the study of more advanced literature for string orchestra, chamber ensembles, and creative development.

- **Beginner Guitar**

356700CW

Helps students develop skills in playing guitar. Students will learn technique, music theory and history, and care of the guitar. Students will apply their learning through performance. Students must provide their own approved guitar.

- **Intermediate Guitar**

458000CW

PREREQUISITE: Beginner Guitar.

Students in this course must have either 1) taken Beginner Guitar, or 2) demonstrated their knowledge of the guitar to the course teacher prior to enrolling in the course. Students will strengthen fundamental technique and learn more advanced techniques. The study of music theory, music history, and care and maintenance of the guitar will continue. Students will also perform in both small and large ensembles, as well as compose and/or arrange for a small ensemble. Students will apply their learning through weekly tests and performance with a concert at the end of the semester. Students must provide their own approved guitar. An acoustic guitar is recommended.

DANCE

- **Dance 1**

450100CW

Dance elements, creative movement and social dances will be taught in this class, along with basic techniques and histories of ballet, modern, jazz, and basic choreography. No previous dance experience is required. **Note: Due to staffing and facilities, this course is only offered at Northwestern High School.**

- **Dance 2**

450200CW

PREREQUISITE: Dance 1.

Dance 2 is the continuation of Dance 1. In this course, we will build on the knowledge presented in Dance 1 (human body, dance styles, and choreographic tools) to further learn about kinesiology, various dance techniques, historic dance events and influencers, careers in dance, and choreographic tools. Students will use their knowledge to create and perform in the dance concert at the end of the semester. **Note: Due to staffing and facilities, this course is only offered at Northwestern High School.**

AFJROTC

The **mission** of the AFJROTC program is to “Develop citizens of character dedicated to serving their nation and community.”

The **goal** of the AFJROTC program are to instill in high school students the values of citizenship, service to the United States, personal responsibility, and a sense of accomplishment.

Each AFJROTC semester course is one (1) elective credit. First time cadets without a Physical Education credit will be granted Physical Education credit upon successful completion of their first semester of AFJROTC.

All cadets must comply with Air Force uniform wear standards. The following provides an overview of expectations but is not all inclusive:

Male Standards: When in uniform, the cadet’s hair must be neat in appearance and conform to the shape of the head, must be tapered in appearance, and must not interfere with the proper wear of the JROTC headgear. The male hair cannot exceed 1 ¼ inches of bulk. The hair cannot touch the ears and sideburns cannot extend below the bottom opening of the ear. This does not mean that males have to have “high and tight” haircuts. Faddish hairstyles such as corn rows, smoke stacks and bowl cuts are not permitted while in uniform. Hair color must be natural for the ethnicity of the cadet involved. Males may have moustaches, but they must be neatly trimmed. Male earrings must be removed when wearing the JROTC uniform. Cadets should not have additional piercing in their ears while in JROTC because spacers and additional earrings are not authorized for wear with the uniform. Note: Cadets may not have visibly pierced body parts (nose, tongue, eyelid, lip, etc.) while in uniform.

Female Standards: When in uniform, the female hair cannot exceed three inches in bulk and it cannot extend below the back of the collar of the uniform. The hairstyle must permit proper wear of the JROTC headgear. Only one pair of earrings may be worn with the uniform. The earrings must be small and spherical stud-type earrings. Cadets should not have additional piercing in their ears while in JROTC because spacers and additional earrings are not authorized for wear with the uniform. Hair color, highlights, lowlights, and frosting will *not* be faddish or extreme and will be natural looking hair color, similar to the individual’s hair color (e.g. black, brunette, blond, natural red, and grey). Nail polish must be clear or neutral in color or may be finished in a French manicure style. When in uniform, female cadets must wear hair accessories that match the color of the hair. Note: Cadets may not have visibly pierced body parts (nose, tongue, eyelid, lip, etc.) while in uniform.

Air Force Junior ROTC classes are offered by the AFJROTC department and are only available to AFJROTC students. Each AFJROTC class consists of three components: An Aerospace Science component, a Leadership Education component, and a wellness component. Each high school AFJROTC program can choose from the following courses each year:

AERSOSPACE SCIENCE COURSES:

AS 100: A Journey into Aviation History. This is an aviation history course focusing on the development of flight throughout the centuries. It starts with ancient civilizations, then progresses through time to modern day. The emphasis is on civilian and military contributions to aviation; the development, modernization, and transformation of the Air Force; and a brief astronomical and space exploration history. It is interspersed with concise overviews of the principles of flight to include basic aeronautics, aircraft motion and control, flight power, and rockets.

AS 200: The Science of Flight: A Gateway to New Horizons. An introductory course and customized textbook that focuses on how airplanes fly, how weather conditions affect flight, flight and the human body, and flight navigation. The course is designed to complement materials taught in math, physics, and other science-related courses and is aligned with the National Science Education Standards, the Math Standards and Expectations, and ISTE National Educational Technology Standards for Students.

AS 220: Cultural Studies: An Introduction to Global Awareness. This is a customized course about the world's cultures. The course is specifically created for the US Army, Marine Corps, Navy, and Air Force Junior ROTC programs. It introduces students to the world's cultures through the study of world affairs, regional studies, and cultural awareness. The course delves into history, geography, religions, languages, culture, political systems, economics, social issues, environmental concerns, and human rights. It looks at major events and significant figures that have shaped each region

AS 300: Exploring Space: The High Frontier. This is a course that includes the latest information available in space science and space exploration. The course begins with the study of the space environment from the earliest days of interest in astronomy and early ideas of the heavens, through the Renaissance, and on into modern astronomy. It provides an in-depth study of the Earth, Sun, stars, Moon, and solar system, including the terrestrial and the outer planets. It discusses issues critical to travel in the upper atmosphere such as orbits and trajectories unmanned satellites, and space probes. It investigates the importance of entering space and discusses manned and unmanned space flights, focusing on concepts surrounding spaceflight, space vehicles, launch systems, and space missions.

AS 400: Management of the Cadet Corps. The cadets manage the corps during their fourth year in the Air Force Junior ROTC program. This hands-on experience affords cadets the opportunity to put theories of previous leadership courses into practice. Planning, organizing, coordinating, directing, controlling, and decision-making will be done by cadets. They will put into practice their communication, decision-making, personal-interaction, managerial, and organizational skills.

AS 410: Survival: Survive * Return. The *Survival* text is a synthesis of the basic survival information found in Air Force Regulation 64-4 *Survival Training*. The survival instruction will provide training in skills, knowledge, and attitudes necessary to successfully perform fundamental tasks needed for survival. Survival also presents "good to know" information that would be useful in any situation. The information is just as useful to an individual lost hunting or stranded in a snowstorm.

AS 500: Aviation Honors Ground School. This course is the foundation for students interested in receiving a private pilot's license. The material covered is an advanced, more in-depth study of aerospace topics. Aviation Ground Honors School (AHGS) is taught as the Aerospace Science component of an AFJROTC class.

AS 510: AFJROTC Honors Senior Project. This project is provided for those units who have students that want to continue on in AFJROTC during their senior year and receive honors credit. It will allow top cadets to earn Honors Credit for a more demanding version of "Management of the Cadet Corps" allowing cadets the opportunity to improve their leadership, management, and organizational skills. The Senior Aerospace Science Instructor at each school will be the final authority concerning which students are allowed to enroll in this course.

LEADERSHIP EDUCATION COURSES:

LE 100: Traditions, Wellness, and Foundations of Citizenship. This course will introduce cadets to history, organization, mission, traditions, goals, and objectives of JROTC for all services. It introduces key military customs and courtesies, how to project a positive attitude, and exam the principles of ethical and moral behavior. It provides strategies for effective note taking and study skills for academic success.

LE 200: Communication, Awareness, and Leadership. Leadership Education 200 stresses communications skills and cadet corps activities. Much information is provided on communicating effectively, understanding groups and teams, preparing for leadership, solving conflicts and problems, and personal development. Written reports and speeches compliment the academic materials. Cadet corps activities include holding positions of greater responsibility in the planning and execution of corps projects.

LE 300: Life Skills and Career Opportunities. This course provides an essential component of leadership education for today's high school students. This course is designed to prepare students for life after high school in the high-tech, globally oriented, and diverse workplace of the 21st century. Students will learn how to become a more confident financial planner and to save, invest, and spend money wisely, as well as how to avoid the credit trap. They will learn about real-life issues such as understanding contracts, leases, warranties, legal notices, personal bills, practical and money-saving strategies for grocery shopping, apartment selection, and life with roommates

LE 400: Principles of Management. This course provides exposure to the fundamentals of management. The text contains many leadership topics that will benefit students as well as provide them with some of the necessary skills needed to put into practice what they have learned during their time in AFJROTC. We are confident this course, coupled with what cadets have already learned during their time in AFJROTC, will equip them with the qualities needed to serve in leadership positions within the corps.

LE 500: Drill and Ceremonies. The Drill and Ceremonies course provides an in-depth introduction to drill and ceremonies. The course concentrates on the elements of military drill, and describes individual and group precision movements, procedures for saluting, drill, ceremonies, reviews, parades, and development of the command voice. Students are provided detailed instruction on ceremonial performances and protocol for civilian and military events and have the opportunity to personally learn drill. Though each class will follow an established lesson plan, most of the work is to be hands-on.

WELLNESS PROGRAM: The Cadet Wellness Program is an official and integral part of the Air Force Junior ROTC program. It consists of two exercise programs focused upon individual base line improvements with the goal of achieving a national standard as calculated by age and gender. The Wellness curriculum is instrumental in developing citizens of character dedicated to serving our nation and communities. The program is provided as a tool to help you develop individualized training programs for your cadets. Cadets will be given the opportunity to put into practice the wellness concepts that are taught in Leadership Education 100. Instructors are free to include other activities cadets enjoy such as team sports in order to keep the Wellness Program fun and motivating.

FAMILY AND CONSUMER SCIENCES

• **Fashion, Fabrics, and Design (Level 1)** **580400CW**

Students must furnish their own materials for projects. (Only offered at NHS and SPS)

Assists students in acquiring basic skills in clothing construction. Students acquire skills in the operation and maintenance of the home sewing machine, basic hand sewing techniques, pattern interpretation and layout, and garment construction through a combination of teacher demonstrations and student practice and application. Students will discover fashion trends through history.

• **Fashion Design and Apparel Construction 1 (Level 2)** **571000CW**

PREQUISUTE: Fashion, Fabrics, and Design.

This course focuses on the study of fashion and garment industry with emphasis on the basics of design and construction. Concepts are applied with hands-on learning experiences as students study career pathways, textiles, fashion design, apparel construction, consumer behavior, products and materials of the fashion industry.

• **Fashion Design and Apparel Construction 2 (Level 3)**

571100CW

PREQUISUTE: Fashion Design and Apparel Construction 1.

In this course students will focus on refining skill in design and construction, fashion merchandising, and marketing. Students will also focus on the development of problem solving, decision-making, and technological applications in the real-world context.

• **Financial Fitness 1**

581200CW

Financial Fitness is designed to help students develop financial management skills by evaluating marketplace alternatives, creating a personal budget, understanding consumer rights and responsibilities, understanding the impact of career choices on personal goals and making informed consumer decision. Learning experiences provide real life application concepts such as budgeting money, using credit, and avoiding scams, rip offs and identity theft.

• **Financial Fitness 2**

581300CW

Take this course to help to put you in control of your future. Financial Fitness 2 is an in depth study of financial management skills. Building on skill mastered in Financial Fitness 1, students will further research and analyze savings and investment options, consumer legislation, local, state, and federal consumer protection agencies, and financial services career paths. Learning experiences incorporate strategies to improve higher order thinking skills, incorporate the use of technology, solve real world problems, and develop characteristics of a responsible consumer. Students will have opportunities to interact with professionals from business and industry.

• **Foods and Nutrition 1**

582400CW

Introduces students to the principles of basic food preparation. This course incorporates the principles of nutrition and the relationship of nutrition to individual health and well-being. Teacher demonstrations and guided laboratory experiences enable students to gain skills in kitchen management, safety and sanitation, food preparation, and meal service. It is recommended that students take this course if they are interested in taking Culinary Arts at ATC.

• **Housing and Interiors**

583000CW

Helps students understand housing needs and acquire knowledge and skills which will enable them to make housing decisions in the future. Students study housing styles, home furnishings and equipment, and the principles of interior design. This course also allows students the opportunity to acquire knowledge and develop skills necessary to complete a variety of housing projects. Students complete a variety of home care projects.

• **Human Development: Responsible Life Choices 1**

583400CW

Human Development: Responsible Life Choices 1 addresses development and wellness of individuals and families. Current information is provided about the physical, psychological, and emotional maturation process. Unit topics include interpersonal relationships, family life education, adolescent development, health and wellness, pregnancy and parenthood, and careers. This course includes requirements specified in the Comprehensive Health Education Act.

• **Human Development: Responsible Life Choices 2**

583500CW

Human Development: Responsible Life Choices 2 is a continuation of Human Development: Responsible Life Choices 1. This course builds on skills and knowledge from the first level course. Additional unit topics include psychological health, parenthood, and an enhanced career unit. Students investigate careers in health and human services, family and human development. Extended learning opportunities including volunteer activities, service learning, and job shadowing are provided and encouraged throughout this course.

• **Sports Nutrition**

575900CW

The study of the relationship between physical activity, proper nutrition, sports performance, and overall wellness. Students will learn not only how to prepare nutritious foods, but also what foods are needed for health promotion and disease prevention through increased knowledge of nutrition and physical activity.

ADDITIONAL ELECTIVES

• College Entrance Test Preparation

379930CW

PREREQUISITE: Algebra 1 and Geometry.

Prepares students to take a variety of college entrance tests, i.e., PSAT, SAT, ACT. Students will develop test-taking skills and use computer programs to provide individual practice. Counselors and speakers will be used to provide information on college requirements. **Recommended for college-bound juniors and seniors.**

• Introduction to Construction

600109CW

Includes an overview of safety, construction math concepts, basic rigging, communication skills, employability skills, and an introduction to hand tools, power tools, and blue prints. Students will get an overview of carpentry, masonry, electricity, welding, and heating and air conditioning. Students will develop a concept of teamwork, problem solving, and utilization and conservation of resources. Subject matter will include career choices and application of concepts related to becoming a professional in the construction field.

• **JAG** (Jobs for America's Graduates at RHHS only) is a multi-year career exploration and preparation course aimed at ensuring the success of students in and beyond high school. The focus is on academic success, life survival, job attainment, work readiness, leadership, team, and self-development skills. The course involves individual assignments, team activities/projects, academic remediation support, service learning opportunities, guest speakers, field trips, and career exploration. Students will also participate in a student-led career association, state and national career development conference which provides a unique vehicle for students to develop, practice and refine their skills through career workshops and competitive events. JAG, also provides one year of follow-up beyond high school. See course selection sheet at RHHS for course numbers.

JAG 1 (Jobs for American Graduates 1) – 374100CW

JAG 2 (Jobs for American Graduates 2) – 374200CW

JAG 3 (Jobs for American Graduates 3) – 374300CW

JAG 4 (Jobs for American Graduates 4) – 374400CW

• WBL Cooperative Learning/ Internship

Agriculture 569000CW, Construction 669000CW, Arts and Audio 529000CW, Business 549000CW, Education 639000CW, Health Science 559000CW, Hospitality 519000CW, Manufacturing 649000CW, Transportation 679000CW

A Cooperative Learning/Internship is a Work-Based Learning opportunity that allows the student to work in a real workplace environment. The internship experience allows students to develop and practice career-related knowledge and skills needed for a specific job. Internships may last a semester or a full school year and may be paid or unpaid. Placement in internships is at the discretion of the employer and the WBL Coordinator. Students must qualify and must submit all required paperwork. To earn credit for the course, students must satisfy the hour requirement, complete a final project, and receive satisfactory evaluations from the employer and WBL Coordinator.

• Leadership Development

379960CW

This course is designed to develop leadership qualities in our student-leaders to improve school culture and to have a positive influence on others both within the school and out in the community. Topics covered will include: The "R" Factor, Developing the Leader Within you, and Coach Wooten's Pyramid of Success.

• Service Learning

379923CW

PREREQUISITE: One-year membership in an approved service club.

The Service Learning course is a dual-purpose course that integrates academic and career readiness curriculum with a civic or service component. Students will divide their week between 3 days of classroom instruction and collaborative learning with 2 days of service time on site at their partner organization. Class time will be spent on research and discussion of what civic responsibility and service mean, analysis of people and organizations

that are service oriented, establish standards of professionalism, present reflections and research, and produce a professional e-portfolio. The remainder of course time will be spent actively involved at their service location completing training and maintaining professionalism. At the end of the course, students will present their research-based suggestions, action-steps, and findings to their service mentors in the form of a professional presentation.

• **Peer Tutoring and Support**

379922CW

PREREQUISITE: Application and teacher recommendation.

This course is designed to help participants develop the skills and communication needed to serve as academic tutors for their peers. The course covers learning styles, assignment rubrics, and essential learning objectives for different levels of math, science, social studies, and writing. The primary goals of this course are for tutors to develop a better understanding of the learning process, and to develop and enhance essential leadership and communication skills needed for college and career success.

• **College and Career Readiness**

Grade 9

379904CW

Grade 10

379905CW

Grade 11

379906CW

Grade 12

379907CW

College and Career Readiness courses are designed to support student success in high school and beyond, including transition support, communication, development of workplace skills, and test preparation. Courses will be personalized to identified student needs at each high school where offered and are designed to build on each other across grade levels.

• **IB Theory of Knowledge**

Junior Year 373A00IH

Senior Year 373B00IH

This course is required for IB Diploma candidates and is offered only to IB Diploma students.

TOK is an interdisciplinary course designed to stimulate critical reflection on knowledge and experience gained inside and outside the classroom. Students must write an essay and make a presentation for the IB assessment in TOK. Students earn one half credit in the junior year and one half credit in the senior year.

• **AP Seminar**

373000AW

PREREQUISITE: English 2 Honors.

The AP Seminar course is a two-semester, inquiry-based course that aims to engage students in cross-curricular conversations that explore real-world topics and issues from multiple perspectives. Students are empowered to collect and analyze information with accuracy and precision in order to craft and communicate evidence-based arguments. This course provides an opportunity for students to pursue an AP Capstone diploma or certificate. Please note that this course counts as a general elective.

• **AP Research**

373100AW

PREREQUISITE: AP Seminar.

AP Research allows students to deeply explore an academic topic, problem, or issue of individual interest. Through this exploration, students design, plan, and conduct a year-long, research-based investigation to address a research question. In the AP Research course, students further their skills acquired in the AP Seminar course by understanding research methodology; employing ethical research practices; and accessing, analyzing, and synthesizing information as they address a research question. This course provides an opportunity for students to pursue an AP Capstone diploma or certificate. Please note that this course counts as a general elective.

SOUTH CAROLINA HIGH SCHOOL CREDENTIAL

South Carolina has roughly 100,000 students with disabilities serviced under the Individuals with Disabilities Education Act (IDEA), of which the majority are able to earn a State high school diploma. Given the varying levels of student achievement, some students are unable to complete this required high school coursework. As a result, there is a need to provide an alternative option for students with disabilities to demonstrate their ability to transition into the work community. The uniform state-recognized South Carolina High School Credential is aligned with the State's Profile of the South Carolina Graduate and to a newly created course of study for these students with disabilities whose Individualized Education Program (IEP) team determines this course of study is appropriate.

The purpose of the South Carolina High School Credential is to provide equitable job-readiness opportunities for these students throughout the state, ensure they have evidence of employability skills, and honor the work they have undertaken in our public schools.

In the past, Rock Hill Schools offered a district-level Occupational Certificate. With a state-recognized credential, the district certificate began phasing out beginning in the 2018-19 school year.

English

Essentials of English I

390000CW

(Formerly Occupational English Essentials)

Essentials of English I emphasizes English Language Arts literacy concepts that are aligned to the South Carolina College-and Career-Ready Standards and the Profile of the South Carolina Graduate. This course will provide an integrated model of literacy and self-determination skills necessary for daily living and the world of work. The integrated model of literacy for this course will focus on inquiry, analysis and communication to explore literary, informational, and non-print text.

Essentials of English II

391000CW

Essentials of English II emphasize English Language Arts literacy concepts that are aligned to the South Carolina College-and Career-Ready Standards and the Profile of the South Carolina Graduate. This course will provide an integrated model of literacy and self-determination skills necessary for daily living and the world of work. This course will focus on immersion of effective communication skills in both daily living and employment settings with the use of standard rules of convention and syntax to give and request information.

Essentials of English III

392000CW

Essentials of English III emphasizes the English III course of study aligned to the South Carolina College-and Career-Ready Standards and the Profile of the South Carolina Graduate. This course will provide an integrated model of literacy and self-determination skills necessary for daily living and the world of work. This course will focus on reading, written and oral expression of information required in a variety of daily living and employment settings.

Mathematics

Essentials of Math I

(Formerly Occupational Algebra Essentials)

390100CW

Essentials of Math I emphasizes basic mathematical concepts needed to compute real world algebraic problems that are aligned to the South Carolina College and Career-Ready Standards and the Profile of the South Carolina Graduate. This course will allow students to make sense of problems and persevere in solving them as well as connect mathematical ideas and real-world situations through modeling. Students will use a variety of mathematical tools effectively and strategically.

Essentials of Math II

391100CW

Essentials of Math II emphasizes basic mathematical concepts needed to compute real world algebraic problems that are aligned to the South Carolina College and Career-Ready Standards and the Profile of the South Carolina Graduate. This course will allow students to identify and utilize structure and patterns as well as communicate mathematically and approach mathematical situations with precision utilizing mathematical tools effectively.

Essentials of Math III

392100CW

Essentials of Math III emphasizes the mathematical concepts needed to compute real world algebraic and geometric problems that are aligned to the South Carolina College and Career-Ready Standards and the Profile of the South Carolina Graduate. This course will allow students to identify and utilize structure and pattern as well as communicate mathematically and approach mathematical situations with precision utilizing mathematical tools effectively.

Science

Essentials of Science I

390200CW

(Formerly Life Skills Science I)

Essentials of Science I emphasize the biology course of study aligned to the South Carolina College-and Career-Ready Standards and the Profile of the South Carolina Graduate. This course will allow students to engage in problem solving, decision making, critical thinking, and applied learning to become scientifically literate and consumers of scientific information.

Essentials of Science II

391200CW

Essentials of Science II emphasizes the Physical Science course of study aligned to the South Carolina College-and Career-Ready Standards and the Profile of the South Carolina Graduate. This course will allow students to engage in core concepts (patterns; cause and effect; scale, proportion, and quantity; systems and system models; energy and matter; structure and function; and stability and change) to become scientifically literate and consumers of scientific information.

Social Studies

Essentials of Social Studies I

390300CW

Essentials of Social Studies I emphasizes the United States History and the Constitution course of study aligned to the South Carolina Standards and the Profile of the South Carolina Graduate. This course will provide a reward of literacy for the 21st century student. This course will allow students to engage in problem solving, decision making, critical thinking, and applied learning required in citizenship.

Essentials of Social Studies II

391300CW

Essentials of Social Studies II emphasize the governmental system of the United States and understanding the nature and purpose of government. This course will further emphasize geography relating to map and global skills.

Job Readiness

Employability Education I – Career Awareness and Exploration

390800CW

The Employability Education I course is designed for students to explore interests, research careers, create resumes, practice interview skills, and conduct informational interviews and job shadows. This course is designed to introduce students to the fundamental attitudes, behaviors, and habits needed to obtain and maintain employment and make career advancements. Students will participate in school-based learning activities including work ethic development, job-seeking skills, decision-making skills, and self-management. Students will begin a career portfolio as part of the requirements for the South Carolina High School Credential. Formal career planning and development of knowledge regarding transition planning begins in this course and continues throughout the strand of the employability education courses.

Employability Education II – Advanced Awareness and Exploration

391400CW

The Employability Education II course is designed to develop skills generic to all career majors; resource management, communication, interpersonal relationships, technology, stamina, endurance, safety, mobility skills, motor skills, teamwork, sensory skills, problem solving, cultural diversity, information acquisition/management, and self-management. This course content is focused on providing students with a repertoire of basic skills that will serve as a foundation for future career application. Students will expand their school-based learning activities to include school-based job shadowing and work-based learning activities. Job seeking skills also will be refined. Students may be involved in on-campus vocational training activities such as school-based enterprises, hands-on vocational training in career education courses and the operation of school-based enterprises. Additionally, the course will continue the focus on the development of self-determination skills as well as the career portfolio.

Employability Education III – Career Development

392800CW

The Employability Education III course is designed to continue the development and begin the application of employability skills. Work-based learning activities are provided including school-based enterprises, community-based training, job shadowing, job sampling, internships, situational assessment and apprenticeships. These work-based activities allow students to apply employability skills to a variety of employment settings and demonstrate the effectiveness of their work personality. Multiple opportunities for leadership and self-determination development are provided.

Technology

Essentials of Technology

The Employability Education III course is designed to continue the development and begin the application of employability skills. Work-based learning activities are provided including school-based enterprises, community-based training, job shadowing, job sampling, internships, situational assessment and apprenticeships. These work-based activities allow students to apply employability skills to a variety of employment settings and demonstrate the effectiveness of their work personality. Multiple opportunities for leadership and self-determination development are provided.

Other Special Education Services

Unique Pathways 2 & 3 Classes: Individualized program modified to student's ability level to improve functional, social, living, and academic skills. Students receive a district certificate of attendance.

Adaptive Physical Education: Physical education which may be adapted or modified to address the individual needs of children with motor and developmental delays which includes assessment and instruction, assessment data, IEP goals, and instruction in a least restrictive environment with general education peers to assist.

ATC Inclusion: Higher functioning students can go to ATC for electives, with teacher assistance for inclusion for one block

PAES Lab: Comprehensive data driven curriculum for students with special needs that provides training in basic career and life skills, exploration through hands-on experiences to determine a student's career/vocational strengths, a simulated work environment that allows staff to assess and address behaviors that may cause barriers to a competitive work environment, assessment of students ability to work, interests in specific types of work, and the type of support an individual would need in the work place.

Alternative Educational Services (AES): Tuesday and Wednesday afternoons 4:30-7 p.m. at NHS (if behavior permits). Transportation provided if necessary. Alternative schooling provided under IDEA if student is manifested and expelled from school in order to continue provided services. Student may earn two credits at AES.

ATC COURSE DESCRIPTIONS

The Applied Technology Center (ATC)

The Applied Technology Center offers a variety of career and technical education (CTE) high school courses, designed specifically to prepare students for success in college, technical/specialty school, or the workforce. ATC courses provide Rock Hill School District students the opportunity to use academic skills in a project-based, hands-on learning environment while utilizing work place skills.

- Students who successfully complete the required number of courses in a program may earn a Certificate of CTE Completion as a Rock Hill School District and/or SC State CTE Completer.
- Students may qualify to participate in a work-based learning (WBL) education experience. Work-based learning is a school-coordinated, sponsored, coherent sequence of workplace experiences that are related to each students' career goals and interests, while based on instructional preparation, and are performed in partnerships with local businesses, industries, or other organizations in the community. WBL enables students to apply classroom instruction in a real-world business or service-oriented work environment.
- Students may earn industry certification or licensure aligned with their related industry area.
- Upper level career courses have recommended prerequisites or state department requirements based on final grades. Entry level courses must have a minimum 75 or 80 depending on the program of study.
- Students with excessive absences may be dropped from their CTE program of study.

HUMAN SERVICES

Cosmetology

This two-year program includes academic instruction and classwork with exams prior to lab instruction in hair cutting, scalp care, braiding, wigs, hair removal, hair styling, chemical texture services, hair coloring, facials, facial makeup, manicures, pedicures, nail tips, and nail enhancements. Students gain experience through laboratory activities, hear presentations from professionals in the Cosmetology industry, and work in a salon setting, simulating a real work place experience. As students gain experience and skills they have the opportunity to work on clients. Students need four blocks in their

schedule during their junior and senior year for a total of eight. Maximum enrollment is 20 students per class, 8 units/1000 hours plus 540 academic hours required by South Carolina Labor, Licensing and Regulation (SCLLR).

• **Cosmetology 1 and 2 (Grade 11 only)**

615000CD, 615100CD

PREREQUISITE: Cosmetology 1: Chemistry strongly recommended. Cosmetology 2: Must pass Cosmetology 1 with a 75 or higher and a minimum of 250 clock hours per SCLLR.

This is a 2-block, year-long course. This year-long, double-blocked course has a limited class size of 20 per SC State Board of Cosmetology. Due to limited enrollment, students may be placed on a waiting list. A valid U.S. government issued photo ID and social security card are required on enrollment form by the SC Department of Labor, Licensing, and Regulation.

• **Cosmetology 3 and 4 (Grade 12 only)**

615200CD, 615300CD

PREREQUISITE: Cosmetology 3: Must pass Cosmetology 2 with a 75 or higher and a minimum of 500 clock hours per SCLLR. Cosmetology 4: Must pass Cosmetology 3 with a 75 or higher and a minimum of 750 clock hours per SCLLR.

This is 2-block, year-long course. The size of class is limited to 20 per SC State Board of Cosmetology. Due to limited enrollment, students may be placed on a waiting list. A valid U.S. government-issued photo ID and social security card are required on enrollment form by the SC Department of Labor, Licensing, and Regulation. Students that successfully complete the required number of hours and pass their practical and theory examinations with a passing score or of 75 or higher will be licensed by the South Carolina State Board of Cosmetology.

HOSPITALITY AND TOURISM

• **Culinary Arts Management 1 (Grades 10-11)**

572000CW

PREQUISITE: Foods and Nutrition 1 with a recommended 75 or higher or Sports Nutrition 1 with a recommended 75 or higher is strongly recommended.

Culinary Arts 1 is a required course for the Culinary Arts completer program. Students taking Culinary Arts 1 apply the knowledge gained from the basic foods and nutrition/sports nutrition course and advance into an in-depth study of the professional food industry. This course emphasizes skills in the following areas: cuisines, culinary basics, culinary mathematics, dining room operations, food production techniques, food service management, menus nutrition, professionalism, recipes, safety and sanitation, and sustainability. Employment opportunities and qualifications are explored as well as industry certifications. National Certification Examinations: ProStart 1 Examination and ServSafe Food Handler. *Courses included in this SC State Completer Program include: Foods and Nutrition 1 or Sports Nutrition 1 and both Culinary Arts 1 and Culinary Arts 2.*

• **Culinary Management Arts 2 (Grades 11 or 12)**

572100CD

PREQUISITE: Culinary Arts 1 with a recommended 75 or higher and ProStart 1 Certification.

This is a year-long course. Culinary Arts 1 and 2 may not be taken in the same school year.

Culinary Arts 2 is a required course for the Culinary Arts completer program. This course applies and expands upon the skills learned in Culinary Arts 1. Students will gain valuable experiences in the following: cuisines, culinary basics, culinary mathematics, dining room operations, food production techniques, food service management, menus, nutrition, professionalism, recipes, safety and sanitation, and sustainability. Students are strongly encouraged to achieve appropriate workplace certification. Students follow the ProStart curriculum and will take the national certification examinations as described in the description. National Certification Examinations: ProStart 2 and ServSafe Manager. Students are highly encouraged to participate in the ProStart Program to its fullest obtaining a job in the industry. Scholarships may be offered to the major culinary schools by way of studying this curriculum.

• **Work-Based Learning (hospitality work-based credit)**

519000CW

This is a program which coordinates high school studies with a job in a field related to academic or technical education standards that provides “hands on learning” in areas of student interest with a participating business. A learning contract outlines the expectations of and responsibilities of both parties. The student works regularly during or after school in exchange for the mentor’s time in teaching and demonstrating. The work-based experience may be paid or unpaid. 120 Hours, 1.0 credit

EDUCATION AND TRAINING

• **Introduction to Teaching 1** **570300CW**

Introduction to Teaching 1 is designed to prepare students for careers in the education field. This course will examine careers in early childhood, elementary, secondary, and postsecondary education. Students learn the foundations of education, human growth and development, brain development, teaching strategies, classroom management, and instructional planning and assessment. Technology, professionalism, and academic skills are integrated throughout the course work. There is also an extended learning experience where the student will go into schools and work with a mentor teacher. Professional dress attire is required. Students must earn a 75 or higher in this course as a prerequisite for higher level courses.

• **Introduction to Teaching 2**

570400CW

PREREQUISITE: Introduction to Teaching 1 with a recommended 75 or higher.

COREQUISITE: Must also be enrolled in Introduction to Teaching 3.

Introduction to Teaching 2 is an advanced level course that builds on skills developed in Introduction to Teaching Level 1. Students develop a higher level of proficiency through authentic learning experiences. Students plan engaging lessons, enhance communication and presentation skills, explore school-societal relationships, and exhibit professionalism. Technology is integrated throughout the course work. Participation in student organizations (EdRising) Educators Rising and (FCCLA) Family, Careers, Community, Leaders of America greatly enhance the learning experience.

• **Introduction to Teaching 3**

570401CW

PREREQUISITE: Introduction to Teaching 2 with a recommended 75 or higher.

COREQUISITE: Must also be enrolled in Introduction to Teaching 2.

In Introduction to Teaching 3, students will engage in extended learning opportunities for professional experiences in education. Students will demonstrate integration of curriculum and instruction to meet children’s developmental needs and interests in an internship at a local Rock Hill school under the supervision of the ATC teacher and a mentor teacher. The student will be responsible for their own transportation and professional attire. Students will complete portfolios as an assessment of their experiences.

• **Work-Based Learning (education work-based credit)**

639000CW

This is a program which coordinates high school studies with a job in a field related to academic or technical education standards that provides “hands on learning” in areas of student interest with a participating business. A learning contract outlines the expectations of and responsibilities of both parties. The student works regularly during or after school in exchange for the mentor’s time in teaching and demonstrating. The work-based experience may be paid or unpaid. 120 Hours, 1.0 credit

HEALTH SCIENCE

• Health Science 1

555000CW

PREREQUISITE: English 1 and Algebra 1 with a recommended 75 or higher in both.

COREQUISITE: Biology 1 as a pre- or co-requisite.

Health Science 1 and 2 plus one additional select course are required for students to be a CATE completer.

Health Science 1 is the first of four courses offered to students interested in pursuing a career in the healthcare field. During this course students are introduced to healthcare history, careers, law and ethics, cultural diversity, health care language and math, infection control, professionalism, communication, basics of the organization of healthcare facilities, and types of healthcare insurance. Students will learn first-aid procedures and learn fire safety. The skills and knowledge that students learn in Health Science 1 serve to prepare them for future clinical experiences such as job shadowing or internships as they advance in the Health Science courses. **A pre-requisite grade of 75 or above is required in Health Science 1 in order to enroll in Health Science 2 per SC state requirement. This course is also available at SC Virtual School for students with scheduling conflicts.**

• Health Science 2

555101CW

PREREQUISITE: Health Science 1 with a 75 or higher per South Carolina Department of Education.

Health Science 1 and 2 plus one additional select course are required for students to be a CATE completer.

Health Science 2 applies the knowledge and skills that were learned in Health Science 1 while further challenging the students to learn more about the healthcare field. This course will introduce students to basic patient care skills. Medical terminology, medical math and pharmacology are incorporated throughout the lessons being taught. Students may earn certifications in First Aid and CPR in this course. Job shadowing opportunities may be available in this course.

• Health Science 3 - Human Structure and Function

555201HW

PREREQUISITE: Health Science 1 and 2 with a 75 or higher per South Carolina Department of Education.

Health Science 3 acquaints students with basic anatomy and physiology of the body. Students learn how the human body is structured and the function of 12 body systems. Students will study the relationship that body systems have with disease from the healthcare point of view. This class is recommended for juniors or seniors. *This course is also available at SC Virtual School for students with scheduling conflicts.*

• Health Science Clinical Study (Grade 12 only)

This is a double-blocked course available in Block 1 and Block 2 only.

This is a dual credit course through York Technical College.

Students must furnish their own transportation to and from the clinical and internship sites.

PREREQUISITE: Health Science 2 with an 80 or higher and at least one of the following courses: Health Science 3 with an 80 or higher or Medical Terminology with an 80 or higher. Students must meet York Technical College admission requirements.

Health Science Clinical Study is a course that guides students to make connections from the classroom to the healthcare industry through clinical experiences/activities. The students will build on all information and skills presented in the previous courses and relay these skills into real life experiences. This course develops students' technical skills to provide health care in a variety of settings. Student may prepare to take the South Carolina Nurse Aide certification exam. Skills include vital signs, activities of daily living, transfers, personal hygiene, nutrition, and safety. Infection Control and HIPAA principles will also be an integral part of the course. A clinical internship with a minimum of 40 hours in a long-term care facility and 30 hours of internship/shadowing is included in this 2-block course. Students will be required to meet academic, behavior and attendance standards and submit a parent/guardian permission form to participate in the internship. Clinical times will vary according to the facility need. BLS Healthcare Providers CPR and First Aid certification will be required. Students will be HIPAA and OSHA safety trained prior to clinical experiences.

- **Health Science Clinical Study (Grade 12 only)**

This is a yearlong course available in Block 4 only.

This is not a dual credit course.

Students must furnish their own transportation to and from the clinical and internship sites.

PREREQUISITE: Health Science 2 with an 80 or higher and at least one of the following courses: Health Science 3 with an 80 or higher or Medical Terminology with an 80 or higher. Students must meet York Technical College admission requirements.

See above for course description.

- **Emergency Medical Services (Grades 11-12)**

553100HW

PREREQUISITE: Students must have completed Health Science 2 with an 80 or higher plus one of the following courses: Health Science 3 with an 80 or higher or Medical Terminology with an 80 or higher.

This course includes development of technical skills used during emergencies. Students will apply the concepts of safety and infection control, medical terminology, disaster preparedness and prevention of injury. Students will focus on vital signs, CPR, First Aid, and Automated External Defibrillation. Students will have the opportunity to earn Emergency Medical Responder Certification through the American Health and Safety Institute. The EMS class also offers beginning instruction in Essentials of Firefighting taught by Rock Hill Fire Department staff.

- **Medical Terminology (Grades 10-12)**

554000HW

This course is available online only.

Students who successfully complete Health Science 1, Health Science 2, and Medical Terminology are classified as a South Carolina Career and Technical Completer.

This course is highly recommended for students who are considering a career in the healthcare industry. Medical terminology is designed to develop a working knowledge of the language of health professions. Students acquire word-building skills by learning prefixes, suffixes, roots, combining forms, and abbreviations. Utilizing a body systems approach, students will define, interpret, and pronounce medical terms relating to structure and function, pathology, diagnosis, clinical procedures, and pharmacology. Students will use problem-solving techniques to assist in developing an understanding of course concepts.

- **Veterinary Assisting**

697000HW

Supply fee is required.

PREREQUISITE: Students must have completed Health Science 2 with an 80 or higher plus one of the following courses: Health Science 3 with an 80 or higher or Medical Terminology with an 80 or higher.

This course will help the student to develop skills required to work in a veterinary office and/or hospital. Students will acquire skills to include basic nutrition, grooming, medication administration, and assisting the veterinary team with medical care and treatment techniques. Instruction includes injections, blood draws, vital signs and laboratory procedures for small and large animal care. Students are required to attend a minimum of 60 hours clinical training in a variety of settings as chosen by the instructor. Students will have the opportunity to obtain a certification in Veterinary Fundamentals and OSHA 10 for the healthcare environment.

- **Work-Based Learning (health science work-based credit)**

559000CW

This is a program which coordinates high school studies with a job in a field related to academic or technical education standards that provides “hands on learning” in areas of student interest with a participating business. A learning contract outlines the expectations of and responsibilities of both parties. The student works regularly during or after school in exchange for the mentor’s time in teaching and demonstrating. The work-based experience may be paid or unpaid. 120 Hours, 1.0 credit

ARTS, AUDIO-VIDEO TECHNOLOGY, AND COMMUNICATIONS

• **Digital Art and Design 1: Foundation of Digital Art and Design (Grades 9-12)** **612000CW**

This course is designed to provide the student with the knowledge and skills needed to utilize digital imaging software in editing and designing images and graphics. Students also learn the use of technologies related to digital imaging such as: basic computer operations; file sharing across networks; preparing documents for output to various types of media the functions of the Mac computer and how to troubleshoot technology. The software used in this class is the most current version of Adobe Photoshop and Illustrator CC (Creative Cloud).

• **Digital Art and Design 2: Interactive Animation and Motion Graphics (Grades 10-12)** **612100CW**

PREREQUISITE: Digital Art and Design 1 with a recommended 75 or higher.

This course prepares students to use artistic and technological foundations to design, create and program interactive animations. The design principles from the previous course are now combined with animation, including image creation, character development and story conception through production. Students learn the technical language used in the digital art and animation industry along with basic design, animation and coding methods. The curriculum includes basic 2D animations, 3D, motion graphics and special effects. They will also learn techniques about various ways to plan, create, design and prepare for animation in pre-production, production and post-production. The software used in this class is the most current version of Garageband, Adobe Photoshop, Illustrator, Animate and After Effects CC (Creative Cloud).

• **Digital Art and Design 3: Graphic Design and Illustration (Grades 11-12)** **6122YTEW**

Dual credit course through York Technical College.

PREREQUISITE: Digital Art and Design 1 and 2 with a recommended 75 or higher. Student must meet York Tech admission requirements.

This dual credit course studies the fundamentals of computer assisted graphic design and introduces students to the computer as an instrument to create page layout, vector art, and digital design. Industry standard software is taught and will focus on vector art using Bezier curves. Students will learn the functions of the computer and how to troubleshoot technology. Students learn the technical language used in the graphic illustration industry, design methods, color and composition. Concepts learned are a great foundation for anyone pursuing a career in the print industry, for production artists, illustrators, animators, and graphic designers. Students must earn a B or higher in this course as a prerequisite to move on to the next level course. The software used in this class is the most current version of Adobe Illustrator and InDesign CC (Creative Cloud).

• **Digital Art and Design 4: Digital Photography (Grades 11-12)** **6123YTEW**

Dual credit course through York Technical College.

PREREQUISITE: Digital Art and Design 1, 2 and 3 with a recommended 80 or higher. Student must meet York Tech admission requirements.

This dual credit is a study of the principles, terminology, techniques, tools and materials of basic digital photography. This course is part of the Digital Art and Design Program, which introduces the skills needed by students for careers in the commercial art fields. Whether working freelance or for a large company, the modern commercial artist is expected to have skills that cover many fields. Photography and Digital Art are the focus of this class, with students learning how to capture images using different photographic methods, including digital SLR cameras, scanners, and film. Students will use the images they capture, learning how to process and incorporate them into projects that communicate an effective message. Students learn the technical language used in the digital photography industry and basic design methods. The core concepts of this class give students an introduction to a career in photography, advertising, digital art, retouching and restoration. Students will also receive professional certification in design and/or workforce readiness. The software used in this class is the most current version of Adobe Photoshop and Lightroom CC (Creative Cloud).

• **Media Technology 1: Introduction to Video Production**

612401CW

For those creative students with an interest in video media, this course will walk students through the planning and scriptwriting to filming and video editing. A detailed introduction to Adobe Premiere Pro and video editing concepts will provide students with the tools to assemble their acquired video elements into various video projects. By the end of this course, students will be able to produce their own videos by writing, planning and filming a script and then fully edit their video into an engaging short film. This course is geared for the creative and problem-solving learner. While there is no prerequisite class, students should be computer savvy, capable of working in teams, willing to work outside regardless of weather, and agreeable to carrying and being responsible for production equipment as needed.

• **Media Technology 2: Studio Broadcast Production**

612502CW

PREREQUISITE: Media Technology 1 with a recommended 75 or higher and/or permission from instructor.

This “behind the scenes” broadcast production course teaches the technical applications of television studio production. Students who are motivated, disciplined and can professionally interact with guests (including school district office staff and local dignitaries) will be producing videos that will be aired locally. Each student will learn a myriad of jobs in the studio including: director, studio camera operator, lighting tech, graphic designer, audio engineer, set designer and post-production editor. Students will continue to develop their Adobe Premiere Pro skills in post-production. Students must be willing to write scripts, engage with guests, work in teams, and carry heavy set pieces off and on the set for the variety of shows taped during the semester.

• **Media Technology 3: Advanced Video Production**

612603CW

PREREQUISITE: Media Technology 2 with a recommended 75 or higher and/or permission from instructor.

This advanced video editing-media technology class is geared towards the self-motivated student that wants to build on their existing Adobe Premiere Pro skills and attain certification. Students in this class will continue to develop and enhance their video production skills and will have the opportunity to incorporate other Adobe suite applications into their workflow. Throughout the semester, students will seek out community, district, and home high school video projects. These projects include but are not limited to: documentaries, PSA’s (Public Service Announcements), community leader interviews, social media videos, sports highlights, and more. Students must be willing to write scripts, shoot video outside of school hours, carry heavy field production equipment and record scenes outside regardless of the weather. By the end of this course, students will have created quality video projects to be included in their pre-professional portfolios.

• **Work-Based Learning (arts/audio work-based credit)**

529000CW

This is a program which coordinates high school studies with a job in a field related to academic or technical education standards that provides “hands on learning” in areas of student interest with a participating business. A learning contract outlines the expectations of and responsibilities of both parties. The student works regularly during or after school in exchange for the mentor’s time in teaching and demonstrating. The work-based experience may be paid or unpaid. 120 Hours, 1.0 credit

ARCHITECTURE AND CONSTRUCTION

Mechanical Design

• Mechanical Design 1/Drafting 1

617200CW

PREREQUISITE: Algebra 1 with a 75 or higher strongly recommended.

The Mechanical Design courses provide the students interested in engineering or architecture with the basic fundamentals of technical drawing used in all types of fields. Students will learn how to read and design blueprints. This course is a broad introduction to mechanical design using Computer-Aided Design (CAD) tools and freehand sketching fundamentals. Emphasis is placed on a thorough understanding of projection principles and the visualization of exact space conditions relevant to 3D modeling. Mechanical Design 1 provides the student with an understanding of basic drafting concepts such as single ANSI drafting standards, alphabet of lines and views of objects. Students will use AutoCAD and Inventor Software to construct 2D and 3D drawings.

• Mechanical Design 2/Drafting 2

617300CW

PREREQUISITE: Mechanical Design 1 with a recommended 75 or higher.

Mechanical Design 2 will focus on the understanding of the standard engineering views used throughout the engineering profession. This course utilizes AutoCAD 2D design software as well as 3D Inventor Modeling software to help the student understand single view drawings, descriptive geometry, orthographic projection, section views, auxiliary views, pictorial drawings, threads, working drawings and gears.

• Architectural Design 1/Drafting 3

617000HW

PREREQUISITE: Mechanical Design 1 and 2 with a recommended 75 or higher.

Architectural Design 1 will focus on the fundamentals of civil engineering and architectural drafting. The students will utilize AutoCAD 2D design software and AutoDesk Revit Architectural software to design and create house plan sets that include floor plans, elevations, furniture plans, wall sections, foundation plan and details. The student will also generate 3D renderings of the house design, interiors, and landscape design. Students will also be exposed to survey coordinates and plot plan layouts used in placing their house design on a lot of land.

Construction/Carpentry

• Introduction to Construction

600109CW

Is a career in the construction trades for you? This course includes an overview of safety, an orientation to the construction trades, construction math concepts, communication skills, employability skills, and an introduction to hand tools, power tools, and blue prints. Students complete hands-on tasks as they work with tools and complete assignments from a text book or online. Students will get a brief overview of carpentry, masonry, electricity, and plumbing. Students will develop a concept of teamwork, problem solving, and utilization and conservation of resources. Subject matter will include career choices and application of concepts related to becoming a professional in the construction field.

• Carpentry 1: Construction Engineering

609101CW

PREREQUISITE: Introduction to Construction with a recommended 75 or higher.

Carpentry 1/Construction Engineering prepares students to successfully work in the carpentry field by the students gaining the basic skills needed in the trade, such as: reading blueprints, using hand and power tools, and selecting building materials. Students complete hands-on tasks as they work with tools and complete assignments from a text book or online. Techniques to construct floor systems, wall frames, basic roof framing, and roofing materials are covered. This course will also include career exploration, good work habits, and employability skills. Students will have an opportunity to complete a 10-hour OSHA safety program and earn a safety credential if successfully completed. Students will work on various projects for the classroom and other programs at the school, build storage units and other items. Students should be able to climb and work at heights. Carpentry 1/Construction Engineering is a semester course.

• **Carpentry 2 and 3: Advanced Construction Engineering**

609200CW/609300HW

PREREQUISITE: Carpentry 1 with a recommended 75 or higher.

Carpentry 2 and 3 are paired courses (2-blocks, one semester). Students review subjects covered in Carpentry 1/Construction Engineering, and learn more advanced practices of floor, wall, and roof framing.

Units on estimating materials, framing with light-gauge steel, ceiling construction, laying out building lines, roof structures, stair construction, drywall installation, installing doors and windows, interior trim and exterior finishing are also covered. Students will have an opportunity to earn an industry recognized credential sponsored through the National Home Builder's Association (NAHB) if successfully completed. Students will also develop employability skills by creating a portfolio that contains a cover letter, resume, and a letter of recommendation. The student will also participate in mock interviews to help prepare them for job placement.

Electricity

Comprehensive courses provide a survey of the theory, terminology, equipment, and practical experience in the skills needed for careers in the electrical field. These courses typically include AC and DC circuitry, safety, and the National Electrical Code and may cover such skills as those involved in building circuits; wiring residential, commercial, and/or industrial buildings; installing lighting, power circuits, and cables; and estimating job costs. As students progress, their projects become more complex and expansive. In these courses, safety is stressed, and a career exploration component may be offered.

• **Electricity 1**

628701CW

PREREQUISITE: Introduction to Construction with a recommended 75 or higher.

Level 1 students learn the basics of the electrical trade. The most important subject of this course is safety. We will cover safety with tools and on the jobsite, as well as how to correctly use personal protective equipment (PPE). Along with safety, employability skills are an area of study that is vital to students getting and maintaining employment. We will cover what it takes to be successful in the electrical industry. Students are introduced to tools, materials, equipment, the National Electric Code (NEC), wiring diagrams, blueprints, and the basics of electrical theory.

• **Electricity 2 and 3**

628800CW, 628900HW

PREREQUISITE: For Electricity 2, Electricity 1 with a recommended 75 or higher. For Electricity 3, Electricity 2 with a recommended 75 or higher.

Level 2 and 3 build on the skills from Level 1. Safety remains our #1 priority. PPE use is continued. Employability moves past soft skills to resume building and mock interviews. Professionals from the electrical trade are invited in to share their knowledge with students as guest speakers. Students learn to navigate as well as interpret the National Electric Code. Residential mock wiring continues with an emphasis on specialty circuits and service entrance equipment. Students also learn the aspects of "Old Work" by cutting boxes and fishing wires in finished drywall. Level 2/3 also includes mock commercial wiring using Metallic Cable (MC) and electrical metallic tubing (EMT). Students are taught the use of various meters for installation and trouble shooting. Upon completion students wishing to enter the electrical field are given assistance with job placement.

• **Welding Technology 1 and 2 (Grades 10-12)**

634000CW, 634100CW

(Formerly Welding Technology 1)

Prerequisite for Welding 2: Welding 1 with a recommended 75 or higher.

Welding 1 and Welding 2 are paired-as a year-long class or 2-block one semester course.

Dress code: Student required to wear all protective clothing and safety attire including: leather boot/work shoes, long-sleeve denim shirt, jeans or coveralls, welding shields and safety glasses. Students may choose to purchase their own personal welding shield.

The Welding 1 and 2 courses cover welding trade theory with a strong emphasis on safety including cutting torch safety, tool usage, equipment set-up and standard terms and definitions. Basic welding and cutting techniques will be taught. In the lab, students observe demonstrations and obtain experience in both gas and arc welding through practice exercises. Instruction topics include: SMAW Welding, Industry GMAW Welding (MIG), Blueprint Reading, Planning and Estimation. Students will also begin learning basic metal fabrication skills using

various metal working equipment. Equipment such as plate rolls, hydraulic press brake, and structural rolls. Metal identification shapes and sizes will also be taught.

- **Welding Technology 3 and 4 (Grades 11-12)**

(Formerly Welding Technology 2)

Dual credit as WLD 111 and WLD 113 through York Technical College.

PREREQUISITE: Welding 1 and 2 with a recommended 75 or higher. Student must meet York Tech admission requirements.

Welding 3 and 4 are paired as a 2-block one semester course. Same dress code as listed for Welding 1 and 2.

Welding 3 and Welding 4 students enhance their skills in Stick, MIG and TIG welding on various types of steel. The concentration will be on position welds Flat, horizontal, vertical, and overhead. SMAW, GTAW, GMAW, and FCAW on bead building and joint welds. This course has an emphasis on accuracy of measurements, basic line and views on prints, as well as focusing on Math for Welders. Students will complete selected projects for fabrication and layouts with assembly and focus on advanced welding and cutting techniques. Students will concentrate on fillet and groove position welds and conforming to AWS welding codes. Students will learn to identify weld defects and determine weld sizes. They will increase their skill level in reading prints and identifying weld symbols. Students will complete individual and group projects. Intro to pipe welding, SMAW and GTAW, plasma cutting and plasma cutting safety.

- **Work-Based Learning (construction work-based credit)**

669000CW

This is a program which coordinates high school studies with a job in a field related to academic or technical education standards that provides “hands on learning” in areas of student interest with a participating business. A learning contract outlines the expectations of and responsibilities of both parties. The student works regularly during or after school in exchange for the mentor’s time in teaching and demonstrating. The work-based experience may be paid or unpaid. 120 Hours, 1.0 credit

MARKETING AND FINANCE

Business, marketing, and finance courses are available at students’ home high schools.

- **Work-Based Learning (business work-based credit)**

549000CW

This is a program which coordinates high school studies with a job in a field related to academic or technical education standards that provides “hands on learning” in areas of student interest with a participating business. A learning contract outlines the expectations of and responsibilities of both parties. The student works regularly during or after school in exchange for the mentor’s time in teaching and demonstrating. The work-based experience may be paid or unpaid. 120 Hours, 1.0 credit

TRANSPORTATION, DISTRIBUTION, AND LOGISTICS

Drone Innovation Technologies 1

329910CW

Drone Innovation Technologies is a first course in a series leading to industry certification. Rock Hill Schools' drone technologies curriculum is an interdisciplinary program sequenced to provide students an overall perspective of drone history, drone operations, computer science principles, and drone certification. Drone Innovation Technologies is the first course in the series. It is also designed for students to prepare for the industry with work- based learning, leadership and organizational skills, soft skills, and hands-on, real-world, and service learning opportunities. Each part of the program is aligned with small Unmanned Aircraft Systems (sUAS) Certification, Next Gen, and International Standards of Technology Education (ISTE) standards to prepare them to become college and career ready. Students will be evaluated through various formative and summative assessments to prep them for the Federal Administration Aviation (FAA) Exam. The Drone Innovation Technologies curriculum is aligned to eleven of the state's sixteen career clusters.

Automotive Service Technology

This is a three-level program that studies the industry, maintenance and repair of automobiles. This is a progressive program with each consecutive level building on the information and skills learned in the previous levels. Areas of study include, but are not limited to: brakes, steering and suspension, electrical systems, engine performance, manual and automatic transmissions, HVAC and engine repair. **All** potential Automotive Service Technology students along with a parent or legal guardian are required to attend an individual conference and pre-course orientation with the instructor prior to full enrollment into the program. Additionally, a supply fee is required to allow students to have individualized lab appropriate work shirts, gloves and certified safety glasses. The Automotive Technology program is designed to prepare the student for entry-level position in the automotive industry or for greater success in a post-secondary automotive training school. The curriculum used in this program has a heavy emphasis on computer usage and is very technical and challenging. Students must work well independently in order to utilize the online curriculum which includes a significant amount of rigorous reading, writing, math and science content.

• Automotive Service Technology 1

603000CW

PREREQUISITE: Algebra 1 and English 1 with a recommended 75 or higher in both.

This class requires completion of a safety unit in addition to the regular course work. Safety module **MUST** be completed successfully prior to the students gaining access to the Lab facilities. Extensive on-line course work is used through-out **ALL** levels of this program. Automotive service, tools and equipment, steering and suspension and basic electrical taught in Level 1. Class structure is set up so that the classroom/lab time ratio is 70 percent/30 percent with a heavy emphasis on theory and understanding prior to application. All lab work is done on Trainers, NOT live work.

• Automotive Service Technology 2

603100CW

PREREQUISITE for: Automotive Service Technology 1 with completion of all required coursework and a recommended 75 or higher.

This class requires a safety unit be completed in addition to the regular course work. Safety module **MUST** be completed successfully prior to the students gaining access to the Lab facilities. Extensive on-line course work is used through-out **ALL** levels of this program. HVAC, diesel engines, brakes, automatic/manual transmissions and drivetrains, and starting and charging systems are all taught in level 2. Class structure is set up so that the classroom/lab time ratio is 60percent/40 percent with a heavy emphasis on theory and understanding prior to application. All lab work is done on Trainers and some live work.

• **Automotive Service Technology 3 and 4**

603200CW, 603300HW

(Formerly Automotive Service Technology 3)

PREREQUISITE: Automotive Service Technology 2 with completion of all required coursework and a recommended 75 or higher.

Automotive Service Technology 3 and 4 are paired as a two block, one semester class. This class requires a safety unit be completed in addition to the regular course work. Safety module **MUST** be completed successfully prior to the students gaining access to the lab facilities. Extensive on-line course work is used through-out **ALL** levels of this program. Engine repair, engine performance, electrical/computer control systems, and hybrid/alternative fuels are taught in level 3 and 4. Class structure is set up so that the classroom/lab time ratio is 50/50 with a heavy emphasis on theory and understanding prior to application. Lab work is conducted on Trainers and live work.

Automotive Collision Repair Technology

This course of study prepares students for employment in the collision repair industry. Students who successfully complete this rigorous program are prepared to continue their education in a post-secondary setting or may enter the workforce in collision repair and refinish related jobs.

• **Automotive Collision Repair Technology 1**

602000CW

PREREQUISITE: Algebra 1 and English 1 with a recommended 75 or higher in both.

In Automotive Collision Repair Tech 1, students will have classroom instruction that includes I-CAR and SP2 computer modules in safety, automobile parts identification, repair methods, chemical safety, tool usage, automotive refinishing and other topics. The curriculum used in this program has a heavy emphasis on computer usage and is very technical and challenging ~~rigorous~~. Students must work well independently and use their time wisely to complete the required computer modules. Completion of the assigned I-CAR and SP2 computer courses are mandatory for shop/lab admittance. Certifications, which are nationally and internationally recognized are available. Some students prefer to purchase an organic vapor respirator and compressed air blow nozzle for personal use in the class, which total approximately \$25.00. These expenses are optional, and students can take the class without the personal equipment. Appropriate dress is a must for the class; work clothes, closed toes shoes, and safety glasses are required.

• **Automotive Collision Repair Technology 2**

602100CW

PREREQUISITE: Automotive Collision Repair Tech 1 with completion of all required coursework and a recommended 75 or higher.

Students continue instruction including computer modules in I-CAR and SP2. The curriculum used in this program has a heavy emphasis on computer usage and is very technical and rigorous. Students must work well independently and use their time wisely to complete the required computer modules. Completion of the assigned I-CAR and SP2 computer courses are mandatory for shop/lab admittance. Classroom and lab activities include lecture, research, writing assignments, and hands-on experience involving tools, equipment, and a variety of vehicles. Training includes non-structural repair, panel replacement, plastic filler work, and collision repair welding. Students work in a state of the art facility. Students can earn certificates for completed I-CAR and SP2 modules. Appropriate dress is a must for the class; work clothes, closed toes shoes and safety glasses are required.

• **Automotive Collision Repair Technology 3 and 4**

602200CW, 602300HW

(Formerly Collision Repair 3)

PREREQUISITE: Automotive Collision Repair Tech 2 with completion of all required coursework and a recommended 75 or higher.

Auto Collision Repair 3 and 4 are paired as a 2 block, one semester course.

Students continue instruction including computer modules in I-CAR, SP2, and Sherwin-Williams eLearning courses. The curriculum used in this program has a heavy emphasis on computer usage and is very technical and rigorous. Students must work well independently and use their time wisely to complete the required computer modules. Completion of the assigned I-CAR, SP2 and Sherwin-Williams elearning computer courses are mandatory for shop/lab admittance. Lab activities include lecture, research, writing assignments, and hands-on experience involving tools, equipment, and a variety of vehicles. Students work directly with customers, and assess vehicle damage, order parts and materials necessary for repairs, make repairs, and ensure customer

satisfaction with the work. Students are responsible for the paperwork/computer records necessary for the repair process. Students can earn certificates for completed computer modules. Students who successfully complete Collision Repair 1, 2, 3, and 4 will complete a portfolio documenting their progress, and including any earned certificates. They will earn a certificate of completion from the Applied Technology Center upon successful completion of the Collision Repair program of study as a SC CTE (Career and Technical Education) Completer. Appropriate dress is a must for the class; work clothes, closed toes shoes and safety glasses are required.

• **Logistics and Distribution 1: Introduction**

699001CW

This course is designed specifically for ninth and tenth grade students to provide them with essential knowledge, skills, and experiences related to career opportunities in warehouse, distribution, logistics, and transportation. Students will learn and work in authentic environments using industry standard equipment and procedures, as well as have opportunities to obtain information through field trips and guest speakers from the respective industries. Each of these industries has a significant presence in our area and is projected to continue their pattern of growth. Students must earn a 75 or higher in this course as a prerequisite for higher level courses.

• **Logistics and Distribution 2: Warehouse Distribution**

699102CW

PREREQUISITE: Logistics and Distribution 1 with a recommended 75 or higher.

This course is designed to actively engage students in the processes of receiving, shipping, order-picking, inventory control, and the operation of numerous types of material handling equipment. Students will acquire information and skills that relate directly to potential career objectives in the warehouse and distribution industry. Successful completers of this course will have the opportunity to sit for either or both of the following nationally recognized industry certifications: (CLA) Certified Logistics Associate and/or (CLT) Certified Logistics Technician. Students will have an opportunity to complete a 10 hour OSHA safety program and earn a safety credential, if successfully completed. A small fee may be assessed for the credential.

• **Logistics and Distribution 3: Warehouse Inventory**

699203CW

PREREQUISITE: Logistics and Distribution 2 with a recommended 75 or higher.

This course is a basic overview of logistics management. Logistics involves the flow of goods and services involving such aspects as warehousing, materials handling, inventory control, and transportation from the raw material to the end user. Students will begin to explore management and supervisory level aspects of the warehousing industry, including staffing, quality control, resource management, problem solving, and group dynamics.

• **Logistics and Distribution 4: Work-Based**

699304CW

PREREQUISITE: Logistics and Distribution 1, 2, and 3 with a recommended 75 or higher in all three courses.

The students in Materials Handling 4 will perform general equipment operations, execute the receipt of shipment of goods, and be expected to research and present a portfolio related to their experience in Warehousing and Logistics Technology. In addition, the student will study and relate to the impact of globalization on the supply chain process. Eligible students will have the opportunity for a Work-Based learning experience. This level is an **Internship** for students that have completed the three previous levels of the Warehousing and Logistics curriculum at the Applied Technology Center. An internship is a one-on-one relationship that provides “hands-on” learning in an area of student interest. A learning contract outlines the expectations of and responsibilities of both parties. The protégé works regularly during or after school for three or four hours a week in exchange for the mentor’s time in teaching and demonstrating. The internship generally lasts from three to six months and may or may not include financial compensation.

• **Work-Based Learning (transportation work-based credit)**

679000CW

This is a program which coordinates high school studies with a job in a field related to academic or technical education standards that provides “hands on learning” in areas of student interest with a participating business. A learning contract outlines the expectations of and responsibilities of both parties. The student works regularly during or after school in exchange for the mentor’s time in teaching and demonstrating. The work-based experience may be paid or unpaid. 120 Hours, 1.0 credit

MANUFACTURING

• **Integrated Production Technologies 1: Advanced Technology for Design and Production** 622200CW

This foundational course focuses on the use of modern technologies in the design and improvement of products. Students explore the following questions using project-based and problem-based scenarios: How do we reverse engineer and document a product and capture design decisions and physical characteristics? How can we design a manufacturing process to mass produce a new product? How can we design a working DC Motor Hobby Kit with accompanying instructional manual? How can we design a system to monitor the manufacturing process and quality of the product? How can we make sure the proper amount of liquid is placed in a container for safe storage or transportation? How can optical sensors and various machines sort goods on a manufacturing assembly line? Students interact with professionals in the integrated production technologies field throughout the course, conducting interviews or participating in on-site and/or virtual field trips.

• **Integrated Production Technologies 2: Systems of Advanced Technology** 622300CW

PREREQUISITE: IPT 1 with a recommended 75 or higher.

In this course, students apply the technologies that are found in modern, clean production environments. Students study effective and energy efficient control of pumping, conveyors, piping, pneumatic and hydraulic control systems. Students apply total quality management to production design to assure quality. Students also focus on properties of materials and material testing, creating documentation to support designs, examining properties and justifying material selections based on properties. Students learn that old products become the new raw materials for new products.

• **Integrated Production Technologies 3: Mechatronic Systems for Advanced Production** 622400CW

PREREQUISITE: IPT 2 with a recommended 75 or higher.

Students will design cost-effective work cells incorporating automation and robotics to improve quality of final products. Students will focus on advanced production, will design and create mechatronic systems, and produce authentic documentation about their cyber-mechanical system using data to control and monitor processes.

• **Integrated Production Technologies 4: Design for the Production of Advanced Products** 622500CW

PREREQUISITE: IPT3 with a recommended 75 or higher.

Students will create plant designs to process and automatically assemble materials into new products. Students will use a prototype to create a production flow plan, analyze and evaluate all aspects of the design and production, and use data, quality control processes and Six Sigma methodology to control production.

• **Work-Based Learning (manufacturing work-based credit)** 649000CW

This is a program which coordinates high school studies with a job in a field related to academic or technical education standards that provides “hands on learning” in areas of student interest with a participating business. A learning contract outlines the expectations of and responsibilities of both parties. The student works regularly during or after school in exchange for the mentor’s time in teaching and demonstrating. The work-based experience may be paid or unpaid. 120 Hours, 1.0 credit

AGRICULTURE

Horticulture

• **Agricultural Science and Technology (Grades 9-12)**

562400CW

The Agricultural Science and Technology course is designed to teach essential concepts and understanding related to plant and animal life including biotechnology, the conservation of natural resources, and the impact of agriculture and natural resource utilization on the environment. Emphasis is placed on the role of agriculture in our society and the importance of agriculture to the welfare of the world. Basic personal and community leadership and safety, and agricultural mechanical technology are included as a part of the instructional program. Each student is expected to design and participate in a supervised agricultural experience. Typical learning activities include hands-on learning experiences including performing basic principles of plant, soil, and animal science; studying and modeling the significance of humankind's interrelationship with soil, water, and air; participating in FFA activities. This course is a component of the following Agriculture, Food and Natural Resources Pathways: Agricultural Mechanics and Technology, Environmental and Natural Resources Management, Horticulture, Plant and Animal Systems.

• **Introduction to Horticulture (Grades 9-12)**

565000CW

PREREQUISITE: Agricultural Science and Technology with a recommended 75 or higher.

The Introduction to Horticulture course is designed to be an introduction to the Horticulture pathway. It is recommended as a prerequisite for all other horticulture courses. This course includes organized subject matter and practical experiences related to the culture of plants used principally for ornamental or aesthetic purposes. Instruction emphasizes knowledge and understanding of the importance of establishing, maintaining, and managing ornamental horticulture enterprises. Typical instructional activities include hands-on experiences with propagating, growing, establishing, and maintaining nursery plants and greenhouse crops; tissue culture techniques; designing landscapes; preparing designs; sales analysis and management; participating in personal and community leadership development activities; planning and implementing a relevant school-to-work transition experience; and participating in FFA activities. This is a list of core competencies to be completed by all students enrolled. The teacher may select additional competencies based on a local needs assessment. This course is a component of the following Agriculture, Food and Natural Resources Pathways: Horticulture Pathway.

• **Nursery, Greenhouse, and Garden Center Technology (Grades 11-12)**

567200CW

PREREQUISITE: Agricultural Science and Technology with a recommended 75 or higher.

The course in Nursery, Greenhouse and Garden Center Technology includes organized subject matter and practical experiences related to the operation and management of nursery, greenhouse or a garden center. Instruction emphasizes knowledge and understanding of the importance of establishing, maintaining, and managing "green industry" enterprises. Typical instructional activities include hands-on experiences with propagating, growing, establishing, and maintaining nursery plants and greenhouse crops; tissue culture techniques; designing landscapes; preparing designs; sales analysis and management; participating in personal and community leadership development activities; planning and implementing a relevant school-to-work transition experience; and participating in FFA activities. Students will be outside in the greenhouse and headhouse and are expected to participate in all outside activities. This course is a component of the following Agriculture, Food and Natural Resources Pathways: Horticulture.

Agricultural Mechanics and Technology

• **Agricultural Science and Technology (Grades 9-12)**

562400CW

The Agricultural Science and Technology course is designed to teach essential concepts and understanding related to plant and animal life including biotechnology, the conservation of natural resources, and the impact of agriculture and natural resource utilization on the environment. Emphasis is placed on the role of agriculture in our society and the importance of agriculture to the welfare of the world. Basic personal and community

leadership and safety, and agricultural mechanical technology are included as a part of the instructional program. Each student is expected to design and participate in a supervised agricultural experience. Typical learning activities include hands-on learning experiences including performing basic principles of plant, soil, and animal science; studying and modeling the significance of humankind's interrelationship with soil, water, and air; participating in FFA activities. This course is a component of the following Agriculture, Food and Natural Resources Pathways: Agricultural Mechanics and Technology, Environmental and Natural Resources Management, Horticulture, Plant and Animal Systems.

• **Equipment Operation and Maintenance**

562100CW

PREREQUISITE: Agricultural Science and Technology with a recommended 75 or higher.

This course is designed to teach students how to operate and maintain equipment commonly used in the agricultural industry. It includes equipment used in all four of the Agriculture, Food and Natural Resources pathways: Horticulture, Plant and Animal Systems, Environmental and Natural Resources Management and Agricultural Mechanics and Technology. Typical instructional activities include hands-on experiences with agricultural power units; participating in personal and community leadership development activities; planning and implementing a relevant school-to-work transition experience; and participating in FFA activities. This is a list of core competencies to be completed in two years by each student enrolled in these courses. The teacher may select additional competencies based on a local needs assessment. This course is a component of the following Agriculture, Food and Natural Resources Pathways: Agricultural Mechanics and Technology, Environmental and Natural Resources Management, Horticulture, Plant and Animal Systems.

• **Agricultural Power Mechanics**

561000CW

PREREQUISITE: Agricultural Science and Technology with a recommended 75 or higher.

The courses in Agricultural Mechanics are designed to qualify the student completing the courses for job entry into farm, business, or industrial phases of agricultural mechanics or to continue advanced training in post high school education. A combination of subject matter and activities is designed to teach technical knowledge and skills for entry-level positions in selling, selecting, and servicing agribusiness technical equipment and facilities, including computers, specialized software, power units, machinery equipment, structures and utilities. Typical instructional activities include hands-on experiences with agricultural power units; participating in personal and community leadership development activities; planning and participating in FFA activities. This is a list of core competencies to be completed in one year by each student enrolled in these courses. The teacher may select additional competencies based on a local needs assessment. This course is a component of the following Agriculture, Food and Natural Resources Pathways: Agricultural Mechanics and Technology.

Agri-Business and Marketing

560000CW

PREREQUISITE: Agricultural Science and Technology with a recommended 75 or higher.

The course in Agricultural Business Management is designed for the student who plans to seek employment on, manage, or own a farm; or seek employment in an agribusiness field. Students will be involved in learning activities that generally prepare him/her to apply the economic and business principles involved in the organization, operation, and management of the farm, ranch, or agribusiness. Typical instructional activities include hands-on experiences with applying modern economic and business principles involved in the organization, operation, and management of agricultural businesses including the production and marketing of agricultural products and services; applying computer application models; participating in personal and community leadership development activities; planning and implementing a relevant school-to-work transition experience; and participating in FFA activities. This course is a component of the following Agriculture, Food and Natural Resources Pathways: Horticulture, Agricultural Mechanics and Technology, Plant and Animal Systems.

CURRICULUM PLANNING FOR HIGH SCHOOL DIPLOMA

	MS – 9th 	10th 	11th 	12th 	Other
English (4 required)					
Mathematics (4 required)					
Science (3 required)
